

# CONTENTS

---

Foreword	xxv
Preface	xxix
Acknowledgments	xxxv
<b>1 GIS, INTERNET GIS, AND DISTRIBUTED GISERVICES</b>	<b>1</b>
1.1 Impacts of the Internet on GIS / 2	
1.2 GIS Technology: From Centralized GISystems to Distributed GIServices / 5	
1.3 What Is Distributed GIS? / 10	
1.3.1 Distributed GIS Is an Integrated Client/Server Computing System / 12	
1.3.2 Distributed GIS Is a Web-Based Interactive System / 13	
1.3.3 Distributed GIS Is a Distributed and Dynamic System / 13	
1.3.4 Distributed GIS Is Cross-Platform and Interoperable / 14	
1.4 Why Do We Need Distributed GIS? / 15	
1.4.1 Uniqueness of Geographic Information on the Internet / 15	
1.4.2 Why Do We Need Distributed GIS? / 16	

- 1.4.2.1 Management Perspective / 17
- 1.4.2.2 User Perspective / 17
- 1.4.2.3 Implementation Perspective / 19
- 1.5 Basic Components of Distributed GIS / 20
  - 1.5.1 Basic Components of Internet GIS / 20
    - 1.5.1.1 The Client / 21
    - 1.5.1.2 Web Server and Application Server / 22
    - 1.5.1.3 Map Server / 22
    - 1.5.1.4 Data Server / 23
  - 1.5.2 Basic Components of Mobile GIS / 23
    - 1.5.2.1 Mobile Device Clients / 23
    - 1.5.2.2 Wireless Communication Networks / 24
    - 1.5.2.3 Gateway Services / 24
    - 1.5.2.4 Internet GIS Servers / 24
- 1.6 Applications of Distributed GIS / 25
  - 1.6.1 Data Sharing / 25
  - 1.6.2 Geospatial Information Disseminations / 26
  - 1.6.3 Online Data Processing / 26
  - 1.6.4 Location-Based Services / 29
  - 1.6.5 Distributed GIS and Intelligent Transportation Systems / 29
- 1.7 Where Do I Start? / 31
  - Web Resources / 33
  - References / 33

**2 NETWORKING FUNDAMENTALS OF INTERNET GIS 36**

- 2.1 Introduction to Network Environments / 37
  - 2.1.1 Internet GIS Application Scenario / 37
  - 2.1.2 Traditional GISystems Solution / 38
  - 2.1.3 Internet GIServices Solution / 38
  - 2.1.4 Network Environments / 40
- 2.2 Network Communication Models / 44
  - 2.2.1 OSI Model / 45
    - 2.2.1.1 Application Layer / 46
    - 2.2.1.2 Presentation Layer / 46
    - 2.2.1.3 Session Layer / 47
    - 2.2.1.4 Transport Layer / 47
    - 2.2.1.5 Network Layer / 47

- 2.2.1.6 Data Link Layer / 49
- 2.2.1.7 Physical Layer / 51
- 2.2.1.8 Relationships among OSI Model Layers / 51
- 2.2.2 TCP/IP Reference Model / 51
  - 2.2.2.1 Application Layer / 52
  - 2.2.2.2 Transport Layer / 53
  - 2.2.2.3 Internetwork Layer / 54
  - 2.2.2.4 Network Access Layer / 54
- 2.3 Protocols / 54
  - 2.3.1 Transmission Control Protocol / 56
  - 2.3.2 Internet Protocol / 56
  - 2.3.3 Network Setting / 59
- 2.4 Information Exchange Process between Two Computers / 60
- 2.5 Information Communications in LANs / 62
  - 2.5.1 LAN Architectures / 63
    - 2.5.1.1 Ethernet / 64
    - 2.5.1.2 Ethernet Performance and High-Speed Ethernet / 67
    - 2.5.1.3 Gigabit Ethernet / 68
    - 2.5.1.4 10 Gigabit Ethernet / 69
    - 2.5.1.5 Token Ring / 70
  - 2.5.2 Components of LANs / 73
  - 2.5.3 Wireless LANs / 73
    - 2.5.3.1 IEEE 802.11 Wireless LANs / 74
    - 2.5.3.2 HIPERLAN: High-Performance European Radio LAN / 74
    - 2.5.3.3 Bluetooth / 75
- 2.6 Information Communications in WANs / 75
  - 2.6.1 Circuit-Switched WANs / 77
    - 2.6.1.1 Analog Connectivity / 77
    - 2.6.1.2 Digital Connectivity / 80
    - 2.6.1.3 T-Carrier Service / 81
  - 2.6.2 Packet-Switched WANs / 82
    - 2.6.2.1 X.25 / 82
    - 2.6.2.2 Frame Relay / 82
    - 2.6.2.3 Asynchronous Transfer Mode / 83
    - 2.6.2.4 Fiber-Distributed Data Interface / 83
    - 2.6.2.5 Synchronous Optical Network / 84

