ENVIRONMENTAL HEALTH CRITERIA FOR METHYL PARATHION

1.	SUMMARY AND EVALUATION, CONCLUSIONS, RECOMMENDATIONS	11
1.1	Summary and evaluation	11
1.1.1	Exposure	11
1.1.2	Uptake, metabolism, and excretion	13
1.1.3	Effects on organisms in the environment	14
1.1.4	Effects on experimental animals and <i>in vitro</i> test systems	15
1.1.5	Effects on human beings	16
1.2	Conclusions	16
1.3	Recommendations	17
2.	IDENTITY, PHYSICAL AND CHEMICAL PROPERTIES, ANALYTICAL METHODS	19
2.1	Identity	19
2.1.1	Primary constituent	19
2.1.2	Technical product	20
2.1.2.1	Purity	21
2.2	Physical and chemical properties	21
2.3	Conversion factors	22
2.4	Analytical methods	22
2.4.1	Sampling, extraction, clean-up	22
2.4.1.1	Plant material (tobacco, fruits, vegetables, crops with low oil (fat) content)	23
2.4.1.2	Dairy products, products with a high fat content (edible fats)	25
2.4.1.3	Blood, body fluids	26
2.4.1.4	Soil, sediments	26
2.4.1.5	Water	27
2.4.1.6	Air	28
2.4.1.7	Formulations	28
2.4.2	Instrumental analytical methods	29
2.4.2.1	Gas chromatography	29
2.4.2.2	High performance liquid chroma- tography (HPLC)	31

2.4.2.3	Thin layer chromatography (TLC)	32
2.4.2.4	Spectrophotometry	32
2.4.2.5	Polarography	33
2.4.2.6	Mass spectrometry	33
2.4.3	Detection limits	34
2.4.4	Confirmatory method	34
3.	SOURCES OF HUMAN AND ENVIRONMENTAL EXPOSURE	55
3.1	Natural occurrence	55
3.2	Man-made sources	55
3.2.1	Production process	55
3.2.2	Loss into the environment	55
3.2.3	Production	55
3.2.4	World consumption	56
3.2.5	Formulations	57
3.3	Uses	57
4.	ENVIRONMENTAL TRANSPORTATION, DISTRIBUTION, AND TRANSFORMATION	58
4.1	Transportation and distribution between media	58
4.1.1	Air	59
4.1.2	Water	61
4.1.3	Soil	62
4.1.4	Vegetation and wildlife	63
4.1.5	Entry into the food-chain	66
4.2	Biotransformation	66
4.2.1	Degradation involving biota	66
4.2.2	Abiotic degradation	72
4.2.2.1	Photodegradation	72
4.2.2.2	Hydrolytic degradation	76
4.2.3	Bioaccumulation	78
4.3	Interaction with other physical, chemical, and biological factors	79
4.4	Ultimate fate following use	80
5.	ENVIRONMENTAL LEVELS AND HUMAN EXPOSURE	81
5.1	Environmental levels	81
5.1.1	Air	81
5.1.2	Water	82

5.1.3	Soil	83
5.1.4	Food	84
5.1.5	Terrestrial and aquatic organisms	87
5.2	General population exposure	87
5.3	Occupational exposure during manufacture, formulation, or use	87
6.	KINETICS AND METABOLISM	91
6.1	Absorption	91
6.2	Distribution	91
6.3	Metabolic transformation	92
6.4	Elimination and excretion in expired air, faeces, or urine	95
6.5	Retention and turnover	98
7.	EFFECTS ON ORGANISMS IN THE ENVIRONMENT	100
7.1	Microorganisms	100
7.1.1	Bacteria and fungi	100
7.1.2	Algae	101
7.2	Aquatic animals	101
7.2.1	Short-term toxicity in aquatic invertebrates	138
7.2.1.1	Laboratory studies on single species	138
7.2.1.2	Mesocosmic studies	139
7.2.2	Fish	140
7.2.2.1	Laboratory studies on single species	140
7.2.2.2	Mesocosmic studies	141
7.2.3	Amphibians	142
7.3	Terrestrial organisms	142
7.3.1	Plants	142
7.3.2	Invertebrates	143
7.3.3	Birds	145
7.3.4	Non-laboratory mammals	149
8.	EFFECTS ON EXPERIMENTAL ANIMALS AND <i>IN VITRO</i> TEST SYSTEMS	150
8.1	Single exposure	150
8.2	Skin and eye irritation, sensitization	154
8.3	Short-term exposures	154
8.4	Long-term exposures	155

8.5	Reproduction, embryotoxicity, and teratogenicity	156
8.6	Mutagenicity and related end-points	159
8.7	Carcinogenicity	159
8.8	Special studies	164
8.9	Factors modifying toxicity	165
8.10	Mode of action	169
	8.10.1 Inhibition of esterases	169
	8.10.2 Possible alkylation of biological macromolecules	170
	8.10.3 General	171
9.	EFFECTS ON MAN	172
	9.1 General population exposure	173
	9.1.1 Acute toxicity	173
	9.1.2 Effects of short- and long-term exposure, controlled human studies	174
	9.2 Occupational exposure	175
	9.2.1 Epidemiological studies	176
10.	PREVIOUS EVALUATIONS BY INTERNATIONAL BODIES	177
	REFERENCES	179
	ANNEX I	222
	RESUME	227
	RESUMEN	236
