

CONTENT

LIST OF SYMBOLS USED	4
Chapter 1. INTRODUCTION	7
1.1 Problem formulation	7
1.1.1 Vehicle asymmetry	8
1.2 Research aim and objectives	8
1.3 Assumptions made in this work	9
Chapter 2. LITERATURE REVIEWS	10
2.1 Previous studies on vehicle models	10
2.1.1 Vehicle models	11
2.1.2 Vehicle simulation studies	12
2.2 Viscous Damping Model	13
Chapter 3. MATHEMATICAL MODEL AND SOLUTIONS	15
3.1 General	15
3.1.1 Vehicle model and solution	15
3.1.2 Model configurations	17
Chapter 4. EXPERIMENTAL TEST	19
4.1 General	19
4.1.1 Vehicle Selection	19
4.1.2 Stiffness and inertia properties	19
4.2 Vertical dynamic test and procedures	20
4.2.1 Summary	21
Chapter 5. MODEL VALIDATION, RESULTS AND DISCUSSIONS	22
5.1 General	22
5.1.1 Model development and vehicle properties	22
5.2 Modification of test vehicle	22
5.3 Results and discussions	23
5.3.1 Summary	32
Chapter 6. CONCLUSION AND RECOMMENDATIONS	33
6.1 Introduction	33
6.1.1 Highlights of the present work	33
6.2 Conclusions	34

6.2.1 Recommendations for future work	34
References	36
List of publications	41
CURRICULUM VITAE	42