- 4.3.5 XEROX Map Viewer Example / 174
- 4.3.6 Map Servers and Other Server-Side Applications / 175
- 4.4 Interactive Web Mapping / 176
  - 4.4.1 Interactive Viewers / 177
    - 4.4.1.1 DHTML Viewer / 178
    - 4.4.1.2 Plug-In Viewer / 179
    - 4.4.1.3 Java Applet Viewers / 180
    - 4.4.1.4 ActiveX Viewer / 183
  - 4.4.2 Server-Side CGI Extensions / 186
    - 4.4.2.1 Servlets / 186
    - 4.4.2.2 Active Server Page / 188
    - 4.4.2.3 ColdFusion / 188
- 4.5 OpenGIS WMS Implementation Interface Specifications / 189
  - 4.5.1 Background and Overview / 191
  - 4.5.2 WMS Architecture / 192
    - 4.5.2.1 WMS Specifications for the Picture Case / 194
    - 4.5.2.2 WMS Specifications for the Graphic Element Case / 198
    - 4.5.2.3 WMS Specifications for the Data Case / 201
  - Web Resources / 204
  - References / 205

**5 FRAMEWORK OF DISTRIBUTED GEOGRAPHIC INFORMATION SERVICES**

**207**

- 5.1 Introduction / 207
  - 5.1.1 Basic Requirements of Distributed GIS / 208
  - 5.1.2 Why We Need Distributed GIS / 209
  - 5.1.3 Components, Interfaces, and Services / 209
- 5.2 Basic Components and Service Requirements of Distributed GIS / 211
  - 5.2.1 What Are Distributed Components? / 211
  - 5.2.2 Basic Components of Distributed GIS / 212
- 5.3 Architecture Models of Distributed GIS / 214
  - 5.3.1 Distributed Web Mapping Architecture from OGC / 216
  - 5.3.2 Restricted Distributed GIS Framework / 218
  - 5.3.3 Open Distributed GIS Architecture / 220
- 5.4 Component Functions in a Distributed GIS Framework / 223
  - 5.4.1 Presentation Components / 223
  - 5.4.2 Logic Components / 224
    - 5.4.2.1 Web Server / 226

5.4.2.2	Map Server / 226	
5.4.2.3	Application (Middleware) Services / 227	
5.4.2.4	Spatial Reference Services / 229	
5.4.2.5	Catalog Services / 230	
5.4.3	Data Component / 230	
5.4.3.1	SQL Database Servers / 231	
5.4.3.2	Database Middleware / 234	
5.5	Dynamic Constructions of Distributed GIServices / 237	
5.5.1	Design of Dynamic GIServices Architecture / 237	
5.5.2	Flexible Thin- or Thick-Client Model in Distributed GIS Environment / 238	
5.5.3	Network Strategies for Constructing Dynamic GIServices / 241	
5.5.3.1	Two Scenarios for Distributed GIS Component Access / 243	
5.5.3.2	Two Scenarios for Distributed Geodata Object Access / 245	
5.5.4	An Implementation Example Using the CORBA/Java Model / 246	
5.6	Summary of Distributed GIS Architecture / 251	
	Web Resources / 254	
	References / 255	
<b>6</b>	<b>STANDARDS FOR DISTRIBUTED GISERVICES</b>	<b>257</b>
6.1	OpenGIS Specification / 257	
6.1.1	OpenGIS Abstract Specification / 259	
6.1.2	OpenGIS Implementation Specifications / 261	
6.1.3	OpenGIS Standard in Practice / 262	
6.1.3.1	Geodata Model / 262	
6.1.3.2	OpenGIS Services Architecture / 263	
6.1.3.3	Information Communities Model / 265	
6.2	The ISO/TC 211 and Its ISO Standards / 266	
6.2.1	ISO 19101: Reference Model / 271	
6.2.2	ISO Geospatial Data Model / 273	
6.2.3	ISO Standard in Practice / 274	
6.3	Comparison between OGC and ISO/TC 211 / 277	
6.4	Development of Geospatial Metadata Standards / 282	
6.4.1	Introduction to Geospatial Metadata and FGDC Metadata Standards / 282	
6.4.2	ISO Standard for GIS Metadata / 286	

