

CONTENTS

PREFACE	ix
PART I ENVIRONMENTAL SYNCHRONIZATION OF REPRODUCTION	1
Synchronization of Spawning in Marine Invertebrates by Phytoplankton	3
<i>John H. Himmelman</i>	
Synchronization of Reproduction in Marine Insects by Tides . . .	21
<i>Dietrich Neumann</i>	
Environmental Control of Reproduction in Polychaeta: Experimental Studies of Littoral Species in Northeast England	37
<i>Peter J. W. Olive</i>	
Synchronization of Gametogenesis in the Sea Urchins <i>Strongylocentrotus purpuratus</i> and <i>S. franciscanus</i>	53
<i>John S. Pearse</i>	
Synchronization of Spawning in the Crinoid, <i>Comanthus japonica</i> . .	69
<i>Hiroshi Kubota</i>	
A Model Linking Environmental Signals to the Spawning Time of <i>Comanthus japonica</i> (Echinodermata: Crinoidea)	75
<i>Nicholas D. Holland</i>	
PART II ENDOCRINE CONTROL OF REPRODUCTION	79
Steroids in Invertebrates	81
<i>Thomas Sandor</i>	
Ecdysone, a Gonadal Hormone in Insects	97
<i>H. H. Hagedorn</i>	
The Role of Ovarian Hormones in Maintaining Cyclical Egg Production in Insects	109
<i>T. S. Adams</i>	
The Possible Role of Steroids in Vitellogenesis in the Starfish <i>Asterias rubens</i>	127
<i>H.J.N. Schoenmakers</i>	
Hormone Uptake and Metabolism During Gamete and Gonadal Differentiation in Starfish	151
<i>Allen W. Schuetz and Richard Glad</i>	
Endocrine Control of Sexual Differentiation and Reproduction in the Snail, <i>Helix aspersa</i> Muller	163
<i>Lucien Gomot, Bernadette Griffond, John Wijdenes, and Jacqueline Bride</i>	
Experimental Studies of Reproduction in Malacostraca Crustaceans. Description of Vitellogenesis and of its Endocrine Control . .	177
<i>Helene Charmiaux-Cotton</i>	

Experimental Studies of Reproduction in Malacostraca Crustaceans. Endocrine Control of Spermatogenic Activity	187
<i>Genevieve G. Payen</i>	
Control of Moth Reproduction by Disruption of the Pheromone Communication: Problems and Promise	197
<i>L. L. Sower</i>	
PART III GAMETE ACTIVATION AND INTERACTION	213
The Isolation of Gamete Surface Components Involved in the Adhesion of Sperm to Eggs During Sea Urchin Fertilization . . .	215
<i>Victor D. Vacquier</i>	
Dual Ionic Controls in Cell Activation at Fertilization in Sea Urchin Eggs	225
<i>Richard A. Steinhardt</i>	
Evolution and Role of Apyrene Sperm Cells of Lepidopterans: Their Activation and Denaturation in the Leek Moth, <i>Acrolepiopsis</i> <i>assectella</i> (Hypomeutoidea)	231
<i>Eric Thibout</i>	
Morphogenesis and Activation of Tick Sperm	243
<i>James H. Oliver, Jr. and Julian Shepherd</i>	
Accessory Reproductive Gland Involvement with the Sperm-Egg Interaction in Muscoid Flies	253
<i>Roger A. Leopold</i>	
Artificial Insemination of Caridean Shrimp	271
<i>Paul A. Sandifer and John W. Lynn</i>	
Sperm-Egg Interactions in Hydromedusae	289
<i>Richard L. Miller</i>	
PART IV ABSTRACTS.....	320
Species Index.....	394
Subject Index.....	397
