Contents

Part 1: Introduction to SketchUp. 1

Chapter 1: How to Use This Book 2
Who Can Use This Book 2
Learning Tutorials 4
Downloadable Tutorial Models 4
Downloadable Pre-Made Components . . . 7
The Four Parts. 7
Part 1: Introduction to SketchUp 7
Part 2: Introduction to SketchUp Process Modeling 8
Part 3: Sandbox Tools 8
Part 4: AutoCAD to SketchUp 10

Chapter 2: SketchUp Basics 11
Geometry. 11
Simple Geometry 11
Complex Geometry 12
Healing Faces 12
Subdividing Faces 13
Sticky Geometry 13
Face Count 13
Basic SketchUp Tools. 14
Drawing and Modification Tools. 15
Additional Tools 16
The Value Control Box. 18
Styles 19
Navigation and 3D Inference System 20
Drafting with Edges 22
Model Organization 24

Chapter 3: Components and Groups . . 26
Component Instances 28
Editing Components 28
Adjusting the Component/Group View . . 30
Components within Components 32
Components and Layers 34
Pre-Made Components 35
Free SketchUp Bonus Pack Components . 35
FormFonts Components. 37
SketchUcation and Google SketchUp Component Forums 37
Google 3D Warehouse 37
Component Library 37

Chapter 4: Problem Solving 39
Problem-Solving Tutorials 40
Typical SketchUp Problems 40
Different Results on Different Computers. 41
SketchUp Freezes. 41
Auto Save. 41
Subdivide 41
Support Sites. 42

Chapter 5: Ruby Scripts 43
Downloading Ruby Scripts. 44
Installing Ruby Scripts 45
Activating Ruby Scripts. 45
Troubleshooting an Installation 46

Part 2: SketchUp Process Modeling 47

Chapter 6: Introduction to SketchUp Process Modeling 48
The Built Environment 48
Surfaces. 49
Objects 49
2D = 3D 50
Drafting the Flatwork Base 51
Drawing the Base. 52
Reviewing the Drawing 55
Applying Material and Color 56
Organizing Models 57
Adding Volumes 58
Lower the Road 58
Creating the Building 59
Making a Roof 60

Push/Pulling the Steps 60
Push/Pulling the Walls 61
Adding Objects to the Flatwork Base 61
Organizing Components 62
Creating Component Layers 62
Component Tools 63
Adding Components to the Flatwork Base 66
Adding Component Windows and Doors 68
Adjusting the Building Components 69
Reviewing the Completed Model 69
An Advanced Example 71
Modeling Your Own Designs 72

Chapter 7: Detailed Site Plan Modeling 73

Using Site Plans 73
Importing Site Plans 74
Imported-Image Resolution 75
Placing the Plan Image on a Layer 75
Scaling the Image 75
Preparing the Drafting Trace 76
Drafting Tips 77
Drafting Order 78
Create the Flatwork Base Group 85
Adding Color and Texture 86
Adding Volume 87
Road and Curb 87
Steps and Plaza 88
Planter Walls 89
Ramp 90
Planter Walls Adjustments 91
Entry Sign Wall 91
Buildings as Components 91
Building Volumes 92
Adding Detail to Volumes 93
Detailing the Sign 93
Detailing the Planters 95

Chapter 8: Custom Site Furnishings . 98

The Modeling Process 98
Components within Components 99
The Follow Me Tool 101
Model Organization 104
Tutorials 104
The Bollard 105
The Pedestrian Light 107
The Modern Bench 110
The Park Bench 111
The Decorative Planter Bench 117
The Decorative Rail 121
The Handrail 123

Chapter 9: Custom Architecture 125

Sculpting the Building 125
Building the Mass 125
Making Window and Door Components 126
Problem Solving the Window Components 128
Copy and Insert 129
Copy and Paste Between Instances 129
Make Unique 130
Tutorials 130
Setting the Workspace 131
Adding Mass to Buildings 1 and 2 131
Adding Mass to Building 3 134
Window Components 136
Door Components 140
Balcony Component 141

