

Contents

1. Diseases Affecting Mainly the Brain and its Coverings	1
Congenital and Perinatally Acquired Lesions of the Brain	1
Cerebral Palsy (Cerebral Movement Disturbances, Psychomotor Retardation)	1
Malformation of the Brain Due to Developmental Disturbances	3
Absence or Defective Development of Individual Parts of the Brain	3
Microcephaly	10
Meningoencephalocele	10
Phakomatoses	11
Intrauterine Affections Involving the Brain	12
Cerebral Disturbances Due to Birth Trauma	14
Icterus Gravis Neonatorum	14
Hydrocephalus	15
Craniostenosis	20
Anomalies of the Craniovertebral Junction	20
Craniocerebral Trauma	21
Case History and Physical Findings in the Head Injured	21
Cerebral Concussion	22
Cerebral Contusion and Penetrating Brain Injuries	23
Posttraumatic Complications and Late Effects	25
Intracranial Hematoma	25
Raised Intracranial Pressure and Brain Tumors	29
Signs of Raised Intracranial Pressure and Benign Intracranial Hypertension	29
Brain Tumors	31
General Symptoms and Signs of Brain Tumors	31
Individual Brain Tumors	33
Differential Diagnosis of Brain Tumors	38
Inflammatory Diseases of the Brain and its Coverings	40
Meningitides	40
Acute Purulent Meningitis	44

“Aseptic” or Lymphocytic (Serous) Meningitis	45
Chronic Meningitis	48
Encephalitides	48
Viral Encephalitides	49
Fungal Meningoencephalitides	52
Protozoal Brain Diseases	53
Bacterial Brain Diseases	54
Encephalopathies Caused by Immune Reaction	54
Syphilis of the Central Nervous System	55
General Aspects and Terminology of Neurosyphilis	55
Serologic Diagnosis of Syphilis	56
Cerebrospinal Syphilis	56
Tabes Dorsalis	57
General Paresis	58
Brain Abscess	60
Epidural Abscess and Subdural Empyema	61

Circulatory Disturbances and Hemorrhages of the Brain and its Coverings

Circulatory Disturbances and Hemorrhages of the Brain and its Coverings	62
Physiologic and Anatomic Aspects of the Cerebral Circulation	62
Clinical and Etiologic Aspects of Cerebrovascular Accidents	65
Acute Disturbances of Perfusion of the Cerebral Hemispheres	67
Features of a Cerebral Hemispheric Insult	68
Examination of the Unconscious Patient	69
Cerebral Embolism	69
Prognosis of Vascular Accidents in the Cerebral Hemispheres	70
Intermittent Disturbances of Perfusion of the Cerebral Hemispheres (Transient Ischemic Attacks)	70
Lesions of the Cervical Portion of the Internal Carotid Artery	71
Occlusion or Stenosis of the Intracranial Carotid Artery	72
Stenotic Lesions of the Internal Carotid Artery Proximal to its Ophthalmic Branch	72
Dissecting Aneurysm of the Internal Carotid Artery	73
Acute Disturbances of Perfusion in the Brainstem and Cerebellar Region (Vertebrobasilar Territory)	73
Anatomy	73
Classic Brainstem Insult	73
Specific Syndromes	77
Intermittent Insufficiency of Vertebrobasilar Perfusion	79
Transient Global Amnesia	80
Treatment of Disturbances of Cerebral Perfusion	81
Intracerebral Hemorrhage	83
Lesions in the Cerebral Hemispheres	83
Spontaneous Cerebellar Hemorrhage (Cerebellar Apoplexy)	84

