## Part I OPTHALMIC DISPENSING, 1

### 1 Frame Types and Parts, 3

---

#### BASIC PARTS, 3

- Frame Fronts, 3
- Temples, 3

#### CONSTRUCTION, 3

- Frames, 3
- Bridge Area, 6
- Endpiece Construction, 7
- Temple Construction, 8
- “Classic” Rimless Fronts, 9
- Coloration, 9

#### FRAME MATERIALS, 9

- Plastic Frame Materials, 9
- Metal Frame Materials, 12

#### ALLERGIC REACTIONS TO FRAME MATERIALS, 14

#### PROFICIENCY TEST, 15

### 2 Frame Measurements and Markings, 17

---

#### THE OLDER DATUM SYSTEM, 17

#### THE BOXING SYSTEM, 17

- Horizontal Midline, 17
- Geometric Center, 17
- Size, 17
- Measurement, 17
- Effective Diameter, 18
- Frame Difference, 18
- Distance Between Lenses (DBL) or Bridge Size, 18
- Geometric Center Distance (GCD), 18
- Seg Height, 20

#### TEMPLE LENGTH, 20

- Overall Temple Length, 20
- Length to Bend (LTB), 20
- Front to Bend (FTB), 20

#### FRAME MARKINGS, 20

- Eye Size and DBL, 20
- Location of Markings, 20

- Frame Manufacturer Name, Color, and Country of Origin, 22

- Safety Frame Markings, 22

- Gold Classifications for Metal Frames With Substantial Gold Content, 22

#### PROFICIENCY TEST, 23

### 3 Measuring the Interpupillary Distance, 25

---

#### DEFINITION, 25

#### DISTANCE PD, 25

- Binocular PD, 25
- Monocular PD, 27

- PD Measuring Instruments, 29

#### NEAR PD, 30

- Measuring Near PD With a PD Rule, 30
- Taking Near PD Using a Pupillometer, 31

#### USING THE NEAR PD FOR BIFOCAL INSET, 31

- Calculating The Near PD, 31
- Recommendations for Finding the Near PD, 34

- Examples for Finding the Near PD, 34

#### PROFICIENCY TEST, 37

### 4 Frame Selection, 39

---

#### USING THE WEARER'S OLD FRAME, 39

- Factors to Consider Before Using the Wearer's Old Frames, 39

#### COSMETIC CONSIDERATIONS, 39

- Frame Shape and Face Shape, 40
- Bridge Design, 44

#### FITTING CONSIDERATIONS, 45

- The Bridge, 45
- Temples, 48
- Selecting Frames for the Progressive Addition Lens Wearer, 49
- Selecting Frames for the High Minus Wearer, 49

- Selecting Frames for the High Plus Wearer, 51
- Selecting Frames for Children, 54
- Selecting Frames for Older Wearers, 55
- Selecting Frames for Safety Eyewear, 55
- Devices That Help in the Frame Selection Process, 55
- Closing the Frame Selection Process, 57

#### **A WORD ON FRAME**

**MANAGEMENT, 58**

**PROFICIENCY TEST, 60**

## **5 Reference Point Placement, Multifocal Height, and Blank Size Determination, 62**

---

**POSITION OF THE FRAME, 62**

**OPTICAL CENTERING FOR SINGLE VISION LENSES, 62**

- Horizontal Placement of the Lenses in the Frame, 62
- Vertical Displacement, 63
- Vertex Distance, 69

**MEASURING FOR MULTIFOCAL HEIGHTS, 70**

- Measuring for Bifocals, 70
- Measuring for Trifocals, 72
- Comparison With Old Lenses, 73
- Other Methods, 74
- Measuring for Double Segs, 75
- Unequal Seg Heights, 75
- Variations of Seg Height, 78
- Influence of Vertex Distance on Apparent Seg Height, 80

Prism-Compensated Segs, 80

**COMPENSATING FOR AN INCORRECTLY SIZED SAMPLE FRAME, 81**

- When the Eye Size Is Incorrect, 81
- If the Correct Bridge Size Is Unavailable, 81
- The Alternatives, 81