- 6.4.3 Object-Oriented Metadata Framework / 289
  - 6.4.3.1 Design of Operational Metadata for Geodata Objects / 291
  - 6.4.3.2 Design of GIS Component Metadata / 292
- 6.5 Discussion / 294
  - Web Resources / 295
  - References / 295

**7 GEOGRAPHY MARKUP LANGUAGE 298**

- 7.1 Introduction: Problems of Spatial Information Discovery, Display, and Exchange over the Web / 298
  - 7.1.1 Problems / 299
    - 7.1.1.1 Spatial Information Discovery / 299
    - 7.1.1.2 Spatial Data Display on the Web / 299
    - 7.1.1.3 Data Integration and Exchange / 299
    - 7.1.1.4 Causes of the Problem / 299
  - 7.1.2 Limitations of HTML / 301
  - 7.1.3 Current and Potential Solutions / 305
    - 7.1.3.1 Standardized Metadata / 305
    - 7.1.3.2 XML Approach / 305
- 7.2 What Is GML? / 306
  - 7.2.1 GML Is a Means to Encode Geospatial Data / 306
  - 7.2.2 GML Is a Means to Transport Geospatial Data over the Web / 307
  - 7.2.3 GML Is a Means to Store Geospatial Data / 308
  - 7.2.4 GML Is NOT a Presentation Language for Data Display / 308
  - 7.2.5 GML Is NOT a Programming Language for Data Processing / 309
- 7.3 Characteristics of GML / 310
  - 7.3.1 Text-Based, Open, and Nonproprietary / 310
  - 7.3.2 Extensible Elements / 311
  - 7.3.3 Strict, Expandable, and Enforceable Hierarchy Structure / 311
  - 7.3.4 Separation of Structure from Presentation / 311
  - 7.3.5 Separation of Content from Relationships / 313
  - 7.3.6 Interoperable GML-Based Services / 314
- 7.4 Markup Basics of GML / 314

- 7.4.1 Basic Building Blocks: Elements, Attributes, and Values / 315
- 7.4.2 XML Declaration and Comments / 317
- 7.5 Simple Feature Data Model Used in GML / 317
- 7.6 Document-Type Definitions in GML 1.0 / 319
  - 7.6.1 Element Declarations / 320
  - 7.6.2 Attribute Declarations / 320
  - 7.6.3 Shortcomings of DTD / 321
- 7.7 GML Schemata in GML 2.0 / 321
  - 7.7.1 Element and Attribute Declarations in an XML Schema / 324
  - 7.7.2 Simple Element Types / 324
  - 7.7.3 Complex Element Types / 327
    - 7.7.3.1 Element-Only Type / 327
    - 7.7.3.2 Text-Only Elements / 328
    - 7.7.3.3 Empty Elements / 329
    - 7.7.3.4 Mixed Elements / 330
  - 7.7.4 Namespaces / 330
  - 7.7.5 Referencing to Different XML Schemata Using Namespace / 333
  - 7.7.6 Encoding Features without Geometry in GML 2.0 / 335
- 7.8 Geometry Schema in GML 2.0 / 337
  - 7.8.1 Encoding Coordinates / 338
  - 7.8.2 Geometry Elements / 339
  - 7.8.3 Primitive Geometry Elements / 340
  - 7.8.4 Geometry Collections / 345
  - 7.8.5 Encoding Features with Geometry / 347
- 7.9 XLink Schema in GML 2.0 / 349
  - 7.9.1 Basic Concepts in XLink / 350
  - 7.9.2 XLink Element Types and Attributes / 350
  - 7.9.3 Simple Links / 352
  - 7.9.4 Extended Links / 354
  - 7.9.5 Use XLink to Encode Feature Collections / 359
  - 7.9.6 Use XLink to Encode Feature Associations / 361
- 7.10 Making Use of GML Data on the Web / 364
  - 7.10.1 Making Vector Maps on the Web with GML Data / 365
  - 7.10.2 GML Web Applications / 368
  - 7.10.3 Extracting Features from GML Documents / 369

