

Contents

1. Introduction to Statistics	4
2. Basic summarizing and graphing data	10
3. Descriptive statistics	15
3.1 Measures of location	15
3.2 Measures of variation	19
3.3 Exploratory data analysis	22
4. Theory of probability	28
4.1 Classical method (P. S. Laplace)	29
4.2 Statistical (empirical) approach (R. von Mises)	31
4.3 Basic rules	32
5. Selected probability distributions	36
5.1 Selected probability distribution models of discrete random variables	39
5.2 Selected probability distribution models of continuous random variables	41
6. Distribution of sample statistics	48
6.1 Sampling distribution of sample means	51
6.2 Sampling distributions of sample proportions	54
6.3 Sampling distributions of sample variances	56
7. Theory of estimation	60
7.1 Point estimate	60
7.2 Interval estimate	62
8. Hypothesis testing	74
8.1 One-sample tests	77
8.2 Two-sample tests	83
8.3 Comparison of three and more population means: ANOVA	95