**INSTRUCTING THE NEW BIFOCAL WEARER, 82**

**DETERMINING LENS BLANK SIZE, 82**

MBS for Single-Vision Lenses, 82

**PROFICIENCY TEST, 85**

## **6 Ordering and Verification, 89**

---

**ORDERING, 89**

General Procedures for Forms, 89

**REORDERING FROM EXISTING SPECTACLES, 89**

Obtaining Lens Information for Existing Spectacles, 89

Obtaining Prescription Information for Single-Vision Lenses, 92

Obtaining Prescription Information for Multifocal Lenses, 97

Identifying Multifocal Segment Style and Size, 100

Identifying Base Curve, 100

Identifying Lens Material, 101

Identifying Lens Tint, 102

What to Keep in Mind When Ordering One Lens Instead of Two, 102

**ORDERING LENSES ONLY, 102**

Ordering "Lenses Only" Using a Remote Frame Tracer, 102

Ordering "Lenses Only" By C-Size, 102

Ordering "Lenses Only" for a Frame of an Unknown Shape, 103

**VERIFICATION, 105**

Verifying Lens Powers and Determining Error Tolerances, 105

Verifying for Prescribed Prism, 110

Verifying Lens Segments and Surfaces, 114

Verification of Frames and Quality of Mounting, 115

Overall Verification, 115

**PROFICIENCY TEST, 116**

## **7 Lens Insertion, 120**

---

**AN OVERVIEW OF INSERTING LENSES INTO PLASTIC FRAMES, 120**

Lens Insertion Into Normal Plastic (Cellulose Acetate) Frames, 120

Insertion Into a Cellulose Propionate Frame, 126

Insertion Into a Nylon Frame, 127

Insertion Into a Carbon Fiber Frame, 127

Insertion Into a Polyamide Frame, 127

Insertion Into a Polycarbonate Frame, 127

Insertion Into a Kevlar Frame, 128

Insertion Into an Optyl Frame, 128

**LENS INSERTION INTO A METAL FRAME, 128**

**LENS INSERTION INTO A NYLON CORD FRAME, 130**

Replacing a Nylon Cord of Unknown Length, 130

Replacing an Old or Broken Nylon Cord, 133

Cautions for Lenses With Thin Edges, 133

Retightening a Loose Nylon Cord Lens, 134

Nylon Cord Frames With Liners, 134

Frames With Metal "Cords" for Rims, 134

**CLEANING FRAMES AND LENSES, 134**

**PROFICIENCY TEST, 136**

## **8 Standard Alignment, 138**

---

### **STANDARD ALIGNMENT OR "TRUING" OF FRAMES, 138**

#### **SECTION A: STANDARD ALIGNMENT OF PLASTIC FRAMES, 138**

#### **HEATING THE FRAME, 138**

Hot Salt or Glass Beads, 138

Forced Hot Air, 139

#### **THE BRIDGE, 139**

Horizontal Alignment, 140

Vertical Alignment

(Four-Point Touch), 141

#### **THE TEMPLES, 142**

Open Temple Spread, 142

Temple Parallelism, 146

Aligning the Temple Ends, 149

Temple-Fold Angle, 151

#### **SECTION B: STANDARD ALIGNMENT OF METAL FRAMES, 152**

#### **THE BRIDGE, 152**

Horizontal Alignment, 152

Vertical Alignment

(Four-Point Touch), 153

#### **THE TEMPLES, 155**

Open Temple Spread, 155

Temple Parallelism (Changing the  
Pantoscopic Angle), 157

Aligning the Temple Ends, 159

Temple-Fold Angle, 160

#### **SECTION C: STANDARD ALIGNMENT OF NOSEPADS, 161**

#### **FRONTAL ANGLE (VIEWED FROM THE FRONT), 161**

Pad Spacing, 162

Pad Height, 162

#### **SPLAY ANGLE, 162**

#### **VERTICAL ANGLE (VIEWED FROM THE SIDE), 163**

Pads Must Have Equal Distances From the  
Frame Front, 163

A Humorous Way to Remember the Three  
Pad Angles, 163

#### **SECTION D: STANDARD ALIGNMENT OF RIMLESS EYEWEAR, 164**

#### **RIMLESS CONSTRUCTION AND LENS MATERIALS, 164**

Appropriate Lens Materials, 164

#### **ALIGNING THE BRIDGE, 164**

Horizontal Alignment, 164

Vertical Alignment

(Four-Point Touch), 165

#### **THE TEMPLES, 167**

Open Temple Spread, 167

Temple Parallelism, 168

Aligning the Temple Ends, 168

Temple-Fold Angle, 168

#### **OTHER RIMLESS ADJUSTMENTS, 170**

Rimless Nosepad Alignment, 170

A Loose Lens, 170

