About author .....	4
Introduction .....	5
<b>1 Finite-element analysis of transversally non-homogenous micro- and millimeter-wave transmission lines .....</b>	<b>7</b>
1.1 Vector basis functions .....	7
1.2 Functional and its minimization .....	7
1.3 Solution of the matrix equation .....	8
1.4 Conclusions .....	9
<b>2 Quality of the finite-element mesh .....</b>	<b>10</b>
2.1 The reaction concept .....	10
2.2 Mesh optimization based on the Non-Linear Random Search Algorithm .....	11
2.3 Conclusions .....	13
<b>3 Finite-element complex-hopping method .....</b>	<b>14</b>
3.1 Complex propagation constant hopping .....	14
3.2 Conclusions .....	15
<b>4 Finite-element analysis of open structures .....</b>	<b>16</b>
4.1 A real spatial mapping interpreted as a PML .....	16
4.2 Conclusions .....	17
<b>5 Conclusion .....</b>	<b>18</b>
<b>Alphabetical list of principal references .....</b>	<b>19</b>
<b>Czech Abstract .....</b>	<b>20</b>
