

CONTENTS

Part I

TEST MANUAL; TEST NORMS AND STANDARDS	7
1. INTRODUCTION	7
1.1 Motor performance and physical fitness; problems of its testing	7
1.2 Brief history of the problem in Czechoslovakia	8
1.3 UNIFITTEST (6-60)	8
2. CONSTRUCTION OF UNIFITTEST	9
2.1 Theoretical premises and principles for selection of tests	9
2.2 Contents of test profile — test battery UNIFITTEST (6-60)	9
2.3 Metric characteristics of the tests	11
3. UNIFITTEST: DESCRIPTION AND SCORING	15
3.1 Standing broad jump	15
3.2 Sit-ups (60 seconds)	15
3.3.1 12-minute run	16
3.3.2 Endurance shuttle run	16
3.3.3 2-kilometre walk	17
3.4.1 Shuttle run 4 x 10 m	18
3.4.2 Pull-ups (men); Flexed-arm hang (women)	18
3.4.3 Sit and reach	19
4. SOMATIC MEASUREMENTS	21
4.1 Body height	21
4.2 Body weight	21
4.3 Caliper measurement (three skinfolds)	21
4.4 Body mass index (BMI)	22
5. ORGANIZATION OF TESTING AND MEASUREMENTS	23
5.1 Instructions and test preparation	23
5.2 Time schedule of testing	23
5.3 Testing conditions	23
5.4 Administration of test scores	23
6. ASSESSMENT OF TESTING AND MEASUREMENT SCORES	24
6.1 Principle and characteristics of norms	24
6.2 Types of norms used	24
6.3 Norm and individual differences	28
6.4 Use of UNIFITTEST battery	28
7. TEST NORMS AND STANDARDS	29
7.1 Ten-point norms for young people (6-20 years)	30
7.2 Five-point norms for adults (21-60 years)	37
7.3 Substantiated standards for young people and adults	39
7.4 Graphic norms for young people and adults	43
7.5 Five-point norms of the sum of three skinfolds (7-60 years)	55
7.6 Percentile graph of the index of body weight — BMI (6-55 years)	56
7.7 Percentile graph of body height (0-18 years)	58
APPENDICES	
A. Forms for registering test scores and auxiliary tables	61
B. 2-km walking test: calculation the cardiorespiratory fitness index	71

Part II

PREMISES FOR CONSTRUCTION OF UNIFITTEST AND VERIFICATION FINDINGS	79
8. BACKGROUND TO THE CONSTRUCTION OF UNIFITTEST: 25 YEARS OF LARGE-SCALE RESEARCH PROJECTS ON MOTOR FITNESS IN CZECHOSLOVAKIA	79
8.1 Table on major large-scale research projects in motor fitness carried out in Czechoslovakia in 1965–1987	79
8.2 Motor fitness and basic somatic characteristics of school population after research in 1966 and 1987	81
8.3 Motor fitness and basic somatic characteristics of university population after research in 1965 and 1986	83
8.4 Motor fitness and somatic characteristics of motor-active population after research in 1972–1975 and 1982	84
8.5 Select basic data used for the construction of UNIFITTEST norms	86
9. VERIFICATION OF NORMS AND METRIC PARAMETERS OF TESTS IN THE UNIFITTEST BATTERY (for ages 7–14)	88
9.1 Project of the verification study	88
9.2 Verification of ten-point norms	88
9.3 Intercorrelations between tests of the battery	90
9.4 Total score of the test battery — battery score	91
9.5 Differential score of the test battery	92
9.6 Verification of validity and reliability	93
9.7 Feasibility and practical application of the test battery	95