- 7.11 Summary: GML and Internet GIS / 372
- Web Resources / 374
- References / 374

**8 COMMERCIAL WEB MAPPING PROGRAMS 377**

- 8.1 Introduction / 377
- 8.2 ArcIMS from ESRI / 378
  - 8.2.1 Three-Tier Architecture Overview / 378
  - 8.2.2 ArcIMS Components in the Business Logic Tier / 381
    - 8.2.2.1 Web Servers / 382
    - 8.2.2.2 ArcIMS Application Server / 382
    - 8.2.2.3 ArcIMS Application Server Connectors / 383
    - 8.2.2.4 Additional Processes on the Server / 384
    - 8.2.2.5 ArcIMS Spatial Servers / 384
    - 8.2.2.6 ArcIMS Spatial Server Instances / 386
    - 8.2.2.7 Map Services / 386
    - 8.2.2.8 ArcIMS Virtual Servers / 387
    - 8.2.2.9 Assigning User Requests to Spatial Server Instances / 388
  - 8.2.3 ArcIMS Components: Data Sources / 389
  - 8.2.4 ArcIMS Components: Client Viewers / 392
    - 8.2.4.1 ArcIMS Standard Viewers / 392
    - 8.2.4.2 ArcIMS Custom-Built Viewers / 394
  - 8.2.5 ArcIMS Manager / 399
    - 8.2.5.1 ArcIMS Author / 399
    - 8.2.5.2 ArcIMS Designer / 399
    - 8.2.5.3 ArcIMS Administrator / 399
  - 8.2.6 ArcIMS Summary / 401
- 8.3 GeoMedia WebMap Professional from Intergraph / 403
  - 8.3.1 Architectural Overview of GeoMedia WebMap Professional / 403
  - 8.3.2 Viewer Clients for GeoMedia WebMap Professional / 404
  - 8.3.3 Server Components of GeoMedia WebMap Professional / 405
  - 8.3.4 Database Management Components / 407
  - 8.3.5 Communication Process of GeoMedia WebMap Professional / 409
  - 8.3.6 Creating a Web Application / 412
  - 8.3.7 Summary / 414

