

# Obsah

Scientific Contribution of the Monograph.....	5
Used Symbols.....	7
Introduction .....	9
<b>1. Technological Heredity .....</b>	<b>11</b>
1.1 Technological heredity after the machining processes .....	11
1.2 The essence of reflect technological heredity .....	13
<b>2. Technology of Production of Rolling Bearings .....</b>	<b>16</b>
2.1 Turning forgings.....	16
2.2 Cold rolling.....	17
2.3 Heat treatment of bearing steel .....	18
2.4 Grinding faces bearing rings.....	19
2.5 Grinding outer surfaces of revolution of bearing rings .....	20
2.6 Grinding internal surfaces of revolution of bearing rings .....	21
2.7 Finishing of the roller race of bearing rings – superfinishing .....	22
<b>3. Harmonic Analysis of Circularity Profile .....</b>	<b>24</b>
3.1 Fourier transform .....	24
3.2 Discrete Fourier transformation and its calculation .....	27
<b>4. The Theoretical Foundations of Correlation Analysis .....</b>	<b>29</b>
4.1 Correlation coefficient of Pearson.....	29
4.2 Correlation coefficient of Spearman .....	30
4.3 Testing hypotheses about the existence of correlations .....	30
<b>5. Methods for Comparing Profiles Roundness .....</b>	<b>33</b>
5.1 Method for comparing the size of amplitudes .....	34
5.2 The method comparison of points the profile .....	36
5.3 Method for comparing profiles using the arithmetic mean slope of profile .....	37
<b>6. Results of Experiments.....</b>	<b>39</b>
6.1 Method for comparing the size of amplitudes .....	40
6.1.1 <i>The relationship between technological operations –                 outer surfaces.....</i>	41
6.1.2 <i>Evaluation of technological heredity between operations –                 outer surface .....</i>	46

6.1.3	<i>The relationship between technological operations – inner roller race</i> .....	47
6.1.4	<i>Evaluation of technological heredity between operations – inner roller races</i> .....	52
6.2	The method comparison of points the profile .....	52
6.2.1	<i>Between operations – outer cylindrical surfaces</i> .....	53
6.2.2	<i>Between operations – inner surfaces</i> .....	54
6.3	Methods for comparing profiles using the arithmetic mean slope of profile .....	56
6.3.1	<i>Between operations – outer cylindrical surfaces</i> .....	56
6.3.2	<i>Between operations – inner surfaces</i> .....	57
	<b>Supplements</b> .....	59
	<b>Conclusion</b> .....	61
	<b>Summary</b> .....	64
	<b>Literature</b> .....	65
	<b>About the Author</b> .....	68
	<b>Subject Index</b> .....	69
