Volume 52, Issue 11, November 2016
Pages 8399–9212
ISSN 1944-7973

Water Resources Research

Research Articles

8402 *Frouke Hoogland, Peter Lehmann, and Dani Or*
Drainage dynamics controlled by corner flow: Application of the foam drainage equation (doi 10.1002/2016WR019477)

8413 *Frouke Hoogland, Peter Lehmann, Rajmund Mokso, and Dani Or*
Drainage mechanisms in porous media: From piston-like invasion to formation of corner flow networks (doi 10.1002/2016WR019299)

8437 *Edward H. Bair, Karl Rittger, Robert E. Davis, Thomas H. Painter, and Jeff Dozier*
Validating reconstruction of snow water equivalent in California's Sierra Nevada using measurements from the NASA Airborne Snow Observatory (doi 10.1002/2016WR018704)

8461 *R. Crago, J. Szilagyi, R. Qualls, and J. Huntington*
Rescaling the complementary relationship for land surface evaporation (doi 10.1002/2016WR019753)

8472 *Alon Nissan, Qiuling Wang, and Rony Wallach,*
Kinetics of gravity-driven slug flow in partially wettable capillaries of varying cross section (doi 10.1002/2016WR018849)

8487 *A. D. Werner, A. Kawachi and T. Laattoe*
Plausibility of freshwater lenses adjacent to gaining rivers: Validation by laboratory experimentation (doi 10.1002/2016WR019400)

8500 *Na Li, Xingye Yue and Li Ren*
Numerical homogenization of the Richards equation for unsaturated water flow through heterogeneous soils (doi 10.1002/2015WR018508)

8526 *J. Maillot, P. Davy, R. Le Goc, C. Darcel, and J.R. de Dreuzy*
Connectivity, permeability, and channeling in randomly distributed and kinematically defined discrete fracture network models (doi 10.1002/2016WR018973)

8546 *Jhan Carlo Espinoza, Hans Segura, Josyane Ronchail, Guillaume Drapeau, and Omar Gutierrez-Cori*
Evolution of wet-day and dry-day frequency in the western Amazon basin: Relationship with atmospheric circulation and impacts on vegetation (doi 10.1002/2016WR019305)

8561 *Yong Zhang, Christopher T. Green, Eric M. LaBolle, Roseanna M. Neupauer, and HongGuang Sun*
Bounded fractional diffusion in geological media: Definition and Lagrangian approximation (doi 10.1002/2016WR019178)

8578 *Anna Suzuki, Toshiyuki Hashida, Kewen Li, and Roland N. Horne*
Experimental tests of truncated diffusion in fault damage zones (doi 10.1002/2016WR019017)

8590 *E. Arnone, D. Caracciolo, L. V. Noto, F. Preti, and R. L. Bras*
Modeling the hydrological and mechanical effect of roots on shallow landslides (doi 10.1002/2015WR018227)

8613 *Mohsen Cheraghi, Seifeddine Jomaa, Graham C. Sander, and D. A. Barry*
Hysteretic sediment fluxes in rainfall-driven soil erosion: Particle size effects (doi 10.1002/2016WR019314)

8630 *Slobodan P. Simonovic and R. Arunkumar,*
Comparison of static and dynamic resilience for a multipurpose reservoir operation (doi 10.1002/2016WR019551)

8650 *Caitlin M. Spence and Casey M. Brown*
Nonstationary decision model for flood risk decision scaling (doi 10.1002/2016WR018981)

8668 *Alexey Kalinin, Tim Covino, and Brian McGlynn*
The influence of an in-network lake on the timing, form, and magnitude of downstream dissolved organic carbon and nutrient flux (doi 10.1002/2016WR019378)

8685 *Jie Yin, Ning Lin, and Dapeng Yu,*
Coupled modeling of storm surge and coastal inundation: A case study in New York City during Hurricane Sandy (doi 10.1002/2016WR019102)

8700 *Brian Henn, Martyn P. Clark, Dmitri Kavetski, Bruce McGurk, Thomas H. Painter, and Jessica D. Lundquist*
Combining snow, streamflow, and precipitation gauge observations to infer basin-mean precipitation (doi 10.1002/2015WR018564)

8724 *Björn Guse, Matthias Pfannerstill, Abror Gafurov, Nicola Fohrer, and Hoshin Gupta*
Demasking the integrated information of discharge: Advancing sensitivity analysis to consider different hydrological components and their rates of change (doi 10.1002/2016WR018894)

8744 *Michael Schwab, Julian Klaus, Laurent Pfister, and Markus Weiler*
Diel discharge cycles explained through viscosity fluctuations in riparian inflow (doi 10.1002/2016WR018626)

8756 *David R. Steward,*
Analysis of vadose zone inhomogeneity toward distinguishing recharge rates: Solving the nonlinear interface problem with Newton method (doi 10.1002/2016WR019222)

8775 *Ankit Deshmukh and Riddhi Singh*
Physio-climatic controls on vulnerability of watersheds to climate and land use change across the U. S. (doi 10.1002/2016WR019189)

8794 *Chao-Zhong Qin, S. Majid Hassanizadeh and Anozie Ebigbo*
Pore-scale network modeling of microbially induced calcium carbonate precipitation: Insight into scale dependence of biogeochemical reaction rates (doi 10.1002/2016WR019128)

8811 *Robert Schwefel, Adrien Gaudard, Alfred Wüest, and Damien Bouffard*
Effects of climate change on deepwater oxygen and winter mixing in a deep lake (Lake Geneva): Comparing observational findings and modeling (doi 10.1002/2016WR019194)

