PART I INTRODUCTION TO QUANTITATIVE METHODS 1

1 The basic language of statistics 3

Introduction: Social sciences and quantitative methods 3
Data files 4
The discipline of statistics 9
Populations, samples, and units 10
Descriptive statistics 11
Inferential statistics 12
Variables and measurement 12
Importance of the level of measurement 19
Concepts, dimensions, and indicators 20
Validity and reliability 21
Summary 22
Key words 23
Exercises 24
SPSS tutorial: Getting started with SPSS 26

2 The research process 32

Main steps in social research 33
The research object 34
Examining the problematics of the issue 34
The general research question 35
The literature review 36
The theoretical framework and the specific research question 37
The research hypothesis 38
The research design 39
Data collection 43
Data analysis 43
Interpretation of results 44
General conclusions and further questions 44

Summary 44
Key words 46
Exercises 46
SPSS tutorial: Becoming familiar with SPSS 46

PART II DESCRIPTIVE STATISTICS 49

3 **Univariate descriptive statistics** 51

Introduction 51
Measures of central tendency 53
For qualitative variables 53
For quantitative variables 55
Measures of dispersion 64
For qualitative variables 64
For quantitative variables 65
Measures of position 68
Other measures 69
Ratios 70
Percentages and proportions 70
Methodological issues 71
The definition of the categories over which the counting is done 71
Outliers 71
Summary 71
Key words 73
Exercises 73
SPSS tutorial: Exploring descriptive statistics 78

4 **Graphical representations** 87

Introduction 87
Bar charts 88
Pie charts 93
Histograms 94
Area as a measure of the proportion of data 95
Drawing a histogram manually 95
Frequency polygons and density curves 98
Histogram or bar chart? 99
Box plots 101
Line charts 101
Stem-and-leaf plots 103
Scatter diagrams 104
The general shape of a distribution 105
Symmetry 105
Kurtosis 106
Summary 107

Key words 108
SPSS tutorial 108
Bar charts 109
Pie charts 109
Histograms 110
Box plots 110

PART III METHODOLOGICAL TOOLS 113

5 **Creating new variables with SPSS** 115

Main commands for creating variables in SPSS 115
The COMPUTE command 116
The RECODE command 122
The Select Cases submenu 126
The SORT Cases command 129
The Aggregate procedure 130
Getting help in SPSS 132
Summary 133
Key words 134
SPSS exercises and tutorial 134

6 **Normal distributions and sampling distributions** 135

Introduction 135
Properties of normal distributions 137
Areas under the curve, proportions of data, and percentages of data 139
Using the table of areas under the normal curve 140
Values of z used frequently 142
Numerical examples 145
Recognizing equivalent statements 147
Sampling distributions 147
Sampling distribution of the mean 147
Sampling distribution of a proportion 151
Summary 152
Key words 153
Exercises 153

7 **Sampling designs** 155

Introduction 155
Types of samples 156
Probabilistic samples 157
Non-probabilistic samples 161
Errors of measurement 165
Errors of observation 166
Sampling errors 166

Summary 166
Key words 167
Exercises 167
SPSS tutorial 168

PART IV INFERENTIAL STATISTICS 171

8 **Estimation** 173

Introduction: Inferential statistics 173
The logic of estimation: proportions and percentages 174
Estimation of a percentage: confidence statements 176
Proportions and percentages 180
Point estimates and interval estimates 180
Formulation of the level of confidence 180
Estimation of a mean 180
Estimation of a mean: the calculations 181
Effect of the sample size on the margin of error 183
Calculation of the sample size needed in a survey 183
Summary 184
Key words 185
Exercises 186
Interpretation of confidence statements 186
Formulation of confidence statements 186
SPSS tutorial 187
Estimating a mean with SPSS 187
Exercises 188
Estimating a proportion with SPSS 188

9 **Hypothesis testing** 190

Introduction 190
The logic of hypothesis testing 192
The detailed procedure for hypothesis testing 193
Understanding the probabilities of error 195
The various forms of the alternative hypothesis 197
When are one-tailed tests used? 198
Hypothesis testing in statistical software 199
t-tests 199
The uses of hypothesis testing procedures 199
Summary 200
Key words 202
Exercises 202
SPSS tutorial 203
Performing a one-sample t-test 203

PART V STATISTICAL ASSOCIATION 205

10 Correlation and the regression line 207

Introduction 207
Dependent and independent variables 210
The measure of statistical association between two quantitative variables 211
The regression line 215
Statistically significant correlations 217
Interpreting SPSS outputs 218
From statistical association to relationship between variables 221
Summary 223
Key words 223
Exercises 224
SPSS tutorial 225
The Correlate procedure 225
The Regression procedure 226
The scatter diagram and the line of regression 227

11 Two-way tables and the chi-squared test 229

Introduction 229
The definition of statistical association for categorical variables 233
The chi-squared statistic (χ^2) 235
Chi-squared as a test of association between two nominal variables 238
Measures of the strength of the association based on chi-squared 241
Other measures of association for two-way tables 241
The odds ratio 242
Summary 246
Key words 247
Exercises 247
SPSS tutorial 248

12 *t*-tests and ANOVA 252

Introduction 252
The *t*-test as a test of statistical association 255
The analysis of variance 257
One-way ANOVA 258
Two-way and multi-way ANOVA 261
Graphical representations of the various kinds of effects 264
Ordinal variables 266
Statistical association as a qualitative relationship 266
Summary 272

Key words 273
SPSS tutorial 273

APPENDIX I Reporting a quantitative analysis 283

Introduction 284
How to write a descriptive report 284
Basic direct reports 284
Analytical descriptive reports 293
Reporting an estimate 302
Reporting a hypothesis test 303
Reporting a statistical association 305
Two quantitative variables 305
The association between a qualitative and a quantitative variable 305
Two qualitative variables 306

Appendix II How to create a data file in SPSS 308

Appendix III Area under the normal curve 313

Appendix IV Table of random numbers 315

Glossary 317

Bibliography 337
