

Contents

1. Introduction	4
2. Review of the present status of knowledge	4
2.1. Methodology	5
2.2. The philosophy of normal values	7
2.3. Biological aspects (sex, age, etc.)	9
2.4. Seasonal environmental aspect	10
2.5. Present status of investigations on hematological and biochemical parameters in fish species under study	11
3. Material and methods	12
3.1. Material	12
3.2. Methods	14
3.2.1. Determination of hematological parameters	15
3.2.2. Determination of biochemical parameters	16
3.2.3. Statistical evaluation	17
4. Results and discussion	18
4.1. Hematological parameters	18
4.2. Biochemical parameters	46
5. Conclusions	61
6. Literature	66