Vascular Encephalopathies	84
Hypertensive Encephalopathy	84
Generalized Cerebral Arteriosclerosis	85
Subcortical Encephalopathy (Binswanger's Disease)	85
Thromboangiitis Obliterans (Buerger's Disease)	85
Multi-Infarct Dementia	85
Pseudobulbar Palsy	85
Coma and Other Effects of Acute Anoxic Cerebral Damage	86
Brain Death	89
The Apallic Syndrome	89
Akinetic Mutism	89
Locked-In Syndrome	89
Alpha Coma	90
Klüver-Bucy Syndrome	90
Acute Subarachnoid Hemorrhage (SAH)	90
Aneurysms of (Basal) Cerebral Arteries	91
Arteriovenous Malformations	95
Arteriovenous Fistula of the Cavernous Sinus	97
Cavernomas (Cavernous Angiomas)	97
Cerebral Venous Thrombosis	97
Extrapyramidal Syndromes	98
Classification of Extrapyramidal Syndromes	100
The Parkinsonian Syndrome	100
Chorea	114
Athetoses	120
Hemiballismus and Ballismus	122
Dystonic Syndromes	122
Torsion Dystonias	123
Spastic Torticollis	124
Localized Dystonic Syndromes	125
Other Extrapyramidal Diseases	126
Essential Tremor	126
Organic Tics	127
Myoclonias	127
Myorhythmias	127
Other Forms	128
Cerebellar Syndromes	128
Clinical Aspects of Some Cerebellar Disorders	134
Acute Cerebellar Ataxia of Childhood	134
Intoxications with Cerebellar Signs	134
Cerebellar Heredoataxias of Known Etiopathogenesis	134
Cerebellar Heredoataxias of Unknown Etiopathogenesis	135

Systemic Nonheritable Cerebellar Affections	136
Other Cerebellar Syndromes	137
Metabolic Disorders Involving the Brain	137
Disturbances of Lipid Metabolism	138
Gaucher's Disease	138
Angiokeratoma Corporis Diffusum	138
Gangliosidoses	138
Niemann-Pick Disease	139
Heredopathia Atactica Polyneuritiformis (Refsum's Disease)	139
A-Lipoproteinemias	140
Disturbances of Protein and Urea Metabolism	140
Pyruvic Acid (Phenylpyruvic) Oligophrenia	140
Maple Syrup Urine Disease	140
Hartnup Disease	140
Encephalopathy with Fatty Infiltration of Viscera (Reye's Syndrome)	141
Disturbances of Carbohydrate Metabolism	141
Gargoyle Group	141
Glycogenoses	141
Intermittent Disturbances of Glucose Metabolism	141
Leukodystrophies, Including Those Still Unexplained, and Other Metabolic Diseases	143
Metachromatic Leukodystrophy	143
Alexander's Disease	143
Globoid Cell Leukodystrophy (Krabbe's Disease)	143
Degenerative Diffuse Sclerosis of the Neutral Fat Type	143
Pelizaeus-Merzbacher Disease (Chronic Infantile Cerebral Sclerosis)	143
Batten-Kufs Disease	144
Adrenoleukodystrophy	144
Diffuse Cerebral Sclerosis (Schilder) (Diffuse Periaxial Encephalitis)	144
Disturbances of Copper Metabolism	144
Hepatolenticular Degeneration (Wilson's Disease, Westphal-Strümpell Pseudosclerosis)	145
Other Hereditary Disturbances of Copper Metabolism	146
Other Generalized Diseases with Neurologic Symptomatology	147
Intoxications with Central Nervous Symptomatology	147
Metals	147
Organic Solvents and Other Industrial Products	149
Drugs	149
Alcohol	152

Other Addictions	153
Nerve Poisons	153
Endocrine Disturbances with Neurologic Signs and Symptoms	154
Hypothyroidism	154
Hyperthyroidism	154
Hypoparathyroidism	155
Pseudohypoparathyroidism	155
Pseudopseudohypoparathyroidism	155
Hyperparathyroidism	155
Malignancy: Remote Effects on the Nervous System	156
Subacute Cerebellar Cortical Atrophy	156
Progressive Multifocal Leukoencephalopathy	157
Multifocal Vascular Lesions	157
Collagen Diseases and Immunologic Disorders with Nervous System Manifestations	157
Renal Insufficiency and the Nervous System	159
Electrolyte Disturbances with Cerebral Signs and Symptoms	160
Disturbances of Sodium Concentration	160
Liver and Gastrointestinal Disorders and the Nervous System	162
Blood and Blood Vessel Diseases Affecting the Nervous System	163
Several Additional Generalized Diseases with Signs of Involvement of the Nervous System	164
Special Cerebral Symptoms and Signs	164
Dementia and Dementing Neurologic Diseases	164
Neuropsychologic Syndromes	171
Disturbances of Language, Speech, and Other Allied Forms of Communication	173
Examination of Communication Disturbances	173
Syndromes of Individual Areas of the Cerebral Cortex	177
Precentral Region of the Frontal Lobe	177
Convexity of the Frontal Lobe	178
Parietal Lobe	178
Temporal Lobe	179
Occipital Lobe	180
 2. Diseases Affecting Mainly the Spinal Cord	 181
Features of a Spinal Cord Lesion	181
Topographic Classification of Spinal Cord Lesions	182
Transverse Lesion	182
Unilateral Lesion (Brown-Séquard Syndrome)	182
Intramedullary Lesion	182

