

Table of Contents

List of Estimates	xii
Preface	xv
Acknowledgments	xix
The Path to Biological Numeracy	xxiii
Chapter 1: Size and Geometry	3
Cells and Viruses	5
Organelles	24
Cellular building blocks	40
Chapter 2: Concentrations and Absolute Numbers	65
Making a cell	68
Cell census	87
Machines and signals	132
Chapter 3: Energies and Forces	153
Biology meets physics	154
Energy currencies and budgets	182
Chapter 4: Rates and Durations	209
Time scales for small molecules	211
The central dogma	231
Cellular dynamics	249
Life cycle of cells	272
Chapter 5: Information and Errors	283
Genome	284
Mutations and errors	297
Chapter 6: A Quantitative Miscellany	313
Epilogue	335
Index	339
