

CONTENTS

1	INTRODUCTION	1
1.1	Approach and Objective	1
1.2	Background.....	2
1.3	Developing the Methods.....	2
1.4	Assumptions and Validity of the Method.....	3
1.4.1	Subject Specification.....	3
1.4.2	Process of Developing the Methods and Validity of Results	4
1.5	Advantages and Disadvantages of Carpentry Scarf Joint	6
2	DESIGN OF CARPENTRY SCARF JOINTS.....	7
2.1	Description of Mechanical Behaviour of Joints.....	7
2.1.1	General Principles	7
2.1.2	Joint Structural Model.....	8
2.2	Joint Design	9
2.2.1	General Design Principles	9
2.2.2	Overview of Joints and Their Suitable Use.....	13
3	PROCESS OF JOINT EXECUTION.....	27
3.1	Determination of Material Dimensions	27
3.1.1	Hewn Beam	27
3.1.2	Machine Processed Beam	28
3.2	Selecting Timber.....	29
3.3	Manufacture of Coupling Elements.....	29
3.4	Execution of the Scarf Joint.....	30
3.5	Measurement and Manufacture of Longitudinal Scarf Joint on Prosthesis	35
3.6	Joint Assembly	36
3.7	Mandatory Requirements Necessary for Proper Joint Performance.....	39
4	MAINTENANCE AND INSPECTION OF JOINT BEHAVIOUR.....	41
5	BIBLIOGRAPHY	43
6	PUBLICATIONS PRECEDING THE METHODS.....	45
	ANNEXES	49
A.	Examples of the method application.....	49
B.	Detailed design load bearing capacity charts.....	61
C.	Carpentry glossary.....	69
D.	Contacts	72
