ENVIRONMENTAL HEALTH CRITERIA FOR BENZENE

1.	SUMMARY AND CONCLUSIONS	13
1.1	Identity, physical and chemical properties, analytical methods	13
1.2	Sources of human exposure	13
1.3	Environmental transport, distribution and transformation	13
1.4	Environmental levels and human exposure	14
1.5	Kinetics and metabolism	14
1.6	Effects on laboratory mammals and <i>in vitro</i> test systems	15
1.6.1	Systemic toxicity	15
1.6.2	Genotoxicity and carcinogenicity	16
1.6.3	Reproductive toxicity, embryotoxicity and teratogenicity	16
1.6.4	Immunotoxicity	16
1.7	Effects on humans	17
1.8	Conclusions	17
2.	IDENTITY, PHYSICAL AND CHEMICAL PROPERTIES, ANALYTICAL METHODS	19
2.1	Identity	19
2.2	Physical and chemical properties	19
2.3	Conversion factors	20
2.4	Analytical methods	20
2.4.1	Environmental samples	21
2.4.2	Biological materials	26
3.	SOURCES OF HUMAN AND ENVIRONMENTAL EXPOSURE	28
3.1	Natural occurrence	28
3.2	Anthropogenic sources	28
3.2.1	Production levels and processes	28
3.2.2	Uses	30
4.	ENVIRONMENTAL TRANSPORT, DISTRIBUTION AND TRANSFORMATION	32
4.1	Transport and distribution between media	32

4.2	Environmental degradation	32
4.2.1	Abiotic degradation	32
4.2.2	Biodegradation	33
4.2.3	Bioconcentration	34
5.	ENVIRONMENTAL LEVELS AND HUMAN EXPOSURE	35
5.1	Environmental levels	35
5.1.1	Air	35
5.1.2	Water	37
5.1.3	Soil and sediments	40
5.1.4	Food	40
5.2	General population exposure	41
5.3	Occupational exposure during manufacture, formulation or use	42
6.	KINETICS AND METABOLISM IN LABORATORY ANIMALS AND HUMANS	45
6.1	Absorption	45
6.1.1	Air	45
6.1.2	Oral	45
6.1.3	Dermal	46
6.2	Distribution	46
6.2.1	Inhalation exposure	46
6.2.2	Oral and dermal exposures	47
6.3	Metabolic transformation	48
6.4	Elimination and excretion	54
6.4.1	Inhalation exposure	54
6.4.2	Oral exposure	55
6.4.3	Dermal exposure	55
6.5	Retention and turnover	56
6.6	Reaction with body components	56
6.7	Modelling of pharmacokinetic data for benzene	58
7.	EFFECTS ON LABORATORY MAMMALS AND <i>IN VITRO</i> TEST SYSTEMS	59
7.1	Single exposure	59
7.2	Short-term and long-term exposures	61
7.3	Skin and eye irritation	65
7.4	Reproductive toxicity, embryotoxicity and teratogenicity	65
7.5	Mutagenicity and related end-points	66

7.5.1	<i>In vitro</i> studies	69
7.5.2	<i>In vivo</i> studies	75
7.6	Carcinogenicity	76
7.6.1	Inhalation studies	76
7.6.2	Oral and subcutaneous studies	82
7.7	Special studies	82
7.7.1	Immunotoxicity	82
7.7.2	Neurotoxicity	87
7.8	Factors modifying toxicity	88
7.9	Mechanism of toxicity	89
8.	EFFECTS ON HUMANS	91
8.1	General population and occupational exposure	91
8.1.1	Acute toxicity	91
8.1.2	Effects of short- and long-term exposures	92
8.1.2.1	Bone marrow depression; aplastic anaemia	92
8.1.2.2	Immunological effects	93
8.1.2.3	Chromosomal effects	94
8.1.2.4	Carcinogenic effects	95
9.	EVALUATION OF HUMAN HEALTH RISKS	107
9.1	General population	107
9.2	Occupational exposure	107
9.3	Toxic effects	107
9.3.1	Short-term and long-term exposures; organ toxicity	108
9.3.1.1	Haematotoxicity; bone marrow depression	108
9.3.1.2	Mechanism of action and metabolism	109
9.3.1.3	Immunotoxicity	110
9.3.2	Genotoxicity and carcinogenic effects	110
9.3.2.1	Mechanism of carcinogenicity	111
9.3.2.2	Human carcinogenesis	113
9.4	Other toxicological end-points	114
9.5	Conclusions	114
10.	RECOMMENDATIONS FOR PROTECTION OF HUMAN HEALTH	117
11.	FURTHER RESEARCH	118

12. PREVIOUS EVALUATIONS BY INTERNATIONAL BODIES	119
REFERENCES	120
RESUME ET CONCLUSIONS	144
RESUMEN Y CONCLUSIONES	151
