

TABLE OF CONTENTS

1/ THANKS	8
2/ INTRODUCTION	12
3/ PLACEMENT OF MY RESEARCH IN REFERENCE TO PERFORMANCE ORIENTED DESIGN AND SYSTEMS ORIENTED DESIGN	16
4/ PLACEMENT OF MY RESEARCH INTO STATE OF ART IN REFERENCE TO MATERIAL, TYPES OF PROTOTYPES AND LOCATION	20
4.1 Key Designs - State of Art	21
4.1.1 Traditional Norwegian Panelling	21
4.1.2 Morpho-Ecologies Project at AA School of Architecture	22
4.1.3 Warped	23
4.1.4 Responsive Wood Architectures Studio	23
4.1.5 Responsive Surface Structure	25
4.1.6 Microloop Panels	26
4.1.7 Ray 2	26
4.1.8 PareSITE, the Environmental Summer Pavilion I	27
4.1.9 Loop, the Environmental Summer Pavilion II	29
4.1.10 Ray 3	31
4.2 LCA Analysis Comparing Solid Wood and Laminates	31
4.2.1 Abstract	31
4.2.2 Introduction	32
4.2.3 State of Art	34
4.2.4 Conclusion for Material Selection Chosen for Comparison	34
4.2.5 Method - LCA	36
4.2.6 Results and Discussion	37
4.2.7 Conclusions	37

5 /	METHODOLOGY: SYSTEMS ORIENTED DESIGN AND RESEARCH BY DESIGN WHILE 1:1 PROTOTYPING	38
5.1	Generating the Design Process with GIGA-map: The Development of the Loop Pavilion	40
5.1.1	Abstract	41
5.1.2	The First Step	41
5.1.3	Work on the Winning Design	45
5.1.4	Conclusions	49
5.1.5	List of Participating Students	49
5.2	NGO, Practice and University Driven Research By Design on Performative Wood	50
5.2.1	Abstract	51
5.2.2	Introduction	52
5.2.3	The Method of Cooperation between Academy, Practice and NGO	52
5.2.4	Discussion	55
5.2.5	LOOP Pavilion at the Festival EnviroCity	56
5.2.6	Conclusions	58
5.3	1:1, A Transdisciplinary Prototyping Studio	60
5.3.1	Abstract	60
5.3.2	Introduction	61
5.3.3	The Project: Wood as a Primary Medium to Architectural Performance	62
5.3.4	The Transdisciplinary Prototyping	63
5.3.5	Conclusions	64
5.3.6	List of Participating Students	64
5.3.7	Thanks	65
5.4	Systemic Approach to Architectural Performance: Handling Data in Creative Design Process: Mixing Physical with Digital	66
5.4.1	Abstract	66
5.4.2	Introduction	66
5.4.3	The Media-Mix in Praxis	67
5.4.4	Conclusions	79

6 /	THE MATERIAL IN RELATION TO ENVIRONMENT ..	80
6.1	Ecology of Forests and Trees in Central Bohemia in Relation to Material	81
6.2	Wood's Material Properties in Relation to Moisture Content	83
6.2.1	Overall Perspective	83
6.2.2	Wood Warping Observations	85
6.2.3	Factors of Moisture Content	87
7 /	PROJECTS	92
7.1	Ray	96
7.1.1	Ray 2: The Performative Screen	96
7.1.2	Ray 3: The Performative Envelope	101
7.1.2.1	Abstract	102
7.1.2.2	Introduction	103
7.1.2.3	The Panelling	104
7.1.2.3.1	The Wooden Layer	104
7.1.2.3.2	The Joinery	104
7.1.2.3.3	The Thermal Comfort	104
7.1.2.4	Vision for Possible Application	106
7.1.2.5	Conclusions	108
7.1.2.6	Acknowledgement	109
7.2	Environmental Summer Pavilions	110
7.2.1	pareSITE: The Environmental Summer Pavilion I	110
7.2.1.1	Abstract	111
7.2.1.2	Research Questions	111
7.2.1.3	Material Performance	112
7.2.1.4	Design Process in Grasshopper for Rhino 5	113
7.2.1.5	Structural Design	114
7.2.1.6	Conclusion	117
7.2.2	Loop: The Environmental Summer Pavilion II	118
7.2.2.1	Abstract	118
7.2.2.2	Research Questions	120
7.2.2.3	Material Performance	120
7.2.2.4	Design Process in Grasshopper for Rhino 5 and Fabrication	122
7.2.2.5	Structural Design	124
7.2.2.6	Conclusions	126
7.2.2.7	List of the Participating Students	126
7.2.2.8	Studio Course Leaders	126

8 /	SUMMARY AND CONCLUSIONS OF THE THESIS ...	128
8.1	Abstract	129
8.2	Introduction	129
8.3	Design's Boundary Conditions in Relation to Environmental Interactions	131
8.3.1	Svalgangs	133
8.3.2	Wood as a Primary Medium to Architectural Performance Project	135
8.4	Summary	136
8.5	Conclusions	138
8.6	Future Visions	140
8.7	Acknowledgement	141
9 /	REFERENCES	142
