

FOCUS ISSUE PAPERS

- S107 In pursuit of a fit-for-purpose uncertainty guide**
D R White
- S125 On challenges in the uncertainty evaluation for time-dependent measurements**
S Eichstädt, V Wilkens, A Dienstfrey, P Hale, B Hughes and C Jarvis
- S136 Traceable dynamic calibration of force transducers by primary means**
Nicholas Vlajic and Ako Chijioke

PAPERS

- 1012 Calibration of a system for measuring low air flow velocity in a wind tunnel**
Andrzej Krach and Janusz Kruczkowski
- 1024 Consistency analysis of multidimensional gonio-spectrophotometric measurements in interlaboratory comparisons**
A Ferrero, J Campos, B Bernad, A Pons, M L Hernanz, F M Martínez-Verdú and A Höpe
- 1031 SI-traceable determination of the spring constant of a soft cantilever using the nanonewton force facility based on electrostatic methods**
V Nesterov, O Belai, D Nies, S Buetefisch, M Mueller, T Ahbe, D Naparty, R Popadic and H Wolff
- 1045 Josephson-based full digital bridge for high-accuracy impedance comparisons**
Frédéric Overney, Nathan E Flowers-Jacobs, Blaise Jeanneret, Alain Rufenacht, Anna E Fox, Jason M Underwood, Andrew D Koffman and Samuel P Benz
- 1054 Simplified fundamental force and mass measurements**
I A Robinson
- 1061 Uncertainty analysis of gas flow measurements using clearance-sealed piston provers in the range from 0.0012 g min⁻¹ to 60 g min⁻¹**
G Bobovnik, J Kutin and I Bajsić
- 1069 Evaluation of cross-connected waveguides as transfer standards of transmission at high millimetre-wave frequencies**
Nick Ridler, Roland Clarke, Hui Huang and Sherko Zinal
- 1079 Uncertainty of empirical correlation equations**
R Feistel, J W Lovell-Smith, P Saunders and S Seitz
- 1091 Reference data sets for testing metrology software**
G J P Kok, P M Harris, I M Smith and A B Forbes
- 1101 Liquidus slopes of impurities in ITS-90 fixed points from the mercury point to the copper point in the low concentration limit**
Jonathan V Pearce, John A Gisby and Peter P M Steur
- 1115 Comparison at the sub-100 fW optical power level of calibrating a single-photon detector using a high-sensitive, low-noise silicon photodiode and the double attenuator technique**
G Porrovecchio, M Šmid, M López, H Hofer, B Rodiek and S Kück
- 1123 Optical to microwave clock frequency ratios with a nearly continuous strontium optical lattice clock**
Jérôme Lodewyck, Sławomir Bilicki, Eva Bookjans, Jean-Luc Robyr, Chunyan Shi, Grégoire Vallet, Rodolphe Le Targat, Daniele Nicolodi, Yann Le Coq, Jocelyne Guéna, Michel Abgrall, Peter Rosenbusch and Sébastien Bize
