### Research papers

<i>Thomas Friedrich</i> : Cocalibrated $G_2$ -manifolds with Ricci flat characteristic connection . . . . .	1
<i>Junchao Wei</i> : Almost Abelian rings . . . . .	15
<i>Bingqing Ma, Guangyue Huang</i> : Eigenvalue relationships between Laplacians of constant mean curvature hypersurfaces in $S^{n+1}$ . . . . .	31
<i>Johannes Schleisitz</i> : Diophantine Approximation and special Liouville numbers . . . . .	39
<i>Mileva Prvanović</i> : The conformal change of the metric of an almost Hermitian manifold applied to the antiholomorphic curvature tensor . . . . .	77
<b>Conference announcements</b> . . . . .	91
<b>Contents of previous Volumes</b> . . . . .	93
