

Advance praise for *Sustainability and Cities*:

"Newman and Kenworthy have produced a masterful and compelling account of how 21st century cities can reclaim the economic and social virtues that have drawn people out of the wilderness for millennia. This book belongs on every elected municipal official's desk. And with luck, it will motivate the creative energies of the citizens who can put it there."

—Anthony Perl, Director, Research Unit for Public Policy Studies, University of Calgary

"Peter Newman and Jeffrey Kenworthy have been at the forefront of those showing us the dire consequences of our auto-dependent sprawling way of life. With this new book, they are showing us a way out of our bind, just as the world is waking up to the problems of global sprawl."

—Hank Dittmar, Surface Transportation Policy Project

Sustainability and Cities examines the urban aspect of sustainability issues, arguing that cities are a necessary focus for that global agenda. The authors make the case that the essential character of a city's land use results from how it manages its transportation, and that only by reducing our automobile dependence will we be able to successfully accommodate all elements of the sustainability agenda. The book will serve as a source of both learning and inspiration for those seeking to create more sustainable cities and is an important work for practitioners, researchers, and students in the fields of planning, geography, and public policy.

Peter Newman is associate professor of city policy at Murdoch University in Perth, Australia, and visiting professor of city and regional planning at the University of Pennsylvania.

Jeffrey Kenworthy is senior lecturer in urban environments at Murdoch University and is visiting professor at the University of Colorado in Boulder.

Contents

Preface xiii

Acknowledgments xvii

Chapter 1 The Concept of Sustainability and Its Relationship to Cities 1

The Concept of Sustainability 1

Global Government Responses to Sustainability 5

Application of Sustainability Principles to Cities 6

City Size and Sustainability 14

Indicators of Sustainability in Cities 18

Sustainability Plans 20

Conclusions 23

Chapter 2 The Problem of Automobile Dependence at the End of the Twentieth Century 27

What Shapes Cities? 27

Constraints on Automobile-dependent Cities 40

New Economic Awareness of the Auto City 52

The End of Auto Cities? 59

The Global Auto City Protest Movement 60

Institutionalized Automobile Dependence 62

Conclusions 64

Chapter 3 The Pattern of Automobile Dependence and Global Cities 68

Introduction 68

Transportation Energy Patterns 69

Fuel Types 72

Technology-Vehicle Efficiency 74

Price and Income 78

Infrastructure Priorities 81

Urban Form 94

Transportation and Land Use Trends 104

Car Use and Wealth 111

Conclusions 125

Chapter 4	A Vision of Reduced Automobile Dependence	128
	Introduction	128
	Dispelling the Myths About Automobile Dependence	128
	Approaches to Reducing Automobile Dependence	141
	Techniques for Overcoming Automobile Dependence	144
	The Future "Sustainable" City	184
	Case Studies in Overcoming Automobile Dependence	191
	Conclusions	237
Chapter 5	Greening the Automobile-dependent City	240
	Introduction	240
	Sustainability and the Urban Water System	241
	Greening the City with Parks and Agriculture	250
	Is the Green City in Conflict with the Low-energy City?	257
	Urban Ecology Innovation	264
	Conclusions	281
Chapter 6	Promoting Sustainable Urban Change	285
	Urban Change	285
	Modernist Professional Praxis	286
	Postmodernism	288
	Postmodernism and Cities	288
	The Organic City Movement	289
	Greening the Industrial Revolution City	290
	The Organic City Family Tree	291
	The Sustainable City Movement Today	291
	Professional Praxis at a Time of Paradigm Change	292
	New Principles for Professional Praxis	293
	Conclusions	304
Chapter 7	Ethics, Spirituality, and Community in the Sustainable City	306
	Introduction	306
	Ethical Foundations for City Sustainability	306
	City Planning and City Prophecy in the Late Twentieth Century	315
	The Role of Community Groups in City Sustainability	320
	Conclusions	330
Chapter 8	Summary and Conclusions	333

Appendix 1: Data and Methodology for the Thirty-seven-city Study for the World Bank	343
Appendix 2: Growth Management Approaches and Guidelines	360
Appendix 3: A Checklist for City Sustainability Using Economic Efficiency, Social Equity, Environmental Responsibility, and Human Livability Criteria	367
Appendix 4: An Economic Impact Statement for Urban Development	374
Appendix 5: Guidelines for New Urbanism Developments (The Ahwahnee Principles)	385
Appendix 6: A Guide to the Provision of Better Transit and Land Use Integration in Auto Cities	388
