

## CONTENTS

### Articles:

<i>Viktor Beneš</i> : Editorial .....	359
<i>Dominique Jeulin</i> : Iterated Boolean random varieties and application to fracture statistics models .....	363
<i>Jiří Dvořák, Michaela Prokešová</i> : Asymptotic properties of the minimum contrast estimators for projections of inhomogeneous space-time shot-noise Cox processes .....	387
<i>Rafik Aramyan</i> : Zonoids with an equatorial characterization .....	413
<i>Jakub Večeřa</i> : Central limit theorem for Gibbsian U-statistics of facet processes ...	423
<i>Lothar Heinrich</i> : On the strong Brillinger-mixing property of $\alpha$ -determinantal point processes and some applications .....	443
<i>Kateřina Helisová, Jakub Staněk</i> : Quermass-interaction process with convex compact grains .....	463
<i>Ximo Gual-Arnau, Luis M. Cruz-Orive</i> : New rotational integrals in space forms, with an application to surface area estimation .....	489
<i>Jiří Kopecký, Tomáš Mrkvička</i> : On the Bayesian estimation for the stationary Neyman-Scott point processes .....	503