#### **PROFICIENCY TEST, 172**

## **9 Adjusting the Frame, 175**

---

### **CAUSES OF COMPLAINT, 175**

#### **SECTION A: OVERALL FRAME ADJUSTING, 175**

#### **THE FITTING PROCESS, 175**

Putting the Frames On, 175

Triangles of Force, 175

Achieving the Proper Temple Spread, 175

#### **THE FRONT, 177**

Pantoscopic Angles, 178

#### **THE TEMPLES, 179**

Fitting Straight-Back and Skull

Temples, 179

Positioning the Temple Bend, 180

Optyl Temples, 184

Spring Hinge Temples, 184

Riding Bow and Cable Temples, 185

Hearing Aids and Fitting Eyewear, 186

#### **GENERAL INSTRUCTIONS TO THE WEARER ON FRAME HANDLING, 186**

#### **SECTION B: FITTING ADJUSTABLE NOSEPADS, 187**

#### **PROPER PAD ANGLES FOR ADJUSTABLE PADS, 187**

Achieving the Proper Pad Angles for  
Adjustable Bridges, 187

When Pad Angles Are Correct, But Still  
Slide Down or Hurt, 188

Adjusting Pad Angles for Rimless or  
Semirimless Mountings, 190

#### **FRAME HEIGHT AND VERTEX DISTANCE, 190**

Achieving the Correct Frame Height, 190

Proper Vertex Distance, 190

#### **ADJUSTING NOSEPADS WITH INVERTED U-SHAPED PAD ARMS, 191**

Changing the Distance Between Pads for  
"Inverted U-Shaped" Pad Arms, 191

Moving the Frame Left or Right, 192

Changing Frame Height, But Not Vertex  
Distance, 195

Changing Vertex Distance, But Not  
Height, 198

#### **ADJUSTING NOSEPADS WITH QUESTION MARK-STYLE PAD ARMS, 201**

- Changing the Distance Between Pads for Question Mark–Style Pad Arms, 201
- Moving the Frame Left Or Right With Question Mark–Style Pad Arms, 204
- Changing Frame Height But Not Vertex Distance for Question Mark–Style Pad Arms, 204
- Increasing the Vertex Distance Only for Frames With Question Mark–Style Pad Arms, 205
- Decreasing the Vertex Distance Only for Frames With Question Mark–Style Pad Arms, 206

### **SECTION C: “NONADJUSTABLE”**

#### **BRIDGE ADJUSTMENTS, 209**

#### **ACHIEVING THE PROPER FITTING ANGLES FOR NONADJUSTABLE PLASTIC BRIDGES, 209**

- Modifying Fixed Pad Bridges, 209
- Modifying Sculptured Bridges, 209

#### **FIXED BRIDGE HEIGHT AND VERTEX DISTANCE CHANGES, 209**

- Plastic Frames, 210

#### **RECHECKING THE FRAME**

##### **FIT, 212**

#### **PROFICIENCY TEST, 214**

## **10 Frame Repairs and Modifications, 217**

---

### **SCREW REPLACEMENTS AND REPAIRS, 217**

- Correctly Using an Optical Screwdriver, 217
- Loose Screws, 217
- Misaligned Hinge Barrels, 222
- Replacing a Missing Screw, 222
- Finding a Screw From Inventory, 223
- Titanium Screws, 223
- Broken and Stuck Screws, 223
- Replacing Rimless Screws, 229

### **NOSEPAD REPLACEMENTS, 229**

- Push-On, 230
- Screw-On, 230
- Logic, 231
- Pad Sizes, 231
- Types of Pad Materials, 231
- Replacing Adjustable Pads With Strap Bridges, 231

### **TEMPLE REPAIRS, 232**

- Replacing Missing or Broken Temples, 232
- Replacing the Plastic Earpiece Covers on Metal Temples, 232
- Adding Covers to Cable Temple Earpieces, 232

- Covering the Temples to Reduce Allergic Reactions, 233

- Lengthening and Shortening of Metal Temples, 233

- Changing Cable Temple Lengths, 234

- Converting Standard Plastic Temples to Cable-Style Temples, 235

- Shortening Plastic Temples, 235

### **REPAIRING THE HINGES, 237**

- Riveted Hinges, 237
- Removing the Rivets and Shield, 237
- Hidden Hinges, 238

### **BRIDGE REPAIRS, 242**

- Broken Plastic Bridges, 242
- Replacing Nosepads on Plastic Frames, 244

### **THE EYEWIRE AND LENS, 247**

- Broken Eyewires, 247
- Lower Edge Appears Out of the Frame, 247
- Upper Edge Appears Out of the Frame, 249
- When the Lens Is Too Small for a Plastic Frame, 249
- When the Lens Is Too Small for a Metal Frame, 249

