

CONTENTS

Articles:

<i>Karel Segeth</i> : Professor Michal Křížek, Editor-in-Chief of Applications of Mathematics, is sixty	93
<i>Hans-Görg Roos, Martin Schopf</i> : Analysis of finite element methods on Bakhvalov-type meshes for linear convection-diffusion problems in 2D	97
<i>Wen Zhang, Jianwen Zhang</i> : Global existence of solutions for the 1-D radiative and reactive viscous gas dynamics	109
<i>Dalibor Pražák, Kumbakonam R. Rajagopal</i> : Mechanical oscillators described by a system of differential-algebraic equations	129
<i>Jamol I. Baltayev, Milan Kučera, Martin Váth</i> : A variational approach to bifurcation in reaction-diffusion systems with Signorini type boundary conditions	143
<i>Petra Kordulová</i> : Continuity of solutions of a quasilinear hyperbolic equation with hysteresis	167
