

13	Interpretation of logical connectives	13
18	Paradoxes, Contradictions and Special sections	18
23	Additional Concepts - Transcendental Semantics	23
28	Generalized Conjunctions and Disjunctions	28
33	Derivations in Predicate Logic	33
38	Derivations in First-order Logic	38
43	Semantics of First-order Predicates	43
48	Equivalence Relations	48
53	Partial Orderings	53
58	Finite State Automata	58
63	Graphs	63
68	Relations	68
73	Propositional Logic	73
78	First-order Logic	78
83	Computability	83
88	Conclusion	88
93	Chances	93
98	Answers	98
103	Exercises	103
Preface		4
113	Proof Method in Predicate Logic	113
118	An Examples of a Proof	118
1 Sets		5
123	1.1 Basic notions	5
128	1.2 Russell's Paradox	9
133	1.3 Exercises	10
2 Cardinality of Sets		14
138	2.1 Cardinality of sets	14
143	2.2 More about Cardinalities	19
148	2.3 Exercises	20
3 Graphs		24
153	3.1 Basic notions	24
158	3.2 Trees	27
163	3.3 Exercises	29
4 Relations		31
168	4.1 Binary relations	31
173	4.2 Operations with relations	32
178	4.3 Relations on a set	34
183	4.4 Exercises	38
5 Propositional Logic		45
188	5.1 Formal Syntax of Propositional Logic	46
193	5.2 Truth valuations of formulas	48
198	5.3 Connection to logical circuits	51

5.4 Exercises	51
6 Semantical Consequence, Tautological Equivalence	55
6.1 Semantical Consequence	55
6.2 Tautological Equivalence of Formulas	58
6.3 Exercises	60
7 Complete Systems of Logical Connectives	63
7.1 Further Logical Connectives	63
7.2 Complete Systems of Logical Connectives	65
7.3 An Example of a More Difficult Proof	68
7.4 Exercises	70
8 Conjunctive and Disjunctive Normal Forms	73
8.1 Boolean functions of several variables	73
8.2 Disjunctive Normal Forms	74
8.3 Conjunctive Normal Forms	76
8.4 Boolean Calculus	77
8.5 Exercises	79
9 Deduction in Propositional Logic	82
9.1 Natural Deduction	82
9.2 Completeness Theorem for Natural Deduction	87
9.3 Exercises	89
10 Resolution Method in Propositional Logic	93
10.1 Resolvents	93
10.2 Resolution Principle	95
10.3 Exercises	101
11 Predicate Logic	103
11.1 An Informal Description of Predicate Logic	103
11.2 Formal Syntax of Predicate Logic, Formulas	107
11.3 Exercises	110
12 Semantics of Predicate Logic	115

12.1 Interpretation	116
12.2 Tautologies, Contradictions, and Satisfiable Sentences	120
12.3 Semantical Consequence and Tautological Equivalence	124
12.4 Exercises	127
13 Natural Deduction in Predicate Logic	135
13.1 Natural Deduction	135
13.2 The Completeness Theorem	140
13.3 Exercises	141
14 Resolution Method in Predicate Logic	143
14.1 Resolvents	144
14.2 Resolution Principle	146
14.3 A Clausal Form of a Sentence	148
14.4 Skolemization	150
14.5 Examples How to Use the Resolution Method in Predicate Logic	152
14.6 Exercises	156
Appendix	160