Anterolateral Spinal Lesion	182
Column Lesions	182
Further Systematic Spinal Cord Lesions	182
Congenital and Perinatal Lesions of the Spinal Cord	192
Traumatic Lesions of the Spinal Cord	193
Features of (Total) Transverse Syndromes	193
Acute Total Transverse Lesion	193
Later Stages, Development of Chronic Transverse Lesion	193
Bladder Function	194
Disturbances of Bladder Function	194
Clinical Aspects of Traumatic Spinal Cord Lesions	195
Spinal Concussion	196
Spinal Contusion	196
Myelomalacia	196
Spinal Cord Compression	196
Hematomyelia	196
Conus Lesion	197
Cauda Equina Syndrome	197
Practical Approach to Acute Traumatic Paraplegia	197
Rehabilitation of Paraplegics	198
Whiplash Injury	198
Tumors and Other Space-Occupying Lesions of the Spinal Cord	199
General Principles	199
Specific Types of Spinal Cord Compression	200
Tumors of the Spinal Canal	200
Meningeal Carcinomatosis	203
Nonneoplastic Spinal Cord Compression	203
Differential Diagnosis of Spinal Cord Compression	204
Inflammatory, Allergic, and Toxic Diseases of the Spinal Cord and its Coverings	205
Infective Lesions of the Spinal Cord	205
Septic Diseases	205
Acute Anterior Poliomyelitis	205
Myelitis	207
Transverse Myelitis (Acute Transverse Myelitis)	207
Toxic Myelopathies	208
Myelopathy in Heroin Addicts	208
Myeloneuropathy After Nitrous Oxide Inhalation	208
Other Toxic Myelopathies	208

Circulatory Disturbances of the Spinal Cord	208
Blood Supply of the Spinal Cord	208
Spinal Cord Ischemia	208
Clinical Syndromes	210
Intermittent Spinal Circulatory Insufficiency	210
Intermittent Claudication of the Spinal Cord	210
Anterior Spinal Artery Syndrome	210
Infarct in Territory of Posterior Spinal Artery	211
Sulcocommissural Artery Syndrome	211
Global Myelomalacia	211
Centromedullary Softening	211
Chronic Progressive Myelopathy	211
Venous Infarction of the Spinal Cord	211
Arteriovenous Malformations of the Spinal Cord	212
Degenerative and Heredodegenerative Diseases Principally Involving the Spinal Cord	213
Damage to the Anterior Horn Cells	213
Pathophysiology and Particular Features	213
Spastic Spinal Paraplegia and Its Differential Diagnosis	220
Motor Neuron Disease (ALS)	221
Spinocerebellar Ataxias	224
Most Important Forms	224
Metabolic Disturbances Involving the Spinal Cord	227
Subacute Combined Degeneration of the Spinal Cord	227
Syringomyelia and Syringobulbia	230
3. Diseases Affecting Mainly the Autonomic Nervous System	233
Acute Pandysautonomia	233
Familial Dysautonomia (Riley-Day Syndrome)	235
Orthostatic Hypotension (Shy-Drager Syndrome)	235
Botulism	236
Loss of Pain Sensation	236
Sympathetic Syndromes	237
Typical Signs and Symptoms	237

