

GEOGRAPHIES OF DEVELOPMENT

AN INTRODUCTION TO DEVELOPMENT STUDIES THIRD EDITION

ROBERT B. POTTER, TONY BINNS, JENNIFER A. ELLIOTT, DAVID SMITH

'... a tour de force, at once comprehensive, authoritative, accessible and impressively up-to-date. As a broad and balanced introduction for students, teachers and others concerned to understand the major issues in development, it would be difficult to beat and is to be highly recommended. Going far beyond the bounds of geography it covers the range of relevant disciplines as only geographers can. It is much more than a textbook. It is a treasure house of information and insight concerning contemporary issues in development.'

Professor Robert Chambers, Institute of Development Studies, University of Sussex

'... an excellent course book for both undergraduates and graduates, and well-endowed with teaching and learning techniques. ... It has high ambitions in scope and depth and fulfils them handsomely. As a course text, it must dominate the field.'

Professor Piers Blaikie, Emeritus Professor, School of Development Studies, University of East Anglia

'*Geographies of Development: An Introduction to Development Studies...* reflects its intended interdisciplinary appeal, while remaining faithful to its explication of spatial imperatives and impresses of often complex processes. The authors provide carefully balanced and accessible surveys of the respective terrains, conceptual and empirical, highlighting areas of consensus and dissention. The scope of coverage is impressive.'

Professor David Simon, Department of Geography, Royal Holloway, University of London

Geographies of Development: An Introduction to Development Studies, Third Edition, remains a core, balanced and comprehensive introductory textbook for students of Development Studies, Development Geography and related fields. Its holistic approach encourages critical engagement by integrating theory alongside practice and related key topics throughout the text. It demonstrates informatively that ideas concerning development have been many and varied and highly contested – varying from time to time and from place to place.

New to this Third Edition

- Improved colour layout and organisation improves access to key concepts, topics and themes.
- New in-chapter features – Key Ideas and Key Thinkers, Critical Reflections, plus Case Studies and Key Points – all encourage critical engagement with material from both scholarly and popular sources.
- A concluding account that examines development studies in its wider interdisciplinary context.
- Extended coverage of pressing subjects such as the nature and definition of development, progress with the Millennium Development Goals, new approaches to development theory, alternative development, post-colonialism, anti-globalisation and anti-development, poverty reduction strategies, the changing digital divide, global industrial change, migration and transnationalism, food miles and re-localisation, global warming and water resources management.
- Fully updated throughout to reflect the most recent developments.
- Richly illustrated with new diagrams, graphs, photographs and tables.

Robert B. Potter is Professor of Human Geography at the University of Reading. Tony Binns is Professor of Geography at the University of Otago, New Zealand. Jennifer A. Elliott is Principal Lecturer in Geography at the University of Brighton. The late David Smith was Professor of Economic Geography at the University of Liverpool. All the authors have considerable teaching and research experience in this area.

Contents

List of boxes	ix
List of case studies	x
List of key ideas	xi
List of key thinkers	xii
List of critical reflections	xiii
Preface to the Third Edition	xiv
Guided tour	xvi
Acknowledgements	xviii
Introduction	xxv

Part I Conceptualising development: meanings of development

1 Questioning development 3

Introduction: from 'development' to 'anti-development'	3
The meaning of the word 'development'	4
Thinking about development	6
Critiques of development: Eurocentrism, populist stances, anti-development and postmodernity	12
Spatialising development: the Third World/Developing World/Global South/Poor Countries	22
Rich and poor worlds: relative poverty and inequalities at the global scale	32
Concluding issues: geography, development and 'distant others'	44
Key points	45
Further reading	45
Websites	46
Discussion topics	46

2 Understanding colonialism 47

Introduction: colonialism and imperialism	47
Phases of colonialism	56
Legacies of colonialism	71
Key points	77

Further reading	78
Websites	78
Discussion topics	78

3 Theories and strategies of development 79

Introduction	79
Theories, strategies and ideologies of development	80
Classical-traditional approaches: early views from the developed world	83
Historical approaches: empirical perspectives on change and development	96
Radical dependency approaches: the Third World answers back?	106
Alternative, bottom-up and participatory approaches: perspectives on 'another' development	114
Development theory, modernity and postmodernity	121
Key points	126
Further reading	126
Websites	126
Discussion topics	126

4 Globalisation, development and underdevelopment 127

Defining globalisation	128
Globalisation and development: 'for and against'/'solution or problem'?	128
Global transformations: a shrinking world or a more unequal world?	133
Globalisation and the information society: the digital divide and an unequal world	140
Economic aspects of globalisation: industrialisation, TNCs, world cities and global shifts	145
Economic change and global divergence	160
Global convergence: perspectives on cultural globalisation	160
Global convergence and divergence: patterns of hierarchic and non-hierarchic change – a summary	164

- Political aspects of globalisation: the anti-globalisation and anti-capitalist movements 166
- Concluding comments: globalisation and unequal development 178
- Key points 180
- Further reading 180
- Websites 180
- Discussion topics 180

Part II Development in practice: components of development

5 People in the development process 183

- Introduction: putting people at the centre of development 183
- Population and resources: a demographic time bomb? 184
- Where do the world's people live? 186
- Counting the people 188
- Population change 188
- Understanding population statistics 192
- The demographic transition 192
- Population policies 194
- Population structure 196
- Ageing populations 198
- Quality of life 202
- Conclusion 225
- Key points 226
- Further reading 226
- Websites 227
- Discussion topics 227

6 Resources and the environment 229

- Introduction: the search for sustainable development 229
- Resources and development 231
- Water resources in development: where will new sources come from? 234
- Energy resource developments: the search for equity and efficiency 239
- Mineral resources: curse or cure for development? 242
- Resource constraints and the development process 244
- Environmental impacts of development 249
- Conclusion: towards sustainable resource management 272

- Key points 273
- Further reading 273
- Websites 274
- Discussion topics 274

7 Institutions of development 275

- Introduction 275
- The rise of global governance 278
- The role of the state 312
- Civil society, NGOs and development 316
- Conclusion 322
- Key points 323
- Further reading 324
- Websites 324
- Discussion topics 324

Part III Spaces of development: places and development

8 Movements and flows 327

- Introduction: unravelling complexities 328
- Movements and flows in the 'real world': growing coffee for export 328
- People on the move 331
- Communications and transport 344
- North and South: an interdependent world 346
- World trade: the changing scene 351
- Developing countries and the debt crisis 369
- Conclusion 377
- Key points 378
- Further reading 378
- Websites 378
- Discussion topics 379

9 Urban spaces 381

- Urbanisation and development: an overview 382
- Urbanisation in the contemporary developing world 384
- Causes and consequences of rapid urbanisation in the Third World 391
- City systems and development: questions of urban primacy, regional inequalities and unequal development 395
- Urban and regional planning in Third World countries 400
- Rural–urban interrelations in developing countries 405

Contents

- Inside Third World cities 415
 - Final comments: urban management for sustainable urbanisation 439
 - Key points 441
 - Further reading 441
 - Websites 441
 - Discussion topics 441

- 10 Rural spaces 443
 - Introduction 443
 - Rural spaces in development thinking 444
 - 'Old' and 'new' challenges in rural development 445
 - Agrarian structures and landholding in rural areas 450
 - Livelihood systems in rural areas 456
 - Approaches to agricultural and rural development 472
 - A new paradigm in rural development? 483
 - Conclusion 488
 - Key points 489
 - Further reading 489
 - Websites 490
 - Discussion topics 490

- Conclusion 491
- Bibliography 495
- Index 535
