Preface, vii

1	Concepts of Fluid Flow	1
1.1	Introduction, 2	
1.2	Definitions, 3	
1.3	Governing Equations, 11	
1.4	Theoretical Concepts, 24	
1.5	Similarity and Physical Models, 37	
2	Energy Principle	43
2.1	Definition of Specific Energy, 44	
2.2	Subcritical, Critical, and Supercritical Flow, 47	
2.3	Accessibility and Controls, 54	
2.4	Application of the Energy Principle to Practice, 59	
3	The Momentum Principle	75
3.1	Definition of Specific Momentum, 76	
3.2	The Hydraulic Jump, 78	
3.3	Hydraulic Jumps at Density Interfaces, 101	
4	Development of Uniform Flow Concepts	111
4.1	Establishment of Uniform Flow, 112	
4.2	The Chezy and Manning Equations, 113	
4.3	Resistance Coefficient Estimation, 115	
5	Computation of Uniform Flow	163
5.1	Calculation of Normal Depth and Velocity, 164	
5.2	Normal and Critical Slopes, 172	
5.3	Channels of Composite Roughness, 176	
5.4	Application of Uniform Flow Concepts to Practice, 182	

6	Theory and Analysis of Gradually and Spatially Varied Flow	195
6.1	Basic Assumptions and the Equation of Gradually Varied Flow, 196	
6.2	Characteristics and Classification of Gradually Varied Flow Profiles, 197	
6.3	Computation of Gradually Varied Flow, 201	
6.4	Spatially Varied Flow, 247	
6.5	Application to Practice, 257	
7	Design of Channels	273
7.1	Introduction, 274	
7.2	Design of Lined Channels, 279	
7.3	Design of Stable, Unlined, Earthen Channels: A General Tractive Force Design Methodology, 288	
7.4	Design of Channels Lined with Grass, 314	
8	Flow Measurement	325
8.1	Induction, 326	
8.2	Devices and Procedures for Stream Gaging, 327	
8.3	Structures for Flow Measurement: Weirs, 336	
8.4	Structures for Flow Measurement: Flumes, 356	
8.5	Structures for Flow Measurement: Culverts, 365	
9	Rapidly Varied Flow in Nonprismatic Channels	393
9.1	Introduction, 394	
9.2	Bridge Piers, 394	
9.3	Control of Hydraulic Jumps, 426	
9.4	Drop Spillways, 441	
9.5	Transition Structures, 444	
10	Turbulent Diffusion and Dispersion in Steady Open-Channel Flow	461
10.1	Introduction, 462	
10.2	Governing Equations, 462	
10.3	Vertical and Transverse Turbulent Diffusion and Longitudinal Dispersion, 470	
10.4	Numerical Dispersion, 499	
10.5	Vertical, Turbulent Diffusion in a Continuously Stratified Environment, 501	
11	Turbulent, Buoyant, Surface Jets and Associated Phenomena	509
11.1	Introduction, 510	
11.2	Basic Mechanics of Turbulent Jets, 511	
11.3	Bouyant Surface Jets, 520	
11.4	Upstream Cooling Water Wedges, 534	
12	Gradually Varied, Unsteady Flow	549
12.1	Introduction, 550	
12.2	Governing Equations and Basic Numerical Techniques, 554	
12.3	Implicit Four-Point Difference Scheme—Channels of Arbitrary Shape, 560	
12.4	Generalization of the Implicit Four-Point Technique, 572	
12.5	Boundary and Initial Conditions, 574	
12.6	Calibration and Verification, 576	

13 Rapidly Varied, Unsteady Flow

583

- 13.1 Introduction, 584
- 13.2 Elementary Surges, 584
- 13.3 Dam Break, 594
- 13.4 Surges in Open Channels, 619
- 13.5 Pulsating Flow; Roll Waves, 621

14 Hydraulic Models

631

- 14.1 Introduction, 632
- 14.2 Fixed-Bed River or Channel Models, 638
- 14.3 Movable-Bed Models, 643
- 14.4 Model Materials and Construction, 656
- 14.5 Physical Model Calibration and Verification, 660
- 14.6 Special-Purpose Models, 661

Appendix I, 667**Appendix II, 673****Appendix III, 685****Index, 693**