4. Demyelinating Diseases	242
Review of the Origin, Significance, and Metabolism of Myelin	242
Multiple Sclerosis	243
Clinical Symptomatology	243
Individual Clinical Features	244
Ancillary Investigations in Multiple Sclerosis	247
CSF Examination	247
Evoked Potentials	247
CT and MRI	248
Additional Investigations	248
Other Demyelinating Diseases	253
Concentric Sclerosis (Balo's Disease)	253
Diffuse Sclerosis (Schilder's Disease)	253
Acute Disseminated Encephalomyelitis	253
Neuromyelitis Optica (Devic's Disease)	253
Subacute Myelo-Optic Neuropathy (SMON)	253
Congenital Demyelinating Diseases	254
5. Damage to the Nervous System by Specific Physical Agents	255
Electrical Damage to the Nervous System	255
Damage During Decompression	256
Damage by X-Irradiation	257
Irradiation Damage to the Brain	257
Irradiation Damage to the Spinal Cord	257
Damage by Generalized or Local Hypothermia	258
Clinical Features	258
6. Epilepsies and Other Diseases Presenting as Attacks or Disturbances of Consciousness	259
Epilepsies	259
Pathophysiology and Etiology	259
Epidemiology	259
Classification of Epilepsy	261
Generalized Seizures	262
Grand Mal Epilepsy	262
Absences	265
Myoclonus Epilepsy (Unverricht's Syndrome)	268

Partial Attacks	268
General Remarks	268
Partial Seizures with Simple Symptomatology	271
Partial Seizures with Complex Symptomatology	272
Specific Forms and Causes of Attacks	274
Pyridoxine-Dependent Seizures	274
Febrile Seizures	274
Startle Epilepsy	275
Posttraumatic Epilepsy	275
Further Types of Epilepsy with Specific Etiologic Factors	276
Brainstem Seizures	276
Paroxysmal Choreoathetosis	276
Practical Approach to a Case of Epilepsy	277
Nonepileptic Disturbances of Consciousness, Syncopes, and Motor Attacks	283
The Narcolepsy-Cataplexy Syndrome and Its Differential Diagnosis	283
Drop Attacks	287
Cardiovascular Causes of Syncopes and Drop Attacks	288
Cardiogenic Syncopes	288
Reflex Circulatory Syncopes	288
Syncopes Resulting from Disturbed Orthostatic Circulatory Regulation	290
Syncope Produced by Diseases of Blood Vessels	291
Metabolic Causes of Loss of Consciousness	291
Tetanic Syndromes	291
Psychogenic Association and Aspects of Attack-Like Disturbances	292
Childhood Attacks Induced by Emotion	292
Psychogenic Attacks and Hysteroepilepsy	293
7. Polyradiculitis and Polyneuropathies	294
Acute Polyradiculitis (Landry-Guillain-Barré Syndrome)	294
Atypical Polyradiculitides	297
Chronic Inflammatory Relapsing Polyradiculoneuropathy	297
Cranial Polyradiculitis and Fisher's Syndrome	297
Cauda Equina Polyradiculitis (Elsberg's Syndrome)	298
Polyneuropathies (Peripheral Neuropathies)	298
Genetically Determined Polyneuropathies	301
Hereditary Motor and Sensory Neuropathies (HMSN)	301
Hereditary Motor and Sensory Neuropathy Type I (Charcot-Marie-Tooth Disease)	303

Hereditary Motor and Sensory Neuropathy Type II	305
Hereditary Motor and Sensory Neuropathy Type III (Déjerine-Sottas Disease)	305
Hereditary Neuropathy with Liability to Pressure Palsies ("Tomaculous Neuropathy")	306
Polyneuropathy in Porphyria	307
Polyneuropathy in Primary Amyloidosis	308
Giant Axonal Neuropathy	308
Polyneuropathies in Metabolic Disorders	308
Diabetic Polyneuropathies	308
Uremic Polyneuropathy	312
Polyneuropathy in Hepatic Cirrhosis	313
Polyneuropathy in Gout	313
Polyneuropathies in Undernourishment and Malnutrition	313
Polyneuropathies in Disturbances of Vitamin B ₁₂ Absorption	313
Polyneuropathies in Dysproteinemias and Paraproteinemias	313
Polyneuropathies in Infectious Diseases	314
Polyneuropathies Accompanying Arteriopathies	315
Polyarteritis Nodosa	315
Other (Necrotizing) Arteritides and Arteriopathies	315
Polyneuropathies in Sprue and Other Disturbances of Intestinal Absorption	317
Polyneuropathies in Exogenous Toxic Disorders	317
Chronic Alcoholism	317
Lead Neuropathy	318
Arsenic Poisoning	318
Thallium Poisoning	319
Triarylphosphate Poisoning	319
Medications	319
Other Exotoxic Polyneuropathies	320
Polyneuropathies Due to Other Causes	320
Serogenetic Polyneuropathy	320
Proximal Motor Neuropathy with Multifocal Conduction Block	321
Meningopolyneuritis After Tick Bite (Lyme Disease)	321
Tick Paralysis	321
Polyneuropathies in Malignancy	322
Hypothyroidism	322

