Table of Contents

List of Estimates xii

Preface xv

Acknowledgments xix

The Path to Biological Numeracy xxiii

Chapter 1: Size and Geometry 3
Cells and Viruses 5
Organelles 24
Cellular building blocks 40

Chapter 2: Concentrations and Absolute Numbers 65
Making a cell 68
Cell census 87
Machines and signals 132

Chapter 3: Energies and Forces 153
Biology meets physics 154
Energy currencies and budgets 182

Chapter 4: Rates and Durations 209
Time scales for small molecules 211
The central dogma 231
Cellular dynamics 249
LIfe cycle of cells 272

Chapter 5: Information and Errors 283
Genome 284
Mutations and errors 297

Chapter 6: A Quantitative Miscellany 313

Epilogue 335

Index 339
