

TABLE OF CONTENTS

Preface	- 1 -
1 Background	- 3 -
1.2 Satellite data	- 3 -
2 The method of small water bodies detection	- 5 -
2.2 Water as the target land-cover object	- 5 -
2.3 The method	- 6 -
2.3.1 Water Bodies Detection through Principal Component Analysis	- 6 -
2.3.2 Water bodies detection through image rationing	- 8 -
2.4 Testing of BOMOSA method on Terra Aster data	- 9 -
2.5 Testing of BOMOSA method on EO-1 ALI data	- 11 -
2.6 Conclusions – applicability, future use and limitations	- 12 -
References	- 14 -
3 Remote Sensing (RS) based evaluation method to assess potential water bodies - MANUAL	- 15 -
3.1 Small water bodies detection using image rationing - NDSI	- 16 -
3.1.1 Normalized Difference Snow Index (NDSI)	- 17 -
3.1.2 Recoding NDSI_260.tif image to get the final mask of water bodies	- 23 -
3.2 Small water bodies detection using Principal Component Analysis	- 32 -
3.2.1 Principal Component Analysis	- 33 -
3.3 Final water bodies mask	- 41 -
4 GPS integration	- 45 -