### **FRAME TRIM, 251**

- Trim on Plastic Frames, 251
- Metal Plaques on a Metal Chassis, 252

### **CLEANING THE FRAME, 253**

- Cleaning Technique, 253
- Discoloration, 253
- Surface Marked by Pliers, 253
- Restoring Finish on Optyl Frames, 253
- Bubbles, 253

### **SOLDERING, 253**

- Flame Soldering, 254
- Electric Soldering, 255
- Discoloration, 256
- Touch-Up Plating, 256

### **APPENDIX 10-A, 256**

#### **CLIP-ON, 257**

#### **TWIST-ON, 257**

#### **ZEISS BAYONET, 257**

#### **SPLIT-CLAMP, 258**

#### **STIRRUP, 258**

#### **RIVET TYPE, 258**

#### **PROFICIENCY TEST, 258**

## **Part II OPHTHALMIC LENSES, 261**

### **11 Review of Elementary Mathematical Principles, 263**

---

#### **THE METRIC SYSTEM, 263**

#### **REVIEW OF ALGEBRA, 263**

- Transformation, 263
- Use of Parentheses, 264
- Positive and Negative Numbers, 265

- Use of the Reciprocal, 265
- Roots and Powers, 265
- REVIEW OF GEOMETRY, 266**
  - The Cartesian Coordinate System, 266
  - Triangular Forms, 266
  - Similar Triangles, 267
- REVIEW OF TRIGONOMETRY, 268**
  - Vector Analysis, 269
- PROFICIENCY TEST, 271**

## **12 Characteristics of Ophthalmic Lenses, 273**

---

- THEORY OF LIGHT, 273**
  - Defining Light Waves, 273
- REFLECTION, 274**
- THE SPEED OF LIGHT AND REFRACTIVE INDEX, 276**
- REFRACTION, 276**
  - Snell's Law, 276
- PRISM, 278**
  - When Light Goes Straight Through Parallel Surfaces, 278
  - When Light Goes Through Parallel Surfaces at an Angle, 278
  - When the Two Surfaces Are Not Parallel, 278
- HOW CURVED LENSES REFRACT LIGHT, 279**
  - Refraction of Multiple Light Rays, 279
  - Focusing Light, 279
- FOCAL POINTS AND DISTANCES, 280**
- QUANTIFYING LENSES, 280**
  - Sign Convention, 280
  - Surface Curvature, 281
  - Convex and Concave Surfaces, 282
  - Units of Lens Power, 282
  - Positive Lenses and Real Images, 282
  - Negative Lenses and Virtual Images, 283
  - Surface Power and the Lensmaker's Formula, 283
- THE ACTION OF A LENS ON OTHER THAN PARALLEL LIGHT, 284**
  - The Concept of Vergence, 284
- SPHERES, CYLINDERS, AND SPHEROCYLINDERS, 287**
  - Spheres, 287
  - The Problem of Astigmatism, 288
  - Cylinder Lenses, 288
  - Spherocylindrical Combinations, 290
  - Minus Cylinder Lenses, 291
- LENS FORM, 292**
  - Lens Forms a Sphere May Take, 292
  - Lens Forms a Cylinder May Take, 293
  - Lens Forms a Spherocylinder May Take, 296
  - Toric Transposition, 299

- Crossed-Cylinder Form, 299
- The Spherical Equivalent, 300
- PROFICIENCY TEST, 301**

## **13 Lens Curvature and Thickness, 304**

---

- CATEGORIES OF OPHTHALMIC LENSES, 304**
  - Single Vision Lenses, 304
  - Segmented Multifocal Lenses, 304
  - Progressive Addition Lenses, 304
- BASE CURVES, 305**
  - Single Vision Lens Curves, 305
  - Multifocal Lens Base Curves, 308
- MEASUREMENT OF LENS CURVATURE, 308**
  - The Lens Measure, 308
  - The Sagittal Depth Formula, 308
  - Using the Lens Measure to Find the Nominal Power of a Lens, 310
  - Use of the Lens Measure With Multifocals, 310
  - Why Measured Base Curves Do Not Always Come Out As Expected, 311
  - When to Specify Base Curve, 314
  - When Not to Specify Base Curve, 314
- ADDING CYLINDERS, 315**
  - Adding Cylinders Having the Same Axis or With Axes 90 Degrees Apart, 315
  - Jackson Crossed Cylinders, 316
  - Obliquely Crossed Cylinders, 317
- LENS THICKNESS, 323**
  - Sagittal Depth, 323
  - Thickness of Meniscus Lenses, 324
  - Concepts in Understanding Lens Thickness, 325
  - Center and Edge Thicknesses for Meniscus Lenses, 328
  - Determining Lens Diameter for Noncentered Lenses, 330
  - Estimating Edge Thickness, 330
- CURVATURE IN AN OBLIQUE MERIDIAN, 331**
  - Using Sine-Squared  $q$  to Find the "Power" of the Cylinder in an Oblique Meridian, 332
- PROFICIENCY TEST, 333**