8. Diseases of the Cranial Nerves	323
Disturbances of Olfaction	326
Anosmia	328
True Combination of Anosmia and Ageusia	329
Cacosmias	329

Disturbances of Vision as a Neurologic Problem	329
Loss of Vision	329
Unilateral Visual Loss of Sudden Onset	329
Bilateral Visual Loss of Sudden Onset	329
Rapid or Gradual Visual Loss in One or Both Eyes	330
Disturbances of the Visual Fields	330
Topographic Classification of Visual Field Defects	330
Abnormal Findings in the Disks	332
Disturbances of Ocular Movement	335
Function of External Ocular Muscles and Examination Technique	335
Function of Individual Ocular Muscles	335
Analysis of Paralyzed Muscles	335
Practical Examination of Ocular Motility	337
Symptomatology of Abnormal Ocular Movements	337
Paralytic Strabismus (Paralytic Squint)	337
Concomitant Strabismus (Concomitant Squint)	338
Principles of External Ocular Movements	339
Conjugate Gaze Movements	339
The Most Important Supranuclear Disturbances of Eye Movement	341
Lesions of the Frontal Gaze Center	341
Lesions of the Visuomotor Region in the Parieto-Occipital Part of Hemisphere (Area 19)	341
Lesion of the Paramedian Pontine Reticular Formation	341
Paralysis of Vertical Gaze	341
Internuclear Ophthalmoplegia	342
Other More Complex Supranuclear Disturbances of Ocular Motility	342
Lesions of the Nerves to the External Ocular Muscle	343
Oculomotor Palsy	343
Trochlear Palsy	345
Abducent Palsy	346
Further Causes and Differential Diagnosis of Disturbances of Ocular Motility	346
Space-Occupying Lesions of the Orbit	346
Tolosa-Hunt Syndrome	346
Myopathies and Nuclear Pareses of the Ocular Muscles	347
Anomalies of Innervation of the External Ocular Muscles	347
Other Rarer Causes	347
Pupillary Disturbances	348
Anomalies of Pupillary Size and Shape	348
Anomalies of the Pupillary Reaction	349
Trigeminal Disorders	353

Facial Palsy	355
Idiopathic Peripheral Facial Palsy	356
Melkersson-Rosenthal Syndrome	359
Other Peripheral Facial Palsies	359
Hemifacial Spasm	360
Facial Myokymia	360
Facial Tics	361
Progressive Hemifacial Atrophy	361
Disturbances of the Vestibulocochlear Nerve	361
Examination of the Sense of Hearing	361
Purpose of Examination	361
Features of Two Types of Hearing Loss	362
Recruitment Phenomenon	362
Hearing Disturbances in a Neurologic Context	362
Unilateral or Bilateral Deafness of Sudden Onset	362
Progressive Loss of Hearing	362
Tinnitus and Other Ear Noises	363
Examination of Vestibular Function	364
Examination Technique	364
Vertigo and Nystagmus	365
Ménière's Disease	365
Acute Isolated Vestibular Disturbance (Vestibular Neuronitis)	366
Nystagmus of Benign Paroxysmal Type	367
Glossopharyngeal and Vagal Disturbances	368
Accessory Paralysis	370
Hypoglossal Paralysis	371
Multiple Lower Cranial Nerve Palsies	371
9. Spinal Radicular Syndromes	373
Symptomatology	373
Disk Disease Causing Radicular Syndromes	373
Disk Herniation and Spondylosis of the Cervical Spine	378
Radicular Syndromes of the Thoracic Spine	379
Lumbar Disk Herniation	379
Clinical Features of Common Disk Herniations	381
Space-Occupying Lesions of the Nerve Roots and Adjacent Structures	384
Other Radicular Syndromes	385
Herpes Zoster	385

