

# CONTENTS

## POINT OF VIEW

- 181 The central-marginal hypothesis in acridid Orthoptera: A critique of Colombo's (2012) article — C.J. BIDAU & D.A. MARTI

## ARTICLES

- 187 Ancient and modern hybridization between *Lucilia sericata* and *L. cuprina* (Diptera: Calliphoridae) — K. WILLIAMS & M.H. VILLET
- 197 Endosymbiont-free ants: Molecular biological evidence that neither *Wolbachia*, *Cardinium* or any other bacterial endosymbionts play a role in thelytokous parthenogenesis in the harvester ant species, *Messor barbarus* and *M. capitatus* (Hymenoptera: Formicidae) — P. MARTÍNEZ-RODRÍGUEZ, J. SARASA, B. PECO, B.M. JAUREGUI, D. RIVERA & J.L. BELLA
- 205 Genetic analysis of quantitative trait loci for cocoon and silk production quantity in *Bombyx mori* (Lepidoptera: Bombycidae) — B. LI, X. WANG, C. HOU, A. XU & M. LI
- 215 Nucleotide diversity based on *csd* gene of the black giant honey bee, *Apis laboriosa* (Hymenoptera: Apidae) — H. WANG, Z.-L. WANG, Z.-J. ZENG, X.-B. WU & W.-Y. YAN
- 221 Role of juvenile hormone in the hypermetabolic production of water revealed by the O<sub>2</sub> consumption and thermovision images of larvae of insects fed a diet of dry food — K. SLÁMA & J. LUKÁŠ
- 231 Trophobiosis in the arboricolous ant *Liometopum microcephalum* (Hymenoptera: Formicidae: Dolichoderinae) — J. SCHLAGHAMERSKÝ, J. KAŠPAR, L. PETRÁKOVÁ & V. ŠUSTR
- 241 Differential accumulation of energy by the colour morphs of the pea aphid *Acyrtosiphon pisum* (Hemiptera: Aphididae) mirrors their ecological adaptations — S.M. AHSAEI, S.M. TABADKANI, V. HOSSEINAVEH, H. ALLAHYARI & M. BIGHAM
- 247 Behavioural and toxicological responses of *Blattella germanica* (Dictyoptera: Blattellidae) to monoterpenes — R.A. ALZOGARAY, V. SFARA, A. N. MORETTI & E.N. ZERBA
- 253 Effects on lepidopteran herbivores of feeding on leaves of transgenic birch (*Betula pendula*) expressing the sugar beet chitinase IV gene — L. VIHERVUORI, P. LYYTIKÄINEN-SAARENMAA, J. LU & H.-L. PASONEN
- 263 Cold storage affects mortality, body mass, lifespan, reproduction and flight capacity of *Praon volucre* (Hymenoptera: Braconidae) — J.C. LINS JR, V.H.P. BUENO, L.A. SIDNEY, D.B. SILVA, M.V. SAMPAIO, J.M. PEREIRA, Q.S.S. NOMELINI & J.C. VAN LENTEREN
- 271 Seasonal cues mediate host behaviour modification and cocoon polymorphism in *Microplitis mediator* (Hymenoptera: Braconidae) — S.-P. LUO, J.P. MICHAUD, J.-C. LI, J. ZHANG, X.-X. LIU & Q.-W. ZHANG
- 277 Is host age an important factor in the bionomics of *Apanteles myeloenta* (Hymenoptera: Braconidae)? — H. KISHANI FARAHANI & S.H. GOLDANSAZ
- 285 Occurrence of *Harmonia axyridis* (Coleoptera: Coccinellidae) in field crops — A. VANDEREYCKEN, Y. BROSTAUX, E. JOIE, E. HAUBRUGE & F.J. VERHEGGEN
- 293 Muga silkworm, *Antheraea assamensis* (Lepidoptera: Saturniidae) – an overview of distribution, biology and breeding — A. TIKADER, K. VIJAYAN & B. SARATCHANDRA
- 301 Monitoring of *Matsucoccus feytaudi* (Hemiptera: Matsucoccidae) and its natural enemies in Spain using sticky tapes and pheromone traps — E. RODRIGO, M. CATALÁ-OLTRA, E. PÉREZ-LAORGA & M. BAENA
- 311 How fine is fine-scale? Questioning the use of fine-scale bioclimatic data in species distribution models used for forecasting abundance patterns in butterflies — K.J. FILZ, T. SCHMITT & J.O. ENGLER
- 319 Response of Orthoptera to clear-cuts in beech forests — A. SLIACKA, A. KRIŠTÍN & L. NAĐO
- 327 Long-term partitioning of space between two territorial species of ants (Hymenoptera: Formicidae) and their effect on subordinate species — W. CZECHOWSKI, B. MARKÓ, A. RADCHENKO & P. ŚLIPÍŃSKI
- 339 Specialized feeding of *Euconus pubicollis* (Coleoptera: Staphylinidae: Scydmaeninae) on oribatid mites: Prey preferences and hunting behaviour — P. JAŁOSZYŃSKI & Z. OLSZANOWSKI
- 355 Analysis of the number of sensilla on the labrum and the diet of grasshoppers belonging to the family Pamphagidae (Orthoptera) — N. BENKENANA, A. HARRAT & D. PETIT
- 365 Revision of *Pseudoparicana* (Hemiptera: Fulgoromorpha: Tropiduchidae) with description of a new species — R.-R. WANG, I. MALENOVSKÝ, A.-P. LIANG & T. BOURGOIN
- 379 Phylogenetic relatedness of *Erebia medusa* and *E. epipsodea* (Lepidoptera: Nymphalidae) confirmed — M. ŠEMELÁKOVÁ, P. PRISTAŠ & L. PANIGAJ

## NOTE

- 383 Characterization of ten polymorphic microsatellite markers for an endangered butterfly *Argynnis niobe* and their cross-species utility in the closely related species *A. adippe* (Lepidoptera: Nymphalidae) — J. ZIMA JR., D. LEŠTINA & M. KONVIČKA
