

PAPERS

- 123 **Investigation of the influence of air gap thickness and eccentricity on the noise of the rotating electrical machine**
Donát M.
- 137 **Identification of parameters of cohesive elements for modeling of adhesively bonded joints of epoxy composites**
Kottner R., Hynek R., Kroupa T.
- 145 **Differential transform method to study free transverse vibration of monoclinic rectangular plates resting on Winkler foundation**
Kumar Y.
- 155 **Finite element based investigation of buckling and vibration behaviour of thin walled box beams**
Ramkumar K., Kang H.
- 183 **Active structural health monitoring of composite plates and sandwiches**
Sadílek P., Zemčík R., Bartošek J., Mandys T.
- 193 **Thermal analysis of isotropic plates using hyperbolic shear deformation theory**
Shinde B. M., Sayyad A. S., Kawade A. B.
- 205 **Torsional vibration analysis of shafts based on Adomian decomposition method**
Tabassian R.
- 223 **Determination of the transient vibrations of a rigid rotor attenuated by a semiactive magnetorheological damping device by means of computational modelling**
Zapoměl J., Ferfecki P., Kozánek J.
- 235 **Prediction of the nuclear fuel rod abrasion**
Zeman V., Hlaváč Z.
