

'This text is a masterful combination of classic and cutting-edge political geography from around the globe. It should have wide appeal.'

Michael Brown, University of Washington

'This is a clearly written and well organized textbook, faithful to the main concepts of political geography but alert to the pitfalls of obsession with "the state" that has often made the field a handmaiden to realpolitik. Particularly impressive is the careful attention given to recent scholarship.'

John Agnew, UCLA

'The student who digests this book will have an excellent grasp of how politics and geography intersect in this new century.'

Andrew Kirby, Arizona State University West

Questions of the interaction between politics and geography permeate much of contemporary life. In this broad-based introduction to contemporary political geography, the authors examine the relationship between politics and geography at a variety of levels and in a number of different contexts. By pushing back the boundaries of what is conventionally understood to constitute political geography, the book emphasises the relationships between power, politics and policy, space, place and territory in different geographical contexts.

An Introduction to Political Geography explores how power interacts with space, how place influences political identities and how policy creates and remoulds territory. In outlining the full breadth of contemporary political geography, covering a rich and diverse range of topics, it addresses not only traditional concerns such as state formation, geopolitics, electoral geography and nationalism but also newer themes, including the geographies of regulation and governance, public policy, the politics of place consumption, landscapes of power, identity politics and geographies of resistance.

This accessible text successfully combines discussions of cutting-edge conceptual debates with international case studies, numerous illustrations and explanatory boxes. **An Introduction to Political Geography** will be essential reading for political geographers as well as a valuable resource for students of related fields with an interest in politics and geography.

Martin Jones is Reader in Human Geography, **Rhys Jones** is Lecturer in Human Geography and **Michael Woods** is Senior Lecturer in Human Geography in the Institute of Geography and Earth Sciences at the University of Wales Aberystwyth. They all teach on the Master's degree, Space, Place and Politics.
