

The Calculus of Variations on Manifolds In the Memory of Gennadi Sardanashvily

Contents

Editorial	89
Research papers	
<i>Enrico Massa, Enrico Pagani</i> : On the notion of Jacobi fields in constrained calculus of variations	91
<i>D.J. Saunders</i> : Homogeneous variational problems and Lagrangian sections	115
<i>Marcella Palese</i> : Variations by generalized symmetries of local Noether strong currents equivalent to global canonical Noether currents . . .	125
<i>Jordi Gaset, Pedro D. Prieto-Martínez, Narciso Román-Roy</i> : Variational principles and symmetries on fibered multisymplectic manifolds . . .	137
<i>Giovanni Moreno, Monika Ewa Stypa</i> : Geometry of the free-sliding Bernoulli beam	153
<i>Jana Musilová, Stanislav Hronek</i> : The calculus of variations on jet bundles as a universal approach for a variational formulation of fundamental physical theories	173
Contents of previous Volumes	195