8827 *James M. Minto, Erica MacLachlan, Gráinne El Mountassir, and Rebecca J. Lunn*
Rock fracture grouting with microbially induced carbonate precipitation (doi 10.1002/2016WR018884)

8845 *Armaghan Abed-Elmdoust, Mohammad-Ali Miri, and Arvind Singh*
Reorganization of river networks under changing spatiotemporal precipitation patterns: An optimal channel network approach (doi 10.1002/2015WR018391)

8861 *H. K. Rutter, S. C. Cox, N. F. Dudley Ward, and J. J. Weir*
Aquifer permeability change caused by a near-field earthquake, Canterbury, New Zealand*
(doi 10.1002/2015WR018524)

*This article is part of a Special Section—Disturbance Hydrology

8879 *E. Battisacco, M. J. Franca, and A. J. Schleiss*
Sediment replenishment: Influence of the geometrical configuration on the morphological evolution of channel-bed (doi 10.1002/2016WR019157)

8895 *Yannis G. Dialynas, Satish Bastola, Rafael L. Bras, Erika Marin-Spiotta, Whendee L. Silver, Elisa Arnone, and Leonardo V. Noto*
Impact of hydrologically driven hillslope erosion and landslide occurrence on soil organic carbon dynamics in tropical watersheds (doi 10.1002/2016WR018925)

8920 *Sebastian Most, Branko Bijeljic, and Wolfgang Nowak*
Evolution and persistence of cross-directional statistical dependence during finite-Péclet transport through a real porous medium (doi 10.1002/2016WR018969)

8938 *Luca Adami, Walter Bertoldi, and Guido Zolezzi*
Multidecadal dynamics of alternate bars in the Alpine Rhine River (doi 10.1002/2015WR018228)

8956 *A. Herrero, C. Berni*
Sand infiltration into a gravel bed: A mathematical model (doi 10.1002/2016WR019394)

8970 *Geoffrey C. Bohling, Gaisheng Liu, Peter Dietrich, and James J. Butler Jr.*
Reassessing the MADE direct-push hydraulic conductivity data using a revised calibration procedure*
(doi 10.1002/2016WR019008)

*This article is part of a Special Section—Modeling Highly Heterogeneous Aquifers: Lessons Learned in the Last 30 years From the MADE Experiments and Others

8986 *Brandon P. Wong and Branko Kerkez*
Adaptive measurements of urban runoff quality (doi 10.1002/2015WR018013)

9001 *K. Haahti, H. Marttila, L. Warsta, T. Kokkonen, L. Finér, and H. Koivusalo*
Modeling sediment transport after ditch network maintenance of a forested peatland
(doi 10.1002/2016WR019442)

9020 *Antonio Rodríguez de Castro and Giovanni Radilla*
Non-Darcian flow experiments of shear-thinning fluids through rough-walled rock fractures
(doi 10.1002/2016WR019406)

9036 *Chi Zhang, Wei Ding, Yu Li, Yin Tang, and Dingbao Wang*
Catchments' hedging strategy on evapotranspiration for climatic variability (doi 10.1002/2016WR019384)

9046 *Troy E. Gilmore, David P. Genereux, D. Kip Solomon, Kathleen M. Farrell, and Helena Mitasova*
Quantifying an aquifer nitrate budget and future nitrate discharge using field data from streambeds and well nests (doi 10.1002/2016WR018976)

9066 *Kevin A. Waters and Joanna Crowe Curran*
Effects of an emergent vegetation patch on channel reach bathymetry and stability during repeated unsteady flows (doi 10.1002/2015WR018411)

9086 *Yang Lu, Jianzhi Dong, Susan C. Steele-Dunne, and Nick van de Giesen*
Estimating surface turbulent heat fluxes from land surface temperature and soil moisture observations using the particle batch smoother (doi 10.1002/2016WR018943)

9109 *J. Kazmierczak, S. Müller, B. Nilsson, D. Postma, J. Czekaj, E. Sebok, S. Jessen, S. Karan, C. Stenvig Jensen, K. Edelvang, and P. Engesgaard*
Groundwater flow and heterogeneous discharge into a seepage lake: Combined use of physical methods and hydrochemical tracers (doi 10.1002/2016WR019326)

9131 *J. Huang, F. A. Monteiro Santos, and J. Triantafilis,*
Mapping soil water dynamics and a moving wetting front by spatiotemporal inversion of electromagnetic induction data (doi 10.1002/2016WR019330)

9146 *James Thomas Steven Savage, Francesca Pianosi, Paul Bates, Jim Freer, and Thorsten Wagener*
Quantifying the importance of spatial resolution and other factors through global sensitivity analysis of a flood inundation model (doi 10.1002/2015WR018198)

9164 *V. M. Morales, J. C. Quijano, A. Schmidt, and M. H. Garcia*
Innovative framework to simulate the fate and transport of nonconservative constituents in urban combined sewer catchments (doi 10.1002/2016WR018807)

Technical Reports: Methods

9182 *Qiang Wu, Yingwang Zhao, Yu-Feng F. Lin, and Hua Xu*
Locally conservative groundwater flow in the continuous Galerkin method using 3-D prismatic patches (doi 10.1002/2016WR018967)

9190 *David A. Benson and Diogo Bolster*
Arbitrarily complex chemical reactions on particles (doi 10.1002/2016WR019368)

9201 *Ching-Sheng Huang and Hund-Der Yeh,*
An analytical approach for the simulation of flow in a heterogeneous confined aquifer with a parameter zonation structure (doi 10.1002/2016WR019443)