10. Lesions of Peripheral Nerves	387
General Clinical Features	387
Ancillary Investigations	388
Electromyography	388
Electroneurography	390
Sweat Tests	390
Classification of Lesions of Peripheral Nerves	391
Quantification of Grades of Paralysis	392
Regeneration of Peripheral Nerves	392
Pain Syndromes Following Lesions of the Peripheral Nerves	393
Neuroma Pains	393
Phantom Pains	393
Causalgia	393
Brachial Plexus Palsy	394
Traumatic Brachial Plexus Palsy	395
Lesion of the Upper Brachial Plexus	395
Lesion of the Lower Brachial Plexus	404
C7 Paralysis	404
Fascicular Paralyses	405
Total Brachial Plexus Palsy	405
Birth Injury of Brachial Plexus	405
Other Causes of Brachial Plexus Palsy	406
Chronic External Pressure	406
Anatomic Relationships of Compression Syndromes	406
Apical Lung Tumor (Pancoast Tumor)	407
Radiation Damage to the Brachial Plexus	408
Neuralgic Shoulder Amyotrophy ("Plexus Neuritis")	409
Differential Diagnosis of Brachial Plexus Lesions	409
Long Thoracic Nerve	410
Axillary Nerve	410
Suprascapular Nerve	411
Musculocutaneous Nerve	411
Radial Nerve	411
Causes of Radial Paralysis	412
Median Nerve	414
Causes of Median Palsy	415

Ulnar Nerve	418
Causes of Ulnar Palsy	420
Trauma	420
Late Paralysis	420
Chronic Pressure Damage in the Sulcus Region	420
Anomalies in the Sulcus Region	421
Chronic Pressure Damage of the Wrist	421
Lumbosacral Plexus	423
Genitofemoral and Ilioinguinal Nerves	423
Femoral Nerve	430
Lateral Femoral Cutaneous Nerve (Meralgia Paresthetica)	431
Obturator Nerve	432
Gluteal Nerves	433
Sciatic Nerve	434
Lateral Popliteal (Common Peroneal) Nerve	435
Causes of Peroneal Palsy	435
Trauma	435
Pressure Palsy	435
Injection Paralysis	435
Differential Diagnosis of Peroneal Palsy	436
General Differential Diagnosis	436
Anterior Tibial (Tibial Compartment) Syndrome	436
Posterior Tibial (Medial Popliteal) Nerve	438
11. Headache and Facial Pain	440
General Considerations	440
Structures Sensitive to Pain in the Head and Face	440
Classification of Head and Face Pain	441
Headaches due to Vasomotor Disturbances	449
Pathogenesis	449
Vasomotor Headache	449
Migraine	450
Classification	450
Cluster Headache (Histamine Headache, Erythroprosopalgia, Horton's Neuralgia)	454
Rarer Forms of Vasomotor Headache	455

Headaches in Organic Vascular Diseases	455
Cranial Arterial Occlusion	455
Arterial Hypertension	455
Temporal Arteritis (Cranial Arteritis, Horton's Syndrome)	456
Spondylotic Headache and Cervical Migraine	457
Other (Symptomatic) Forms of Headache	458
Headache in Intracranial Space-Occupying Lesions	458
Headache in Intermittent Disturbances of CSF Drainage	458
Spontaneous Aliquorrhoea (Hypoliquorrhoea, Acute Pseudomeningitis)	458
Headache Due to Ophthalmic Causes	459
Headache in ENT Lesions	459
Headache in Generalized Diseases	459
Psychogenic Headache	459
Facial Neuralgias	459
Trigeminal Neuralgia	460
Clinical Aspects	460
Auriculotemporal Neuralgia	461
Nasociliary Neuralgia	461
Sluder's Neuralgia	461
Glossopharyngeal Neuralgia	461
Neuralgia of the Genuiculate Ganglion	462
Other Facial Neuralgias	462
Neuralgia of the Temporomandibular Joint (Costen's Syndrome)	462
Atypical Facial Neuralgia	463
12. Various Pain Syndromes of the Trunk and Extremities	464
Shoulder Arm Syndrome (Cervicobrachialgia)	464
Cervical Disk Prolapse and Cervical Spondylosis	464
Thoracic Outlet Syndrome	464
Neuralgic Shoulder Amyotrophy	464
Brachialgia Paresthetica Nocturna	464
Causalgia	464
Intramedullary Lesions	465
Scapulohumeral Periarthritis	465
Shoulder Hand Syndrome (Frozen Shoulder)	465
Sudeck's Dystrophy of the Hand	465
Lateral Humeral Epicondylitis (Tennis Elbow)	465
Attacks of Gout	465
Snapping Scapula	466

