

## CONTENTS

1.	SUMMARY AND EVALUATION, CONCLUSIONS AND RECOMMENDATIONS . . . . .	13
1.1	Summary and evaluation . . . . .	13
1.1.1	Identity, properties, and analytical methods . . . . .	13
1.1.2	Production and uses . . . . .	13
1.1.3	Environmental transport, distribution, and transformation . . . . .	13
1.1.4	Environmental levels and human exposure . . . . .	14
1.1.5	Kinetics and metabolism . . . . .	14
1.1.6	Effects on organisms in the environment . . . . .	15
1.1.7	Effects on experimental animals and <i>in vitro</i> test systems . . . . .	16
1.1.7.1	Reproduction . . . . .	16
1.1.7.2	Mutagenicity . . . . .	17
1.1.7.3	Carcinogenicity . . . . .	18
1.1.7.4	Effects on different organs and systems . . . . .	18
1.1.7.5	Primary mechanism of toxicity . . . . .	19
1.1.8	Effects on humans . . . . .	20
1.2	Conclusions . . . . .	21
1.2.1	General population exposure . . . . .	21
1.2.2	Subpopulations at high risk . . . . .	21
1.2.3	Occupational exposure . . . . .	21
1.2.4	Environmental effects . . . . .	22
1.3	Recommendations . . . . .	22

---

2.	IDENTITY, PHYSICAL AND CHEMICAL PROPERTIES, ANALYTICAL METHODS . . . . .	23
2.1	Identity . . . . .	23
2.2	Physical and chemical properties . . . . .	24
2.3	Conversion factors . . . . .	26
2.4	Analytical methods . . . . .	27
3.	SOURCES OF HUMAN AND ENVIRONMENTAL EXPOSURE . . . . .	33
4.	ENVIRONMENTAL TRANSPORT, DISTRIBUTION, AND TRANSFORMATION . . . . .	34
4.1	Volatilization and air transportation . . . . .	34
4.2	Water . . . . .	34
4.2.1	Hydrolysis . . . . .	34
4.2.2	Photolysis . . . . .	37
4.2.3	Degradation by microorganisms . . . . .	39
4.2.4	Persistence in surface water . . . . .	42
4.2.5	Removal from water . . . . .	46
4.2.6	Persistence in sea water . . . . .	46
4.2.7	Bioaccumulation/biomagnification . . . . .	48
4.3	Soil . . . . .	50
4.3.1	Adsorption, desorption . . . . .	50
4.3.2	Transformation . . . . .	53
4.3.2.1	Photolysis in soil . . . . .	53
4.3.3	Biotransformation in soil . . . . .	54
4.3.4	Degradation by microorganisms . . . . .	59
4.3.5	Persistence in soil . . . . .	64
4.3.6	Interaction with other physical, chemical, or biological factors . . . . .	68
4.3.7	Vegetation . . . . .	68
4.3.7.1	Uptake and transformation in plants . . . . .	68

5. ENVIRONMENTAL LEVELS AND HUMAN EXPOSURE . . . . .	70
5.1 Environmental levels . . . . .	70
5.1.1 Air . . . . .	70
5.1.2 Water . . . . .	70
5.1.3 Soil . . . . .	73
5.1.4 Food and animal feed . . . . .	76
5.1.4.1 Fruit, vegetables, and grain . . . . .	76
5.1.4.2 Animal products . . . . .	84
5.1.4.3 Animal feed crops . . . . .	85
5.1.5 Other products . . . . .	86
5.1.6 Terrestrial organisms . . . . .	86
5.2 General population exposure . . . . .	87
5.2.1 Exposure through the food . . . . .	87
5.2.2 Exposure during insect control . . . . .	89
5.3 Occupational exposure during manufacture, formulation, or use . . . . .	89
6. KINETICS AND METABOLISM . . . . .	94
6.1 Absorption . . . . .	94
6.2 Distribution . . . . .	96
6.3 Metabolism . . . . .	102
6.3.1 <i>In vitro</i> studies on animal tissues . . . . .	103
6.3.2 <i>In vivo</i> studies on animals . . . . .	106
6.3.3 Metabolic transformation in plants . . . . .	110
6.3.4 <i>In vitro</i> studies with human tissues . . . . .	111
6.3.5 <i>In vivo</i> studies on humans . . . . .	113
6.4 Elimination and excretion in expired air, faeces, urine, milk, and eggs . . . . .	115
7. EFFECTS ON ORGANISMS IN THE ENVIRONMENT . . . . .	121
7.1 Microorganisms . . . . .	121
7.1.1 Soil microorganisms . . . . .	121
7.1.2 Aquatic microorganisms . . . . .	121
7.2.1 Aquatic invertebrates . . . . .	122

