

# FOLIA PARASITOLOGICA

An International Journal for Parasitology

## CONTENTS

Volume 58 Number 1 March 2011

### Research Articles

Low host specificity in the Kudoidae (Myxosporea: Multivalvulida) including seventeen new host records for <i>Kudoa thalassomi</i> M.A.A. Burger, R.D. Adlard .....	1–16
<i>Lamellodiscus</i> (Monogenea: Diplectanidae) parasites of <i>Dentex macrophthalmus</i> (Teleostei: Sparidae) from the North Atlantic coast of Africa, with a redescription of <i>L. dentexi</i> Aljoshkina, 1984, and description of three new species A. Diamanka, L. Neifar, A. Pariselle, L. Euzet .....	17–26
Infection dynamics of the monogenean parasite <i>Gyrodactylus gasterostei</i> on sympatric and allopatric populations of the three-spined stickleback <i>Gasterosteus aculeatus</i> J.A.M. Raeymaekers, K.M. Wegner, T. Huyse, F.A.M. Volckaert .....	27–34
Acanthocolpidae (Digenea) of marine fishes off New Caledonia, with the descriptions of two new species R.A. Bray, J.-L. Justine .....	35–47
Morphological and molecular study of <i>Microphallus primas</i> (Digenea: Microphallidae) metacercaria, infecting the shore crab <i>Carcinus maenas</i> from northern Portugal S. Pina, F. Russell-Pinto, P. Rodrigues .....	48–54
Three new species of <i>Spiniloculus</i> (Cestoda: Tetraphyllidea) from <i>Chiloscyllium punctatum</i> (Elasmobranchii: Orectolobiformes) off Borneo with clarification of the identity of the type of the genus L. Desjardins, J.N. Caira .....	55–68
Spermiogenesis and ultrastructure of the spermatozoon of the trypanorhynch cestode <i>Aporhynchus menezesi</i> (Aporhynchidae), a parasite of the velvet belly lanternshark <i>Etmopterus spinax</i> (Elasmobranchii: Etmopteridae) A.M. Marigo, Z. Świderski, C.T. Bâ, J. Miquel .....	69–78
<b>Instructions to Authors .....</b>	79–80
