EDITORIAL.....	9
1 ICT TOOLS AND EDUCATION.....	14
1.1 Educational technology – the predecessor of ICT tools, and its development.....	15
1.2 ICT tool – a didactic teaching aid, or a didactic teaching means?	20
1.2.1 ICT tools as a teaching aid.....	24
1.2.2 ICT tools as a didactic means.....	26
1.3 Models of teaching supported by an ICT tool.....	29
1.4 Advantages and disadvantages of teaching via ICT tools.....	31
1.5 Perspectives on the approach to the ICT tools in education.....	33
1.5.1 User perspective.....	34
1.5.2 Social perspective.....	34
1.5.3 Technological perspective.....	35
1.6 Integration of ICT tools in the educational process.....	35
1.7 The diffusion of information technologies in the work of a teacher.....	38
2 DIFFICULTIES, CHALLENGES AND TRENDS IN THE AREA OF ICT TOOLS' IMPLEMENTATION INTO EDUCATION.....	41
2.1 Learning theories and the development of their employment in connection to ICT tools.....	41
2.2 Theory of learning in the age of ICT tools – connectivism.....	45
2.2.1 Connectivism – tools used.....	46
2.2.2 Connectivism – areas of research.....	47
2.2.3 Connectivism – perspectives.....	48
2.3 Multimediality, interactivity – an important aspect supporting the implementation of ICT tools into education.....	49
2.3.1 Multimediality and interactivity in educational paradigms.....	49
2.3.2 Development of concepts reflecting ICT tools in the education...	52
2.3.3 From clarity to multimediality.....	53
2.3.3.1 Traditional understanding of the term multimediality.....	54
2.3.3.2 Contemporary understanding of the term multimediality	55
2.3.4 From communicating to sharing.....	57
2.3.4.1 Traditional understanding of the term interactivity.....	57

2.3.4.2	Contemporary understanding of the term interactivity....	58
2.3.4.3	Two dimensions of interactivity.....	59
2.4	Respecting and employment of teaching styles and strategies – support possibilities of ICT tools.....	61
2.5	Selected trends in the area of ICT tools implementation into education.....	64
2.5.1	Trend of employment of a broader spectrum of learning styles while using ICT tools.....	64
2.5.2	Trend of a more effective achievement of educational aims via ICT tools.....	65
2.5.3	Trend of employment of virtual reality as a learning environment mediated by ICT tools.....	65
2.5.4	Trend of a further development of the understanding of multimediality and interactivity from the perspective of ICT tools.....	65
3	EXPLANATION OF THE CURRENT STATE OF EMPLOYMENT OF ICT TOOLS IN EDUCATION.....	68
3.1	Aims of the realized research and formulation of research assumptions and hypotheses.....	69
3.1.1	Formulation of research assumptions.....	70
3.1.2	Formulation of research hypotheses.....	71
3.2	Description of employed methods for data collection, description of the research sample, and methods for the processing of the obtained data.....	75
3.2.1	Structure and content of the research questionnaire.....	76
3.2.2	Research sample description.....	77
3.2.3	Description of processing methods of collected data.....	78
3.3	Selected results of research in the area of explanation of the current state of ICT tools' employment.....	79
3.3.1	Employment of ICT tools at schools.....	80
3.3.2	The ways of ICT tools employment at schools.....	84
3.3.3	Preferences of ICT tools employment in order to prepare teaching materials.....	86
3.3.4	Preferences of ICT tools employment in order to realize frontal teaching.....	90
3.3.5	Preferences of ICT tools employment in order to realize individualized teaching.....	94
3.3.6	Availability of hardware ICT tools in schools.....	98

3.3.7	Availability of software ICT tools in schools.....	100
3.3.8	The way of acquisition of software ICT tools.....	101
3.3.9	The sufficiency and availability of electronic learning materials.....	103
3.3.10	The overall amount and quality of ICT tools available.....	106
3.3.11	Interest in the acquisition of additional ICT tools.....	110
3.3.12	Demanded support necessary for more employment of ICT tools in the teaching.....	112
3.3.13	Overall frequency and ways of employment of ICT tools in the teaching.....	114
3.3.13.1	Frequency of ICT tools employment while preparing for teaching.....	116
3.3.13.2	Frequency of ICT tools employment in the teaching itself.....	117
3.3.13.3	Frequency of ICT tools employment while preparing tests.....	119
3.3.13.4	Frequency of ICT tools employment while evaluating tests.....	120
3.3.13.5	Frequency of ICT tools employment while setting classification.....	121
3.3.13.6	Frequency of ICT tools employment while making the teaching more varied.....	123
3.3.13.7	Frequency of ICT tools employment while summarizing the subject matter taught.....	124
3.4	Summary and discussion of the obtained results.....	126

4	TO THE DEVELOPMENT OF ABILITY TO SOLVE PROBLEMS AMONG BASIC AND SECONDARY SCHOOL PUPILS WITH A SUPPORT OF ICT TOOLS: SELECTION OF THEORIES AND RESEARCHES.....	130
4.1	Reflection of the demand for the development of ability to solve problems in curricular documents.....	130
4.2	Teacher – a key factor of development of the ability to solve problems.....	133
4.3	Definition of basic terms from the area of theory of problem solving.....	135

5 DO THE TEACHERS EMPLOY ICT TOOLS TO SUPPORT THE DEVELOPMENT OF THE ABILITY TO SOLVE PROBLEMS AMONG PUPILS OF BASIC AND SECONDARY SCHOOLS?.....	137
5.1 Aim of the realized research, formulation of research assumptions, methods used and other specifications.....	138
5.1.1 Formulation of research assumptions.....	138
5.2 Formulation of research hypotheses.....	139
5.3 Employment of ICT tools by basic school teachers for the development of the pupils' ability to solve problems – research results.....	140
5.3.1 Motives of basic school teachers for the employment of ICT tools for the development of pupils' ability to solve problems....	142
5.3.2 Motives of basic school teachers for the non-employment of ICT tools for the development of pupils' ability to solve problems.	143
5.3.3 Differences in the employment of ICT tools for the development of the ability of basic school pupils to solve problems – comparison according to teaching qualification.....	144
5.3.4 Extent of employment of ICT tools to develop ability of basic school pupils to solve problems – differences between men and women.....	145
5.4 Employment of ICT tools by secondary school teachers for the development of the pupils' ability to solve problems – research results.....	147
5.4.1 Motives of secondary school teachers for the employment of ICT tools for the development of pupils' ability to solve problems.....	149
5.4.2 Motives of secondary school teachers for the non-employment of ICT tools for the development of pupils' ability to solve problems.....	150
5.4.3 Differences in the employment of ICT tools for the development of the ability of basic school pupils to solve problems – comparison according to teaching qualification.....	151
5.4.4 Extent of employment of ICT tools to develop ability of secondary school pupils to solve problems – differences between men and women.....	152

CONCLUSION.....	155
BIBLIOGRAPHY.....	161
ANNOTATION.....	169
