

ORIGINAL ARTICLES

Genetic determination of an endothelial function and the size of the heart sections in juvenile hypertensives

Věra Adámková, Jaroslav A. Hubáček, Helena Pistulková, Hana Malínská, Jelena Skibová 59 – 65

Reactivation study of pyridinium oximes for acetylcholinesterases inhibited by paraoxon or DFP

Tae-Hyuk Kim, Kyung-Ae Oh, No-Joong Park, No-Sang Park, Yeong Joon Kim, Eul Kyun Yum, Young Sik Jung 67 – 72

Chronobiology's progress. Part II, chronomics for an immediately applicable biomedicine

Franz Halberg, Germaine Cornélissen, George Katinas, Levan Tvildiani, Marina Gigolashvili, Ketevan Janashia, Tim Toba, Miguel Revilla, Philip Regal, Robert B. Sothorn, Hans W. Wendt, Zhengrong Wang, Michal Zeman, Rita Jozsa, R.B. Singh, Gen Mitsutake, Sergei M. Chibisov, Jong Lee, Dan Holley, James E. Holte, Robert P. Sonkowsky, Othild Schwartzkopff, Patrick Delmore, Kuniaki Otsuka, Earl E. Bakken, Jerzy Czaplicki and the International BIOCOS Group 73 – 86

GOSA, a simulated annealing-based program for global optimization of nonlinear problems, also reveals transyears

Jerzy Czaplicki, Germaine Cornélissen and Franz Halberg 87 – 94

Imatinib mesylate affects tyrosine kinase activity in both leukemic and normal primary mononuclear blood cells

Kateřina Kuželová, Dana Grebeňová, Michaela Pluskalová, Iuri Marinov, Hana Klamová, Zbyněk Hrkal 95 – 104

Freshwater microcrustacean *Daphnia magna* Straus as an early screen model to compare toxicity of acetylcholinesterase inhibitors

Šárka Veselá, Vlastimil Ondruška, Kamil Kuča, Jiří Patočka 105 – 110