## **14 Optical Considerations With Increasing Lens Power, 338**

---

- LENS POWER AS RELATED TO POSITION, 338**
  - Positional Lens Power Problems, 338
  - Effective Power, 338
  - Effective Power as Related To Vertex Distance Changes, 339

- Effective Power of a Spherocylinder Lens, 341
- Effective Power Written As a Formula, 341
- AS LENS THICKNESS INCREASES, 341**
- Vergence of Light As It Travels Through a Lens, 341
- Reduced Thickness and Refractive Index, 342
- Vergence of Light Striking the Second Surface of a Thick Lens, 343
- FRONT AND BACK VERTEX POWERS, 344**
- Calculating Front and Back Vertex Powers, 344
- PROFICIENCY TEST, 346**

## **15 Optical Prism: Power and Base Direction, 349**

---

- OPHTHALMIC PRISMS, 349**
- The Relationship Between Prism Apical Angle and Deviation of Light, 349
- Simplifying for Thin Prisms, 350
- The Prism Diopter ( $\Delta$ ), 352
- Finding Prism Displacement for Any Distance, 352
- Conversion From Degrees of Deviation to Prism Diopters, 354
- The Prism Centrad ( $\nabla$ ), 354
- Image Displacement, 355
- How to Specify Prism Base Direction, 356
- Prism Base Direction for Paired Lenses, 362
- COMPOUNDING AND RESOLVING PRISM, 362**
- Compounding, 362
- Resolving, 363
- Combining Two Obliquely Crossed Prisms, 365
- ROTARY PRISMS, 365**
- HOW THE EFFECTIVE POWER OF A PRISM CHANGES FOR NEAR OBJECTS, 367**
- PROFICIENCY TEST, 372**

## **16 Optical Prism: Decentration and Thickness, 376**

---

- DECENTRATION OF SPHERES, 376**
- A Centered Lens, 376
- A Decentered Lens, 376
- Prentice's Rule, 376
- Prism Base Direction With Decentration, 377
- Horizontal and Vertical Decentration of Spheres, 379

- DECENTRATION OF CYLINDERS, 380**
- Decentration Along Major Meridians, 381
- Decentration of Cylinders Oriented Obliquely, 382
- Horizontal and Vertical Decentration of Oblique Cylinders, 385
- DECENTRATION OF SPHEROCYLINDERS, 385**
- Decentration of Spherocylinders Using an Approximation, 387
- Ground-In Prism Versus Prism by Decentration, 388
- PRISM THICKNESS, 389**
- Thickness Differences Between Prism Base and Apex, 389
- How Prescribed Prism Affects Lens Thickness, 390
- PROFICIENCY TEST, 392**

## **17 Fresnel Prisms and Lenses, 396**

---

- WHAT IS A FRESNEL PRISM?, 396**
- What Are the Advantages of a Fresnel Prism?, 396
- What Are the Disadvantages of a Fresnel Prism?, 396
- WHEN ARE FRESNEL PRISMS USED?, 396**
- High Amounts of Prism, 396
- Use and Reuse, 396
- Sectorial Application, 396
- Visual Field Defects, 397
- Cosmetics of Nonseeing Eyes, 398
- Slowing of Nystagmus, 398
- WHAT IS A FRESNEL LENS?, 398**
- When Are Fresnel Lenses Used?, 398
- How to Apply a Fresnel Lens or Prism to a Spectacle Lens, 399
- How to Clean Fresnel Lenses or Prisms, 400
- PROFICIENCY TEST, 401**

## **18 Lens Design, 402**

---

- A SHORT HISTORY OF LENS DEVELOPMENT, 402**

- Validation on the Patient, 465
- Removing the Visible Markings, 465
- Instructing the Wearer at Dispensing, 465

