

## CONTENTS

### Articles:

<i>Torsten Linß</i> : A posteriori error estimation for arbitrary order FEM applied to singularly perturbed one-dimensional reaction-diffusion problems .....	241
<i>Sayyed Hashem Rasouli</i> : A population biological model with a singular nonlinearity	257
<i>Ioannis K. Argyros, Saïd Hilout</i> : Weaker convergence conditions for the secant method .....	265
<i>Baoqing Liu, Qikui Du</i> : Dirichlet-Neumann alternating algorithm for an exterior anisotropic quasilinear elliptic problem .....	285
<i>Anar Huseyin, Nesir Huseyin</i> : Dependence on the parameters of the set of trajectories of the control system described by a nonlinear Volterra integral equation .....	303
<i>Mehdi Ghasemi, Mojtaba Fardi, Reza Khoshsiar Ghaziani</i> : A new application of the homotopy analysis method in solving the fractional Volterra's population system .....	319
<i>Zhen Hai Liu, Qun Liu</i> : Persistence and extinction of a stochastic delay predator-prey model under regime switching .....	331
<i>Amin Esfahani</i> : Instability of the stationary solutions of generalized dissipative Boussinesq equation .....	345

### Book reviews:

<i>Gene H. Golub, Charles F. Van Loan</i> : Matrix Computations. 4th ed .....	359
