

Contents Overview

PART I. Plants and Plant Science

1	Basic Plant Functions: Discovery and Utilization	3
2	Nature, Kinds, and Names of Plants	21
3	The Seed Plant Plan and its Development	33

PART II. The Cell: Basis of Plant Life

4	Organization and Function of the Cell	57
5	Cell Matter and Information	83
6	Cell Metabolism, Energy, and Transport	103
7	Photosynthesis: the Chloroplast	119

PART III. Vascular Plant Structure and Function

8	The Leaf: Structure and Photosynthetic Activity	135
9	Leaf Transpiration and Water Balance	147
10	The Stem and Vascular System	161
11	The Root: the Soil, and Plant Nutrients	177

PART IV. Plant Growth and Development

12	Primary Growth and its Hormonal Control	197
13	Secondary Growth: Formation and Structure of Wood and Bark	219
14	Environmental and Genetic Control of Development	239

PART V. Flowering Plant Reproduction

15	Vegetative Reproduction	259
16	Sexual Reproduction: the Flower	271
17	Embryo, Seed, and Fruit	293
18	Inheritance	311

PART VI. Evolution and Adaptation

19	Ecological Adaptation	333
20	Evolution	359
21	Plants Through Time: Origin, Evolutionary History, and Classification	379

PART VII. Non-vascular Plants

22	Prokaryotes	401
23	The Algae	425
24	Fungi	459
25	Symbiotic Associations	483
26	Pathogens and Plant Diseases	509
27	Bryophytes: Nonvascular Land Plants	529

PART VIII. Vascular Plants

28	Early Vascular Plants: Evolution and Modern Survivors	547
29	The Ferns	575
30	The Seed Plants: Gymnosperms	593
31	The Seed Plants: Angiosperms	615
32	Plants and People	637

viii CONTENTS OVERVIEW

**PART IX. Ecosystems and Plant
Communities**

33 Dynamics of Ecosystems 665

**34 Nature and Diversity of Plant
Communities 685**

**Appendix: Basic Chemistry Needed for
Botany 709**
