

Table of Contents

Summary	8
Introduction and Methodological Approaches.....	11
1. The life cycle of a military vehicle	13
1.1 The existing system of short-term military vehicle storage in the Army of the Czech Republic.....	15
1.1.1 A cost analysis of logistic processes within the existing storage system	21
1.1.2 An analysis of the material support within the existing short-term storage system	28
1.1.3 An analysis of the total costs of the short-term military vehicle storage.....	33
1.2 A brief summary of Chapter 1	35
2. A new nanotechnology-based system of short-term military vehicle storage	37
2.1 Use of nanotechnology for short-term military vehicle storage	38
2.1.1 Stages of wrapping a vehicle into a special film.....	44
2.1.2 An economic evaluation of the nanotechnology-based means of short-term military vehicle storage.....	52
2.2 An economic evaluation of work (logistic) processes within the new short-term military vehicle storage system.....	54
2.3 An analysis of the total costs of the new short-term storage system.....	56
2.4 A comparison of the existing and the newly designed vehicle storage system.....	60
2.4.1 Determining the utility function.....	62
2.4.2 A time comparison of the existing and the newly designed vehicle storage system	64
2.5 The design of a short-term TATRA 815 6x6 VVN military vehicle storage kit.....	66
2.5.1 Technical description of the items contained in the kit	68
2.5.2 Precautions to be taken while using the short-term vehicle storage kit.....	75
2.6 A brief summary of Chapter 2	75
3. An evaluation of the impact of corrosion on the military vehicle life cycle.....	76
3.1 Measuring climatic conditions of stored vehicles	77
3.2 The experimental material	80
3.2.1 A chemical composition analysis of the specimen material	81
3.2.2 A metallographic analysis of the specimen basic material	82
3.2.3 Microhardness measurements of the test material	83
3.3 The impact of corrosion on functional parts of the TATRA 815 6x6 VVN vehicle engine	85
3.4 An evaluation of the impact of corrosion on the material characteristics	96
3.4.1 The impact of corrosion on brittle-fracture characteristics.....	97
3.4.2 The impact of corrosion on plastic deformation.....	102
3.5 A fractographic analysis of fracture surfaces from the impact test after a corrosion attack	107
3.6 A metallographic analysis of the fracture surface cross section.....	113
3.7 A brief summary of Chapter 3	120
Conclusion	123
Sources and references.....	125
