

## CONTENTS

### Articles:

|   |     |
|---|-----|
| <i>Vít Dolejší</i> : Anisotropic $hp$ -adaptive method based on interpolation error estimates in the $H^1$ -seminorm .....                              | 597 |
| <i>Roberto Castelli, Jean-Philippe Lessard, Jason D. Mireles James</i> : Analytic enclosure of the fundamental matrix solution .....                    | 617 |
| <i>Radim Hošek</i> : Face-to-face partition of 3D space with identical well-centered tetrahedra .....   | 637 |
| <i>Ravi Agarwal, Donal O'Regan, Snezhana Hristova</i> : Stability of Caputo fractional differential equations by Lyapunov functions .....               | 653 |
| <i>Josef Malík</i> : Torsional asymmetry in suspension bridge systems .....   | 677 |
| <i>Jing Chen, Xian Hua Tang</i> : Infinitely many solutions for boundary value problems arising from the fractional advection dispersion equation ..... | 703 |