Chapter 10: Arranging and Presenting the Model . . . 145

Arrangement Methods 146
The Accuracy Method 146
The Speed Method 146
Logical Order and Adjustments 147
Buildings 147
3D Vegetation 147
Furnishing Components 152
Creating and Exporting Scenes 153
Selecting Your Scenes 153
Plan Views and Elevations 154
People and Cars 154

Trees and Scenes 154
Adding Sky 155
Exporting Scenes and Shadows 155
Troubleshooting Shadows. 155

Chapter 11: Architectural Tutorial . . 160
Working with Arcs and Circles 160
Hidden Geometry. 161
Components and Faceted Surfaces 162
The Courthouse Tutorial 164
Drafting the Floor Plate 165
Adding Volume. 168
Adding the Custom Components 175
Arranging the Components on the Building. 180
Adding Detail to the Building 185

Part 3: The Sandbox Tools 189

Chapter 12: Introduction to the Sandbox Tools 190
Playing in the Sandbox 190
The From Contours Tool 190
The From Scratch Tool. 192
The Smoove Tool 193
The Drape Tool 194
The Add Detail Tool 195
The Stamp and Flip Edge Tools 195
Ruby Scripts and Sandbox Tools 197
Tools on Surface. 197
Joint Push Pull. 198
Soap Skin Bubble 200
Drop Ruby. 201
Simplify Contours 202
Additional Tools and Concepts 203
Intersect with Model. 203
Construction Geometry 205

Chapter 13: SketchUp Conceptual Grading 206
Conceptual Grading 206
Modeling and Grading Tips 207
The Tutorials 207
Pedestrian Ramp 208
Driveway Ramp 210
Slopes and Grades 213
Building Entry Walk 215
Park Landform. 226
Campus Quad—Area 1 235
Campus Quad—Area 2 238
Campus Quad—Area 3 242
Campus Quad—Area 4 257

Chapter 14: Complex Canopies 266
2D Plan to 3D Form 266
Simple Canopy Tutorial. 267
Complex Canopy Tutorial 273

Chapter 15: Sandbox Architecture. . 279
The Drape Tool 279
Working with Drape 279
Troubleshooting Drape. 284
Sandbox Building Tutorial 284

Part 4: AutoCAD to SketchUp 293

Chapter 16: Overview of AutoCAD to SketchUp. 294
General Overview 295
Organizing the AutoCAD File 295
Generating the Geometry 297
Arranging the Objects 299

Chapter 17: Organizing AutoCAD . . . 302
AutoCAD Reorganization. 303
Folder and File Structure 303
AutoCAD Base Files. 304
External Reference Files. 304
Isolating Surfaces 308
Closing Perimeters 309
Organizing Site Objects 310
Write Block Surfaces and Objects 311
Importing the Flatwork File. 313
AutoCAD and SketchUp Units. 313
The Flatwork Drawing File 314

Chapter 18: Modeling the AutoCAD Flatwork Base 315
Exploding the Flatwork Base 315
Problematic AutoCAD Lines 316
Overlapping and Short Lines 316
Arcs 318
Random Anomalies 318
Healing the AutoCAD Flatwork Base 318
Healing with the Line Tool 319
AutoCAD Clean-Up Ruby Scripts 322
Working with Ruby Scripts 324
Troubleshooting Ruby Scripts 327
Method Summaries 328
Next Steps 328

Chapter 19: Arranging the Model 331
Populating the Flatwork Base 331
Exploding the Objects 333
Importing Layers 334
Replacing the Components 335
Finishing Touches 342
Articulating the Buildings 342
Exchanging 3D Components 343
Conceptual Grading 345
Adding More Components 347
Making Adjustments 348
Adding New Details 350
Adding People and Cars 354

Index 355
