

Contents

	Preface	viii
	Acknowledgments	x
Chapter 1	Geographic information systems and maps	1
	1.1 The map as an interface to GIS	1
	1.2 Geospatial data	3
	1.3 Geographic information systems	7
	1.4 Geospatial analysis operations	10
	1.5 The relation between GDI and cartography	15
	1.6 Maps and the World Wide Web	17
Chapter 2	Data acquisition	20
	2.1 The need to know acquisition methods	20
	2.2 Vector file characteristics	22
	2.3 Raster file characteristics	23
	2.4 Deriving data from existing maps	25
	2.5 Control and accuracy	29
Chapter 3	Map characteristics	33
	3.1 Maps are unique	33
	3.2 Definitions of cartography	34
	3.3 The cartographic communication process	38
	3.4 Map functions and map types	44
Chapter 4	GIS applications: which map to use?	46
	4.1 Maps and the nature of GIS applications	46
	4.2 Cadastre and utilities: use of large-scale maps	46
	4.3 Geospatial analysis in geography: use of small-scale maps	49
	4.4 Geospatial, thematic and temporal comparisons	52
	4.5 Working with digital data	56

Chapter 5	Topography	65
	5.1 Georeferencing	65
	5.2 Map projections	68
	5.3 Geometric transformations	73
	5.4 Generalization	75
	5.5 Relief	84
	5.6 Topographic data: mapping and charting organizations	91
Chapter 6	Map design	99
	6.1 Introduction	99
	6.2 Symbols to portray data related to points, lines, areas and volumes	100
	6.3 Graphic variables	101
	6.4 Text on the map	105
Chapter 7	Statistical mapping	109
	7.1 Statistical surveys	109
	7.2 Data analysis	110
	7.3 Data classification	116
	7.4 Cartographical data analysis	121
	7.5 Mapping methods	126
Chapter 8	Cartographic tools	143
	8.1 Introduction	143
	8.2 Management and documentation of spatial information	143
	8.3 Requirements for the cartographic component of GIS packages	144
	8.4 Desktop mapping	146
	8.5 Map production	147
Chapter 9	Atlases	152
	9.1 Introduction	152
	9.2 Paper atlases	153
	9.3 Electronic atlases	154
Chapter 10	Mapping time	160
	10.1 Introduction	160
	10.2 Mapping change	160
	10.3 Animation	162
	10.4 Dynamic variables	163

Chapter 11	Maps and the World Wide Web	168
	11.1 Web map design	168
	11.2 Web maps and multimedia	171
	11.3 Mapping cyberspace	173
Chapter 12	Geovisualization	175
Chapter 13	Cartography at work: maps as decision tools	180
	13.1 Again: why maps?	180
	13.2 Working with (web-based) electronic atlases	184
	13.3 At work with the Digital Chart of the World	185
	13.4 Maps, GIS and the need for rule-based cartography	187
	13.5 Copyright and liability	189
	13.6 Cartography, GIS and geospatial information policy	195
	References	198
