

PAPERS

- 5 **Thermal analysis of both ventilated and full disc brake rotors with frictional heat generation**
Belhocine A., Cho C.-D., Nouby M., Yi Y. B., Abu Bakar A. R.
- 25 **A numerical study of planar discharge motion**
Benkhaldoun F., Fořt J., Hassouni K., Karel J., Trdlička D.
- 35 **Seismic response of nuclear fuel assembly**
Hlaváč Z., Zeman V.
- 47 **Optimization methodology for beam gauges of the bus body for weight reduction**
Jain R., Tandon P., Vasantha Kumar M.
- 63 **Using the Neumann series expansion for assembling Reduced Order Models**
Nasisi S., Valášek M., Vampola T.
- 75 **Influence of the mass of the weight on the dynamic response of the asymmetric laboratory fibre-driven mechanical system**
Polach P., Hajžman M., Šika Z., Červená O., Svatoš P.
- 91 **Dry friction damping couple at high frequencies**
Půst L., Pešek L., Košina J., Radolfová A.
- 101 **Development of aerodynamic bearing support for application in air cycle machines**
Šimek J., Lindovský P.
- 115 **Double pendulum contact problem**
Špička J., Hynčák L., Hajžman M.
- 129 **Application of the Monte Carlo method for investigation of dynamical parameters of rotors supported by magnetorheological squeeze film damping devices**
Zapoměl J., Ferfecki P., Kozánek J.