- 8.4 MapXtreme from MapInfo / 414
  - 8.4.1 MapXtreme Architecture / 414
  - 8.4.2 MapXtreme Java Components / 415
    - 8.4.2.1 Map Server: MapXtremeServlet / 415
    - 8.4.2.2 Map Server Client: MapJ Object / 416
    - 8.4.2.3 Map Rendering: Renderers / 416
    - 8.4.2.4 Data Connection: Data Providers / 417
    - 8.4.2.5 MapXtreme Communications: MapInfo Enterprise XML Protocol / 418
  - 8.4.3 MapXtreme Partitions / 419
    - 8.4.3.1 Thin Client: Three-Tier Configuration / 419
    - 8.4.3.2 Thick Client: Two-Tier Configuration / 421
    - 8.4.3.3 Medium Client: Two-Tier Hybrid Configuration / 422
  - 8.4.4 Enterprise Manager / 423
  - 8.4.5 Summary / 424
- 8.5 MapGuide from Autodesk / 425
  - 8.5.1 MapGuide Architecture Overview / 425
  - 8.5.2 MapGuide Components: Map-Authoring Components / 427
    - 8.5.2.1 Autodesk MapGuide Author / 427
    - 8.5.2.2 Dynamic Authoring Toolkit / 428
    - 8.5.2.3 SDF Loader / 429
    - 8.5.2.4 SDF Component Toolkit / 429
  - 8.5.3 MapGuide Components: Map-Viewing Components / 429
  - 8.5.4 MapGuide Components: Map-Serving Components / 430
    - 8.5.4.1 Web Server / 432
    - 8.5.4.2 Map Agents / 432
    - 8.5.4.3 Autodesk MapGuide Server / 434
    - 8.5.4.4 Autodesk MapGuide Server Administrator / 434
  - 8.5.5 MapGuide Components: Data Sources and Database Connections / 434
  - 8.5.6 MapGuide Application Development / 436
  - 8.5.7 How MapGuide Communicates / 437
  - 8.5.8 Summary / 438
- 8.6 Conclusion / 444
  - Web Resources / 445
  - References / 446

<b>9</b>	<b>MOBILE GIS</b>	<b>447</b>
9.1	Business Case for Mobile GIS / 448	
9.1.1	User Scenario / 449	
9.1.1.1	Traditional GIS Solution / 449	
9.1.1.2	Mobile GIS Solution / 450	
9.1.2	Mobile GIS for Field Work / 453	
9.1.3	Mobile GIS for Location-Based Services / 453	
9.2	Wireless Environment for Mobile GIS / 454	
9.2.1	Hand-Held Mobile Devices / 455	
9.2.2	Wireless Voice and Data Networks / 457	
9.2.2.1	Evolution of Cellular Networks / 458	
9.2.2.2	Basics of Cellular Networks / 459	
9.2.2.3	Data Transmission in PCSs (2G and 2½G) / 462	
9.2.2.4	Third-Generation Systems / 465	
9.2.3	Wireless Web / 467	
9.2.3.1	C-HTML / 468	
9.2.3.2	Web Clipping / 468	
9.2.3.3	MExE / 469	
9.2.3.4	HDML / 469	
9.2.3.5	WML / 469	
9.2.3.6	XHTML Mobile Profile Markup Language (XHTMLMP) / 470	
9.2.3.7	WAP / 470	
9.2.4	Operating Systems for Mobile GIS Applications / 470	
9.2.4.1	Palm OS / 470	
9.2.4.2	WinCE / 471	
9.3	General System Architecture of Mobile GIS / 472	
9.3.1	Major Components of Mobile GIS / 473	
9.3.1.1	Position-Determining Components / 473	
9.3.1.2	Location Information Components / 474	
9.3.1.3	Information Processing Service Components / 474	
9.3.1.4	Gateway Service Components / 476	
9.3.1.5	Wireless Network Components / 476	
9.3.1.6	Internet-Enabled Mobile Devices / 476	
9.3.2	Generic Architecture of Mobile GIS / 476	
9.4	Samples of Mobile GIS Programs / 480	

9.4.1	MapXtend from MapInfo / 480	
9.4.1.1	MapXtend Client / 481	
9.4.1.2	MapXtend Server / 482	
9.4.1.3	Databases Supported / 484	
9.4.1.4	Information Flow inside MapXtend / 484	
9.4.1.5	MapXtend Administrator / 485	
9.4.2	IntelliWhere LocationServer from Intergraph / 485	
9.4.2.1	Functions and Features of IntelliWhere LocationServer / 485	
9.4.2.2	Architecture and Main Components of IntelliWhere LocationServer / 486	
9.4.3	ArcPad from ESRI / 488	
9.4.4	OnSite from Autodesk / 490	
9.5	Applications of Mobile GIS / 492	
9.5.1	Mobile GIS Applications for Fieldwork / 493	
9.5.1.1	Field Data Collections and Validations / 493	
9.5.1.2	Incident Investigation and Site Analysis / 493	
9.5.1.3	Real-Time Work Order Management and Dispatch / 494	
9.5.1.4	Real-Time Responses to Customer Service Requests / 495	
9.5.2	Location-Based Services for Consumers / 495	
9.5.2.1	Location-Based Services for Vehicle Drivers / 495	
9.5.2.2	Tracking / 496	
9.5.2.3	Traffic Monitoring / 497	
9.5.2.4	Real-Time Bus Location Information Systems / 497	
	Web Resources / 498	
	References / 498	
<b>10</b>	<b>QUALITY OF SERVICE AND SECURITY ISSUES IN DISTRIBUTED GIS</b>	<b>500</b>
10.1	Introduction / 500	
10.2	Performance / 501	
10.2.1	What Is Performance? / 501	
10.2.2	Client Performance / 503	
10.2.3	Server Performance / 504	
10.2.4	Networking Performance / 505	