---

7.2.2	Fish . . . . .	133
7.2.2.1	Acute toxicity . . . . .	133
7.2.2.2	Short-term and long-term toxicity . . . . .	143
7.2.3	Amphibians . . . . .	144
7.3	Terrestrial organisms . . . . .	144
7.3.1	Worms . . . . .	144
7.3.2	Insects . . . . .	144
7.3.3	Birds . . . . .	145
7.3.4	Mammals . . . . .	147
7.4	Effects on the population and ecosystem . . . . .	148
8.	EFFECTS ON EXPERIMENTAL ANIMALS AND <i>IN VITRO</i> TEST SYSTEMS . . . . .	155
8.1	Single exposures . . . . .	155
8.1.1	Oral toxicity . . . . .	155
8.1.2	Acute inhalation toxicity . . . . .	155
8.1.3	Dermal toxicity . . . . .	160
8.1.4	Other routes of exposure . . . . .	160
8.2	Skin and eye irritation, sensitization . . . . .	160
8.2.1	Skin and eye irritation . . . . .	160
8.2.2	Sensitization . . . . .	161
8.3	Short- and long-term oral exposure . . . . .	162
8.4	Short- and long-term inhalation toxicity . . . . .	162
8.5	Reproduction and developmental toxicity . . . . .	162
8.5.1	Mammalian reproductive toxicity studies . . . . .	176
8.5.1.1	Mouse . . . . .	176
8.5.1.2	Rat . . . . .	176
8.5.1.3	Gerbil . . . . .	177
8.5.2	Mammalian developmental toxicity studies . . . . .	178
8.5.2.1	Mouse . . . . .	178
8.5.2.2	Rat . . . . .	178
8.5.2.3	Guinea-pig . . . . .	179
8.5.2.4	Rabbit . . . . .	179
8.5.2.5	Dog . . . . .	179
8.5.2.6	Pig . . . . .	179

8.5.2.7	Monkey . . . . .	180
8.5.3	Reproductive and developmental toxicity studies in non-mammalian species . . . . .	180
8.5.3.1	Fish . . . . .	180
8.5.3.2	Amphibian . . . . .	181
8.5.3.3	Birds . . . . .	181
8.5.4	Appraisal . . . . .	182
8.6	Mutagenicity of carbaryl and <i>N</i> -nitrosocarbaryl . . . . .	182
8.6.1	Genotoxicity assays <i>in vitro</i> . . . . .	183
8.6.1.1	Primary DNA damage . . . . .	183
8.6.1.2	Gene mutation assay . . . . .	190
8.6.1.3	Chromosomal aberration assays and sister chromatid exchange . . . . .	194
8.6.2	Genotoxicity <i>in vivo</i> . . . . .	196
8.6.2.1	Host-mediated assay . . . . .	196
8.6.2.2	<i>Drosophila melanogaster</i> and other insects . . . . .	196
8.6.2.3	Chromosomal aberrations and sister chromatid exchange . . . . .	198
8.6.2.4	Dominant lethal assays in rodents . . . . .	199
8.6.3	Other end-points . . . . .	199
8.6.3.1	Cell transformation . . . . .	199
8.6.3.2	Aneuploidy induction . . . . .	200
8.6.4	Appraisal . . . . .	202
8.7	Carcinogenicity . . . . .	203
8.7.1	Carcinogenicity studies of carbaryl in rodents . . . . .	203
8.7.1.1	Mouse . . . . .	203
8.7.1.2	Rats . . . . .	208
8.7.1.3	Overall appraisal of carbaryl carcinogenicity . . . . .	209
8.7.2	Carcinogenicity studies of <i>N</i> -nitrosocarbaryl . . . . .	209
8.7.2.1	Rats . . . . .	210
8.7.2.2	Mice . . . . .	213

---

8.7.2.3	Overall evaluation of the carcinogenicity of N-nitrosocarbaryl . . . . .	213
8.7.3	Carcinogenicity of $\beta$ -carbaryl . . . . .	214
8.8	Special studies . . . . .	215
8.8.1	Neurotoxicity . . . . .	219
8.8.2	Effects on the immune system . . . . .	219
8.8.2.1	Appraisal on immunotoxicology . . . . .	219
8.8.2.2	<i>In vivo</i> studies . . . . .	220
8.8.2.3	<i>In vitro</i> studies . . . . .	224
8.8.3	Effects in blood . . . . .	225
8.8.4	Effects on the liver and other organs . . . . .	228
8.8.5	Effects on serum glucose . . . . .	229
8.8.6	Interactions with the drug metabolizing enzyme system . . . . .	230
8.8.7	Effects on the endocrine system . . . . .	233
8.8.8	Other studies . . . . .	237
8.9	Factors modifying toxicity, toxicity of metabolites . . . . .	237
8.9.1	Factors modifying toxicity . . . . .	237
8.9.2	Toxicity of metabolites . . . . .	240
8.9.3	N-nitrosocarbaryl . . . . .	241
8.10	Mechanism of toxicity - mode of action . . . . .	242
8.10.1	Inhibition of cholinesterase activity . . . . .	242
9.	EFFECTS ON HUMAN BEINGS . . . . .	245
9.1	General population exposure . . . . .	245
9.1.1	Acute toxicity, poisoning incidents . . . . .	245
9.1.2	Controlled human studies . . . . .	246
9.1.3	Long-term exposure . . . . .	247
9.2	Occupational exposure . . . . .	248
9.2.1	Epidemiological studies . . . . .	248

10. PREVIOUS EVALUATION BY INTERNATIONAL BODIES .....	251
REFERENCES .....	253
APPENDIX .....	332
RESUME ET EVALUATION, CONCLUSIONS ET RECOMMANDATIONS .....	335
RESUMEN Y EVALUACION, CONCLUSIONES Y RECOMENDACIONES .....	347
