PREFACE . . . . .	iii
1 GROUND WATER—AN IMPORTANT RESOURCE . . . . .	1
Ground Water and Aquifer Systems . . . . .	1
Importance and Use of Ground Water . . . . .	5
Natural Quality and Man-Made Contamination . . . . .	13
Selected References . . . . .	19
2 OVERVIEW OF GROUND WATER HYDROLOGY . . . . .	21
Soil Characteristics . . . . .	23
Aquifer Systems . . . . .	24
Darcy's Law . . . . .	28
Aquifer Characteristics . . . . .	33
Aquifer Testing . . . . .	34
Drawdown (Pump) Tests . . . . .	34
Steady Flow, Unconfined Aquifer . . . . .	36
A. Theis Solution . . . . .	38
B. Cooper-Jacob Solution . . . . .	39
Transient Flow, Unconfined Aquifer . . . . .	40
Slug Tests . . . . .	40
Laboratory Tests . . . . .	43
References . . . . .	47
3 GROUND WATER INFORMATION SOURCES . . . . .	49
Reports, Periodicals and Books . . . . .	50
Computerized Information Systems . . . . .	55
Ground Water Data . . . . .	55
Bibliographic Information Retrieval . . . . .	60
National Ground Water Information Center . . . . .	60
Dialog Information Retrieval Service . . . . .	61
Associations and Organizations . . . . .	63
Selected References . . . . .	66
4 GROUND WATER POLLUTION SOURCES . . . . .	67
Source Groupings . . . . .	67
Number of Sources . . . . .	72
Point Sources . . . . .	77

Septic Tank Systems . . . . .	77
Underground Storage Tanks . . . . .	81
Hazardous Waste Sites . . . . .	85
Landfills . . . . .	89
Surface Impoundments . . . . .	93
Abandoned Wells . . . . .	94
Drilling Mud Disposal . . . . .	106
Diffuse Sources . . . . .	110
Agriculture . . . . .	110
Nitrates . . . . .	111
Agricultural Chemicals . . . . .	113
Acid Precipitation and Dry Deposition . . . . .	116
Selected References . . . . .	118
5 POLLUTANT TRANSPORT AND FATE	
CONSIDERATIONS . . . . .	125
Hydrodynamic Processes . . . . .	125
Abiotic Processes . . . . .	128
Biotic Processes . . . . .	132
Microcosm Studies . . . . .	133
Types of Pollutants . . . . .	141
Bacteria . . . . .	141
Viruses . . . . .	144
Nitrogen . . . . .	149
Phosphorus . . . . .	152
Metals . . . . .	153
Organics . . . . .	157
Volatilization . . . . .	158
Adsorption . . . . .	159
Biodegradation . . . . .	161
Immiscible Organics . . . . .	167
Pesticides . . . . .	169
Field Studies . . . . .	169
Laboratory Studies . . . . .	173
Mathematical Models . . . . .	176
Summary . . . . .	178
Radionuclides . . . . .	182
Categories of Pollutant Sources . . . . .	183
Septic Tank Systems . . . . .	183
Solid Waste Disposal Operations . . . . .	185
Land Application of Municipal Wastewater Sludges . . . . .	187

Related Issues . . . . .	187
Leachate Testing . . . . .	188
Ground Water Tracers . . . . .	191
Facilitated Transport . . . . .	195
Selected References . . . . .	198
6 FLOW AND SOLUTE TRANSPORT MODELING . . . . .	209
Governing Equations . . . . .	209
Laplace Equation . . . . .	210
Poisson's Equation . . . . .	210
Transient Flow Equation . . . . .	211
Unconfined Aquifers . . . . .	211
Solute Transport Equation . . . . .	212
Types of Models . . . . .	213
Physical Models . . . . .	213
Scale Models . . . . .	213
Analog Models . . . . .	215
Numerical Models . . . . .	217
Analytical Models . . . . .	218
Stochastic Models . . . . .	221
Computer Models . . . . .	222
Finite Difference Methods . . . . .	224
Finite Element Methods . . . . .	229
Method of Characteristics . . . . .	232
Examples of Models . . . . .	235
Aquifer Characterization . . . . .	235
Natural and Artificial Recharge . . . . .	239
Surface and Ground Water Relationships . . . . .	242
Conjunctive Use . . . . .	243
Ground Water Management . . . . .	244
Pollutant Transport . . . . .	248
Saltwater Intrusion and Salinity . . . . .	251
Pollutant Source Evaluation . . . . .	255
Miscellaneous Models . . . . .	260
Problems with Computer Models . . . . .	261
Selected References . . . . .	264
7 POLLUTANT SOURCE PRIORITIZATION . . . . .	277
General Comments . . . . .	278
Surface Impoundment Assessment . . . . .	279
Landfill Site Rating . . . . .	288
Waste-Soil-Site Interaction Matrix . . . . .	288