- 10.2.5 Overall System Performance / 507
- 10.3 Service Reliability / 510
  - 10.3.1 A Measure of Reliability: Availability / 510
  - 10.3.2 Increasing System Availability / 512
- 10.4 User Interactivity and Functionality Support / 512
- 10.5 Portability / 516
- 10.6 Security / 517
  - 10.6.1 Security Issues in the Server / 519
  - 10.6.2 Security Issues in the Client / 522
    - 10.6.2.1 Security Issues in Plug-Ins and ActiveX Controls / 523
    - 10.6.2.2 Security Issues in Java Applets / 524
    - 10.6.2.3 Privacy and Security Issues in Cookies / 525
  - 10.6.3 Security Issues in the Network: Eavesdropping / 526
    - 10.6.3.1 Private Key Encryption / 527
    - 10.6.3.2 Public Key Encryption / 527
  - 10.6.4 Implementation of Countermeasures / 528
- 10.7 Conclusion / 530
  - Web Resources / 532
  - References / 532

**11 DISTRIBUTED GIS IN DATA WAREHOUSING AND DATA SHARING 534**

- 11.1 Introduction / 534
- 11.2 Accessing Geospatial Data over the Internet: Browsing or Searching / 535
  - 11.2.1 Index and Catalog Geospatial Information / 537
  - 11.2.2 Metadata Catalog Services / 537
  - 11.2.3 Efficient Search Mechanism / 538
  - 11.2.4 Geospatial Data Transfer and Distributions / 539
  - 11.2.5 Data Discovery Client / 539
- 11.3 National and Global Spatial Data Infrastructure / 541
  - 11.3.1 Geospatial Data Clearinghouse Activity / 542
  - 11.3.2 Framework of GDCA / 544
    - 11.3.2.1 Metadata Requirements in GDCA / 544
    - 11.3.2.2 GDCA Search Engine: Z39.50 / 545
    - 11.3.2.3 Architecture of GDCA / 545
    - 11.3.2.4 User Interface of GDCA / 549
    - 11.3.2.5 Limitations of GDCA / 550

- 11.4 Geography Network and g.net / 551
- 11.5 Samples of Other Geospatial Data Providers / 553
  - 11.5.1 U.S. National Imagery and Mapping Agency (NIMA) / 553
  - 11.5.2 NASA'S Terra Sensors Data Services / 556
  - 11.5.3 Data Services at NASA's Distributed Active Archive Centers (DAACs) / 557
  - 11.5.4 USGS Earth Resources Observation Systems (EROS) Data Center / 558
  - 11.5.5 TerraServer / 558
  - 11.5.6 Space Imaging / 560
  - 11.5.7 American FactFinder: U.S. Census Bureau / 560
- 11.6 Conclusions and Summary / 562
  - Web Resources / 563
  - References / 564

