

table of contents

1. Introduction	5
2. Ungulates	9
2.1. European bison	11
2.2. Moose	18
2.3. Red deer	26
2.4. Roe deer	33
2.5. Wild boar	40
Box 1. Identification of tracks and dropping of ungulates	49
3. Large carnivores	53
3.1. Brown bear	55
3.2. Wolf	61
Box 2. Rendezvous sites of wolves	76
3.3. Eurasian lynx	78
Box 3. Interactions between the wolf and the lynx	85
Box 4. Identification of tracks left by wolf, lynx and dog	89
4. Medium-sized and small carnivores	91
4.1. Red fox	93
4.2. Raccoon dog	100
4.3. European badger	108
Box 5. Burrows of badger, fox, raccoon dog and wolf	117
Box 6. Identification of tracks left by fox, raccoon dog and badger	118
4.4. Pine marten	121
4.5. Stone marten	127
Box 7. Identification of tracks left by pine marten and stone marten	130
4.6. River otter	132
4.7. European mink	139
4.8. American mink	141
4.9. Polecat	146
4.10. Stoat	153
Box 8. Identification of tracks left by polecat, minks and stoat	156
4.11. Weasel	159
Box 9. Identification of tracks left by weasel and rodents	164

5.	Hares	167
5.1.	Brown hare	169
5.2.	Mountain hare	172
6.	Rodents	175
6.1.	Red squirrel	177
Box 10.	Identification of tracks left by hare and squirrel	181
6.2.	European beaver	182
Box 11.	Constructions made by beavers	190
6.3.	Muskrat	194
6.4.	Water vole	197
6.5.	Small rodents	199
7.	Insectivores	213
7.1.	West European hedgehog and Northern white-breasted hedgehog	215
7.2.	Other insectivores	217
8.	Methods of tracking	221
8.1.	Methods of tracking and their application in scientific studies	223
8.2.	A sample form for recording data during team tracking	225
	Literature	226
	Authors' profiles and addresses	227
