

## CONTENTS

### Articles:

<i>Kazuo Yamazaki</i> : On the global regularity of $N$ -dimensional generalized Boussinesq system .....	109
<i>Robert Eymard, Angela Handlovičová, Raphaële Herbin, Karol Mikula, Olga Stašová</i> : Applications of approximate gradient schemes for nonlinear parabolic equations .....	135
<i>Kenji Nakagawa</i> : Tail probability and singularity of Laplace-Stieltjes transform of a Pareto type random variable .....	157
<i>Abdelhamid Ainouz</i> : Homogenization of a dual-permeability problem in two-component media with imperfect contact .....	185
<i>Sung-Jin Yang, Jeong-Hoon Kim, Min-Ku Lee</i> : Portfolio optimization for pension plans under hybrid stochastic and local volatility .....	197

### Book reviews:

<i>A. C. Fischer-Cripps</i> : The Mathematics Companion – Mathematical Methods for Physicists and Engineers .....	217