Fibrositis ("Muscular Rheumatism", "Tenomyalgia," Pseudoradicular Complaints)	466
Scapulocostal Syndrome	466
Arteriopathies	466
Vasomotor Disturbances	467
Venous Thrombosis	467
Glomus Tumors	467
Referred Pain	467
Pain Syndromes of the Trunk and Back	468
Girdle Pain	468
Abnormal Mobility of the Tenth (or Ninth) Rib	468
Syndrome of Rectus Abdominis Muscle	468
Ankylosing Spondylitis (Bekhterev's Disease)	468
Spondylolisthesis	469
Interspinous Osteoarthritis (Baastrup's Disease)	469
Sacroiliac Strain	469
Coccygodynia	470
Compression Syndrome of Spinal Nerve Rami	470
Pelvic and Leg Pains	470
Hypogastric Pains	470
Inguinal Pains	470
Piriform Syndrome	470
Gluteal Pain	471
Hip Joint Pain	471
Knee Joint Pain	471
Leg Pain	471
Foot Pain	472
Burning Leg and Foot Pains	472
Restless Legs and Toes	472
Intermittent Claudication	473
 13. Myopathies	 474
General Remarks	474
Classification	474
Dystrophic Myopathies	476
Progressive Muscular Dystrophy	476
Individual Forms of Muscular Dystrophy	479
Myotonic Dystrophy (Curschmann-Steinert)	481
Myotonic Dysembryoplasia	482
Other Muscular Dystrophies	483
Ocular Myopathies	483

Distal Myopathies	483
Congenital Muscular Dystrophy	484
Syndromes with Abnormal Relaxation of Muscle Fibers	484
Myotonia Congenita (Thomsen's Disease)	484
Paramyotonia Congenita (Eulenburg's Syndrome)	485
Neuromyotonia (Syndrome of Prolonged Muscular Activity)	486
Stiff Man Syndrome	486
Myasthenia Gravis (Erb-Goldflam Disease)	487
Ancillary Investigations	489
Treatment	491
Differential Diagnosis	492
Myositides	493
Polymyositis and Dermatomyositis	493
Other Myositides	495
Muscular Involvement as a Metabolic Disturbance (with Anomaly Known)	495
Muscular Signs and Symptoms with Known Enzyme Defect	495
Glycogen Storage Diseases	495
Lipid Storage Myopathy	496
Myoglobinurias	496
Myoglobinuria with Known Enzyme Defect	496
Myoglobinuria in Inherited Enzyme Defect (as yet Unknown)	
Malignant Hyperthermia	497
Rhabdomyolysis (Paroxysmal Myoglobinuria)	497
Muscular Signs and Symptoms in Disturbances of Potassium Metabolism	497
Periodic Paralysis (Familial Paroxysmal Hypokalemic Paralysis)	497
Adynamia Episodica Hereditaria (Gamstorp's Disease, Hyperkalemic Periodic Paralysis)	500
Periodic Paralysis with Normokalemia	501
Symptomatic Hypokalemias	501
Muscular Involvement due to Other Causes (Mechanism Unknown)	501
Muscular Signs and Symptoms in Endocrine Disorders	501
Hyperthyroidism	501
Hypothyroidism	502
Muscular Signs and Symptoms in Cushing's Disease	502
Acromegaly	502
Addison's Disease	502
Hyperparathyroidism	502
Muscular Involvement in Collagen Diseases	502
Muscular Involvement in Malignant Diseases	503

Myopathy in Sarcoidosis	503
Muscular Involvement in Exogenous Poisons	504
Chronic Alcoholism	504
Therapeutic Drugs	504
Muscular Involvement in Other Diseases	505
Undernutrition	505
Dialysis	505
Other Muscular Diseases and Symptoms	505
Congenital Nonprogressive Myopathies	505
Differential Diagnosis of Myopathies	506
Childhood	506
Adulthood	507
References	508
Index	545