**TROUBLESHOOTING PROGRESSIVE PROBLEMS, 465**

- Using the Near PD Method When Near PD Proves Incorrect, 465

**SECTION 2: GENERAL PURPOSE PROGRESSIVES, 468****OPTICAL CHARACTERISTICS OF GENERAL PURPOSE PROGRESSIVES, 468**

- Unwanted Cylinder, 468
- The Use of Contour Plots to Evaluate Progressive Lenses, 469

## HOW PROGRESSIVE LENS DESIGNS HAVE CHANGED, 469

Spherical and Aspherical Distance  
Portions, 469

Hard Versus Soft Designs, 471

Monodesigns Lead to Multidesigns, 473

Progressives Should Be Uniquely Right  
and Left Specific, 473

## NEW MANUFACTURING METHODS ALLOW NEW LENS DESIGNS, 473

### DESIGNS USING ASPHERIC AND/OR ATORIC SURFACING METHODS, 474

### POSITION-OF-WEAR OR AS-WORN LENS DESIGNS, 474

### ATORIC PROGRESSIVES, 475

### PERSONALIZED PROGRESSIVES, 475

## SECTION 3: SPECIALTY

### PROGRESSIVES, 476

### SHORT CORRIDOR PROGRESSIVE LENSES, 476

### NEAR VARIABLE FOCUS LENSES, 476

Power Ranges, 478

Near Variable Focus Lenses Differ, 478

Power Changes in the Vertical  
Meridian, 479

Customizing the Near Variable Focus Lens  
to the Needs of the Wearer, 479

Fitting the Near Variable Focus  
Lens, 481

### OCCUPATIONAL PROGRESSIVES THAT INCLUDE DISTANCE POWERS, 481

## SECTION 4: PRISM AND PROGRESSIVE LENSES, 481

### PRISM THINNING, 481

Prism Thinning Causes Prism at the  
PRP, 482

### THE EFFECT OF PRESCRIBED PRISM ON PROGRESSIVE LENS FITTING, 482

Vertical Rx Prism Changes Fitting Cross  
(and Bifocal) Heights, 482

Horizontal Rx Prism Changes PD  
Measurements, 483

When Might the Amount of Horizontal  
Prism Be Modified?, 483

### SUMMARY, 486

### PROFICIENCY TEST, 487

## **21 Anisometropia, 491**

### INTRODUCTION, 491

### ANISEIKONIA, 491

Types of Aniseikonia, 491

Spectacle Magnification: How a Spectacle  
Lens Changes the Image Size, 493

Theoretically, What Was the Best

Correction Thought to Be for

Preventing Aniseikonia?, 494

Detecting Clinically Significant  
Aniseikonia, 495

### CORRECTING ANISEIKONIA WITH SPECTACLE LENSES, 495

Using a "First Pass Method" to Prevent  
Possible Problems, 496

Making "Directionally Correct"

Magnification Changes, 496

Estimating Percent Magnification  
Differences, 496

Measuring Percent Magnification  
Differences, 496

How Helpful Is Correcting for  
Aniseikonia?, 498

### WHAT IS A BITORIC LENS?, 498

### PRISMATIC EFFECT OF LENS

#### PAIRS, 498

Anisophoria, 499

### VERTICAL IMBALANCE, 500

Who Is Responsible for Correcting  
Vertical Imbalance?, 500

When Is a Correction for Vertical  
Imbalance Needed?, 501

### CORRECTING FOR VERTICAL IMBALANCE, 501

Contact Lenses, 501

Two Pairs of Glasses, 501

Dropping the Major Reference Point  
Height, 501

Raising the Seg Height, 502

Fresnel Press-on Prism, 502

Slab Off (Bicentric Grinding), 502

Slab-Off Verification, 505

Dissimilar Segs, 505

Compensated "R" Segs, 507

### DETERMINING THE CORRECT AMOUNT OF COMPENSATION FOR VERTICAL IMBALANCE, 508

Determining the Reading Level, 508

### METHODS FOR DETERMINING THE PRISM CORRECTION NEEDED, 508

How the Prescriber Determines the  
Needed Amount of Imbalance  
Correction, 508

How to Use a Lensmeter to Determine the  
Amount of Imbalance, 509

How an Optical Laboratory Determines  
the Amount of Imbalance, 509

### CORRECTING THE FULL IMBALANCE BY CALCULATIONS, 509

- Using Prentice's Rule to Calculate Vertical Imbalance for Spheres, 509
- Using Prentice's Rule to Calculate Vertical Imbalance for Spherocylinders, 510
- Using the Cosine-Squared Method and Prentice's Rule to Find Vertical Imbalance, 512