## **12 INTERNET GIS APPLICATIONS IN INTELLIGENT TRANSPORTATION SYSTEMS**

**565**

- 12.1 Introduction / 565
- 12.2 Review of Transportation Information on the Internet / 566
- 12.3 Examples of Internet GIS for Transportation Information Dissemination / 572
  - 12.3.1 Static Map Service (Level B1 Service) / 572
  - 12.3.2 Location Maps and Driving Directions (Level C1 Service) / 574
  - 12.3.3 Real-Time Transportation Information Systems (Level D1 Service) / 574
  - 12.3.4 Decision-Supporting Trip-Planning Systems (Level D2 Service) / 576
  - 12.3.5 Traveler Planning with Infopolis 2 (Level D2 Service) / 577
    - 12.3.5.1 Purpose of Internet GIS / 578
    - 12.3.5.2 Data Sources / 578
    - 12.3.5.3 System Operations / 578
- 12.4 Architecture of Distributed Transit Information System / 580
  - 12.4.1 System Components and Implementation / 581
  - 12.4.2 User Interface Design / 581
  - 12.4.3 Map Server Function Design / 582
  - 12.4.4 Data and Database Management Systems / 583
  - 12.4.5 Network Analysis Component / 584

- 12.5 Development of Transit Path-Finding Algorithms / 586
  - 12.5.1 Schedule-Based Path-Finding Algorithm for Transit Networks / 587
- 12.6 Object-Oriented Dynamic Transit Network Model / 591
- 12.7 Conclusions / 595
- Web Resources / 595
- References / 595

**13 INTERNET GIS APPLICATIONS IN PLANNING AND RESOURCE MANAGEMENT 599**

- 13.1 Introduction / 599
- 13.2 Case Studies in Infrastructure Planning and Management / 600
  - 13.2.1 Case Study 1: Facilities Planning for New York State Office of Mental Health (OHM) / 600
  - 13.2.2 Case Study 2: Asset Management and Transportation Network Planning with Road Management Information System (ARMIS) GIS, Queensland, Australia / 601
  - 13.2.3 Case Study 3: Transportation, Utility, and Strategic Planning with Property Land Use System (PLUS), Queensland Rail, Queensland, Australia / 603
  - 13.2.4 Case Study 4: Utilities Planning with Pennsylvania One Call System (POCS) / 605
- 13.3 Case Studies in Emergency Planning / 606
  - 13.3.1 Case Study 5: Emergency Planning with Military Software, Utah Olympic Public Safety Command, Salt Lake City / 606
  - 13.3.2 Case Study 6: Evacuation Planning with Hurricane Evacuation Decision Support Solution, South Carolina Department of Transportation (SCDOT) and Emergency Preparedness Division (EPD) / 608
- 13.4 Case Studies in Community Planning / 609
  - 13.4.1 Case Study 7: Economic Development with Vallejo Economic Development Information System (VEDIS), Vallejo, California / 609
  - 13.4.2 Case Study 8: Community Development with Enterprise Geographic Information System (EGIS), U.S. Department of Housing and Urban Development (HUD) / 611
  - 13.4.3 Case Study 9: Land Use Planning and Environmental Impact Assessment with Historical Maps, David Rumsey Collection, San Francisco, California / 614

- 13.4.4 Case Study 10: Community Development Planning with Smart Permits Using Sunnyvale Geographic Information System (SunGIS™) in Sunnyvale, California / 618
- 13.4.5 Case Study 11: Property Assessment with MapMilwaukee in Milwaukee, Wisconsin / 622
- 13.4.6 Case Study 12: Work-in-Progress for Neighborhood Planning for Tampa, Florida / 624
- 13.5 Conclusion / 626
- Web Resources / 628
- References / 628

## **14 CONCLUSIONS AND EPILOGUE**

**629**

- 14.1 Overview / 629
- 14.2 Future Impact / 630
  - 14.2.1 Future Impact on the GIS Industry / 630
  - 14.2.2 Future Impact on Geographers / 633
  - 14.2.3 Future Impact on the Public / 635
    - 14.2.3.1 Positive Aspects / 635
    - 14.2.3.2 Negative Impact / 636
- 14.3 Vision of Future Distributed GIS / 638
  - 14.3.1 What Are GIS Web Services? / 640
  - 14.3.2 Putting Web Services Together: Web Services Architecture / 642
- 14.4 Alternative Futures / 646
  - 14.4.1 First Path: Centralized GISystems / 647
  - 14.4.2 Second Path: Private, Vendor-Specialized GIServices / 648
- 14.5 Conclusion / 650
  - Web Resources / 653
  - References / 653