Site Rating System . . . . .	294
Hazard Ranking System . . . . .	296
Site Rating Methodology . . . . .	300
Brine Disposal Methodology . . . . .	309
Pesticide Index . . . . .	311
Drastic Index . . . . .	313
Development of Empirical Assessment Methodologies . . . . .	317
Source Characterization and Factors Indicative of Ground Water Pollution . . . . .	317
Assign Relative Importance Weights to Factors . . . . .	319
Establish Scaling Functions . . . . .	320
Application and Field Verification . . . . .	321
Summary . . . . .	321
Selected References . . . . .	321
8 GROUND WATER MONITORING PLANNING . . . . .	325
Types of Monitoring Networks . . . . .	328
Planning Ground Water Monitoring Networks . . . . .	328
Reasons for Monitoring . . . . .	330
Objectives of Monitoring . . . . .	332
Basinwide Ambient Trend Monitoring . . . . .	333
Examples of State Programs . . . . .	333
Design and Operation of Networks . . . . .	338
Source Monitoring . . . . .	343
Design of Networks . . . . .	345
Operation of Networks . . . . .	349
Selected References . . . . .	359
9 GROUND WATER MONITORING AND ANALYSIS . . . . .	363
Monitoring the Vadose Zone . . . . .	363
Comparison of Sampling and Nonsampling Methods . . . . .	363
Suction Cup Lysimeters . . . . .	364
Monitoring the Saturated Zone (Nonsampling Approaches) . . . . .	383
Surface Geophysical Techniques . . . . .	383
Downhole Geophysical Techniques . . . . .	391
Monitoring Wells and Sampling . . . . .	398
Drilling Methods . . . . .	399
Selection of Well Casing . . . . .	399
Sampling Protocol . . . . .	407
Sampling Equipment . . . . .	409
Bailers . . . . .	409
Syringe Devices . . . . .	410

Suction-Lift Pumps . . . . .	414
Gas-Drive Devices . . . . .	414
Gas-Operated Squeeze (Bladder) Pumps . . . . .	414
Gas-Driven Piston Pumps . . . . .	416
Submersible Electric Pumps . . . . .	418
Additional Comparisons and Issues Related to Sampling . .	423
Bias in Ground Water Quality Monitoring . . . . .	423
Quality Assurance/Quality Control . . . . .	445
Project Description . . . . .	446
Project Organization and Responsibility . . . . .	447
QA Objectives for Measurement Data in Terms of Precision, Accuracy, Completeness, Representativeness, and Comparability . . . . .	447
Sampling Procedures . . . . .	447
Sample Custody . . . . .	449
Calibration Procedures and Frequency . . . . .	450
Analytical Procedures . . . . .	451
Data Reduction, Validation and Reporting . . . . .	451
Internal Quality Control Checks . . . . .	451
Preventive Maintenance . . . . .	452
Performance and System Audits . . . . .	452
Specific Routine Procedures Used to Assess Data Precision/Accuracy and Completeness . . . . .	453
Corrective Action . . . . .	453
Quality Assurance Reports to Management . . . . .	454
Statistical Analyses of Ground Water Quality Data . . . . .	454
Basic Statistics . . . . .	455
Student's t-Test . . . . .	456
Cochran's Approximation to the Behrens-Fisher t-Test . . . . .	456
Averaged Replicate t-Test . . . . .	457
F-Distribution Test . . . . .	458
Non-Parametric Analyses . . . . .	458
Regression and Correlation . . . . .	458
Concerns with Statistical Analyses . . . . .	459
Selected References . . . . .	461
10 GROUND WATER POLLUTION CONTROL . . . . .	467
Description of Technologies . . . . .	467
Physical Control Measures . . . . .	470
In-Situ Technologies . . . . .	477
In-Situ Chemical Treatment . . . . .	477

	In-Situ Biological Treatment . . . . .	478
	Ground Water Treatment . . . . .	484
	Air Stripping . . . . .	484
	Carbon Adsorption . . . . .	484
	Biological Treatment . . . . .	486
	Chemical Precipitation . . . . .	487
	Innovative Technologies . . . . .	487
	Classification of Methodologies . . . . .	487
	Future of Technologies . . . . .	489
	References . . . . .	492
