

EDITORIAL

To the cell and molecular biology, cell physiology and pathology, cell morphology, structure and cytochemistry – the struggle for publication

Karel Smetana *155–157*

REVIEW ARTICLES

Endoplasmic reticulum quality control and congenital pathology

Marek Michalak *159–165*

The nucleolar structure and nucleolar proteins as indicators of cell proliferation events in plants

Fernando González-Camacho and Francisco Javier Medina *167–174*

ORIGINAL ARTICLES

Expression and translocation of major nucleolar proteins in relation to the transcriptional activity of the nucleolus

Ivan Kalousek, Petra Otevřelová, Pavla Röselová *175–186*

The chemopreventive effect of diallyl disulphide on N-nitrosodiethylamine induced hepatocarcinogenesis

Thamilarasan Manivasagam, Perumal Subramanian, Ganapathy Suthakar, Musthafa Mohamed Essa
187–191

A morphological and cytochemical note to the reversible intranucleolar translocation of AgNORs (silver stained nucleolus organizer regions) in early leukemic granulocytic progenitors represented by cultured K 562 cells

Karel Smetana, Michaela Pluskalová, Ilona Jirásková, Zbyněk Hrkal *193–198*

Effect of diet supplementation with N-acetylcysteine on leucocyte functions in prematurely aging mice

Noelia Guayerbas, Marta Puerto, Carmen Alvarado, Mónica De la Fuente *199–205*

NEWS

Jubilee of Karel Smetana

Josef Berger *206*
