

CONTENTS

Preface

- 1 A Framework for Human Physiology

PART ONE BASIC CELL FUNCTIONS

- 2 Chemical Composition of the Body
3 Cell Structure
4 Molecular Control Mechanisms—DNA and Protein
5 Energy and Cellular Metabolism
6 Movement of Molecules across Cell Membranes

PART TWO BIOLOGICAL CONTROL SYSTEMS

- 7 Homeostatic Mechanisms and Cellular Communication
8 Neural Control Mechanisms
9 The Sensory Systems
10 Hormonal Control Mechanisms
11 Muscle
12 Control of Body Movement

vii

PART THREE COORDINATED BODY FUNCTIONS

- 13 Circulation 347
14 Respiration 427
15 The Kidneys and Regulation of Water and Inorganic Ions 471
16 The Digestion and Absorption of Food 513
17 Regulation of Organic Metabolism, Growth, and Energy Balance 553
18 Reproduction 601
19 Defense Mechanisms of the Body 653
20 Consciousness and Behavior 705
- 139 Appendix A: Answers to Thought Questions A-1
141 Appendix B: English and Metric Units A-12
167 Appendix C: Equations A-13
219 Appendix D: Glossary A-14
255 Appendix E: References for Figure Adaptations A-41
283 Appendix F: Suggested Reading A-42
325 Index I-1
