

CONTENTS

Preface	185
EDWARDS S.V., SHULTZ A.J., CAMPBELL-STATON S.C. Next-generation sequencing and the expanding domain of phylogeography	187
PETERSON A.T., ANAMZA T. Ecological niches and present and historical geographic distributions of species: a 15-year review of frameworks, results, pitfalls, and promises	207
GALBREATH K.E., HOBERG E.P. Host responses to cycles of climate change shape parasite diversity across North America's Intermountain West	218
SMYTH J.F., PATTEN M.A., PRUETT C.L. The evolutionary ecology of a species ring: a test of alternative models...	233
ORNELAS J.F., GONZÁLEZ DE LEÓN S., GONZÁLEZ C., LICONA-VERA Y., ORTIZ-RODRIGUEZ A.E., RODRÍGUEZ-GÓMEZ F. Comparative palaeodistribution of eight hummingbird species reveal a link between genetic diversity and Quaternary habitat and climate stability in Mexico	245
FAHEY A.L., RICKLEFS R.E., DEWOODY J.A. Historical demography of bird populations from Hispaniola assessed by nuclear and mitochondrial gene sequences	259
SAVIT A.Z., BATES J.M. Right around the Amazon: the origin of the circum-Amazonian distribution in <i>Tangara cayana</i>	273
PERKTAŞ U., GÜR H., ADA E. Historical demography of the Eurasian green woodpecker: integrating phylogeography and ecological niche modelling to test glacial refugia hypothesis	284
Book Review	296, 299
