

CONTENTS

Articles:

<i>Vít Dolejší</i> : Prof. Miloslav Feistauer seventieth birthday celebration	489
<i>Douglas Bunker, Lixing Han, Shuhua Zhang</i> : A proximal ANLS algorithm for nonnegative tensor factorization with a periodic enhanced line search	493
<i>Yongfeng Wu, Andrew Rosalsky, Andrei Volodin</i> : Some mean convergence and complete convergence theorems for sequences of m -linearly negative quadrant dependent random variables	511
<i>Francesco Bigolin</i> : Regularity results for a class of obstacle problems in Heisenberg groups	531
<i>Robert Černý</i> : Generalized n -Laplacian: semilinear Neumann problem with the critical growth	555
<i>K. Maleknejad, M. Hadizadeh, M. Attary</i> : On the approximate solution of integro-differential equations arising in oscillating magnetic fields	595
