

Cities of Tomorrow is a critical history of planning in theory and practice in the twentieth century, as well as of the social and economic problems and opportunities that gave rise to it. Trenchant, perceptive, global in coverage, this book is an unrivalled account of its crucial subject.

The third edition of *Cities of Tomorrow* is comprehensively revised to take account of abundant new literature published since its original appearance, and to view the 1990s in historical perspective. This is the definitive edition, reviewing the development of the modern planning movement over the entire span of the twentieth century.

"*Cities of Tomorrow* remains the definitive story of modern Euro-American planning. The seamless integration of new information and perspectives in this latest edition reaffirms its status as a classic, compelling and extraordinarily readable synthesis."

Professor Robert Freestone, University of New South Wales

"Peter Hall's new edition of *Cities of Tomorrow* is better than ever. With extraordinary skill he weaves the separate strands of planning of the last century into a rich tapestry that vividly displays its intricate links, perceptively portrays the foundations of today's profession yet cleverly reveals the field's enduring questions and concerns. To do this in one volume is a work of genius!"

Professor Genie Birch, University of Pennsylvania

Sir Peter Hall is Professor of Planning at the Bartlett School of Architecture, Building, Environmental Design and Planning at University College, London and Director of the Institute of Community Studies. He was previously Professor of Urban and Regional Planning at the University of California, Berkeley, and Professor of Geography at the University of Reading. He is the author of over 30 books in planning and related subjects, including *London 2000*, *The World Cities*, *Great Planning Disasters* and *High Tech America*. He has been credited with the invention of the Urban Enterprise Zone concept now widely employed in the USA, the UK and Europe. An advisor to governments and international agencies across the world, Professor Hall is known throughout the world for his contribution both to the theory and to the practice of city and regional planning.
